Why Berry's Hybrids Excel

Customers who have used Berry Hybrids in comparison with others write that they have secured larger yields, finer feeding quality, excellent husking and vigorous healthy plants.

Such satisfaction does not come by accident. It comes from the development of varieties that have proven superior in research and actual farm experience. It comes from using better seed stock, careful growing and processing of the seed. It excels because it is graded carefully for accurate planting. The seed has high germination to help assure full stands of the highest yielding quality Hybrids. Our seeds cost you no more than ordinary Hybrids. See guarantee page 5. Grow Berry's Hybrids and learn as others have done that they are quality products that bring greater profits.

Graded for Accurate Planting

The Berry Hybrid Varieties described on pages 2, 3, 4 and 5 are available in Medium Flat, Medium Large Flat and Large Flat. You can also get these varieties in Large Round, Medium Round and Small Round. Please specify on your order which kind you want. Every grade is passed over machines that separate the seed according to thickness, width and length of kernel. For grades of Hybrid Blend see page 6.

BERRY'S 613

110 to 115 Day Maturity

Single Ear, Deep Grain—Fine Feed

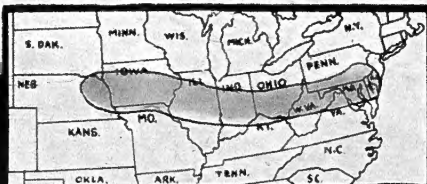

A beautiful Hybrid. Starts off with a bang after planting, making early cultivation easy. An abundance of vigorous dark green foliage borne on stiff, strong stalks. Pretty as a picture while growing and it yields as fine as it looks. The big single ears are borne at medium height. A fine corn for either hand or machine picking. The husks on the ear dries while stalks are still green, thus enabling the ear to make its fullest development. The kernels are deep and golden yellow in color. It is not a hard, flinty corn. Contains sufficient soft stock so all kinds of livestock can eat the grain readily but is not so starchy as to impair its high feeding value.

This Hybrid is resistant to drought, chinch bugs and disease. It is adapted to a wide range of soils. We consider it one of the heaviest yielders obtainable on rich land. Naturally on thin land it will produce less but compared with other kinds on the same soil it will prove its superior productiveness.

This variety is similar to U. S. 13 but earlier in maturity and can be grown into north central Iowa and east and west in sections having similar conditions. Also grown in southern Iowa and sections further south when a little earlier maturity is desired.

In its maturity class we do not believe there is a Hybrid that will beat it for yields, quality and all around satisfactory performance and profit. See maps for areas to which varieties are best adapted.

Page 2

BERRY'S 615

About 105 to 110 Day Maturity

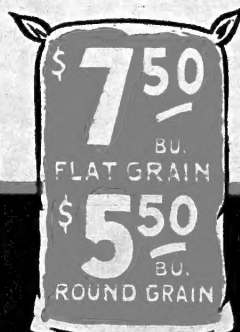

Single Ear. Fine Quality. Heavy Yields

A great many of our customers need a corn of fairly early maturity and, of course, still want top yields and quality. This variety will fill that need exactly for farmers living in sections similar to that from northern Iowa down south for about $\frac{3}{4}$ the way through the state. This takes in parts of Nebraska and goes east through Illinois, Indiana, Ohio, Pennsylvania and West Virginia.

Perhaps you may be acquainted with the Iowa 939 which is very widely grown throughout this area. Berry's 615 is made up of three of the same inbreds. By changing one inbred we have made a corn which has a longer ear and a straighter one. It is superior in strength of stalk and root and there is less ear drop-page.

Thus the good, sound qualities of 939 have been retained and these superior factors added. If there is much difference between varieties as to adaptability to soil types we would consider this to be well adapted to thinner soils. However, it is also excellent for better land and responds to increased fertility by really rolling out the bushels. Because of its earlier maturity it is an excellent selection on land of medium to low fertility. In sections subject to heat and drought this earlier maturity is also a big advantage.

The grain is a rich yellow with a reddish tinge on the sides of the kernels. They are medium rough, easily eaten by live stock. Stalks are strong. Ears medium long. Fine for hand or machine picking. Good drought resistance and a very heavy yielder.

**Big Single Ear
Deep Soft Grain
Extra Heavy
Yielder**

About 120 Day Type

This great variety has made a wonderful record in yield from Nebraska to Connecticut and Delaware and south into Kentucky and other states. It is a strong stalked hybrid bearing a large well shaped ear. Its rich golden kernels are large, deep and soft enough to be readily eaten by all live stock. Grain looks like the old open pollinated corn but far excels and outyields it. It stands up well, is resistant to drought, chinch bugs and disease. Has fine dark green foliage. It is a vigorous grower and is one of the most profitable and productive of hybrid varieties.

Yield Records

These are some recorded yields of official state tests: Iowa 108.4 bu., per acre, Ohio 123.0 bu., Nebraska 106 bu., Pennsylvania 97.7, Indiana 103.2, Missouri 121 bu., Illinois 112.6. In Kentucky only a fraction of a bushel under first place and first in Connecticut in the late series test. This also shows the wide area to which this Hybrid is adapted.

CHARACTER of Berry's U. S. 13

All U. S. 13 seed is not equal in yielding ability. The quality of the foundation stock, the care used in crossing and processing may cause yields to vary from 10 to 15 bu. per acre. That is to say U. S. 13 seed produced by one grower may outyield U. S. 13 from another grower by that many bushel. We do not know where to obtain finer seed than we used in producing our seed stock and in crossing and processing we use great care so as to make Berry's U. S. 13 the best. We will supply you with the highest quality U. S. 13 at a genuine saving in cost. Please order early and get just what you want.

Suggested areas for Berry's 813, 800, U.S. 13

About 118 to 120 day type A Beautiful Single Ear Variety

Wherever this 800 has been grown it has proven itself a winner. Farmers who have seen it and compared it with others all want 800. In yield and quality of grain; in strength of stalk and freedom from disease and in its fine husking qualities, it has superior character. It is adapted to a wide area of soil and climate and can be grown as shown on map.

Comparative Quality

Berry's U.S. 13, described in opposite column, is a wonderful corn, but our new 800 is superior in most tests in the following factors:

Yields of 800 are 3 to 6 bu. per acre more.

There are fewer damaged ears in the field.

It has less ear droppage. In a two-year test being only one-tenth of 1 percent as compared with one and 3 tenths for the 13. This makes it superior for machine picking yet it is easy to pick by hand. The ear height is more uniform and ideal for hand picking.

The stalks are stronger as tests show only one-third as many leaning or broken stalks. In fact only 3% of the total stand.

Superior Factors

Berry's 800 is slightly earlier in maturity.

In depth and width of grain, and in softness the corn is practically identical to U.S. 13.

Berry's 800 gives you these vitally important factors that make for bigger corn profits. Even when compared with quality hybrid like Berry's U. S. 13 you can expect in our 800 Better quality, fewer damaged ears, stronger stalks, less ear droppage, bigger yields, earlier maturity, more uniform ear height. A soft fine feeding quality grain. A corn excellent for machine or hand husking. Be sure to grow some as we consider it one of the outstanding hybrids of today.

**BUY
EARLY**

Hybrid seed corn supplies are relatively short. We advise our customers to mail orders early. Be sure to specify grade. See page 2.

BERRY'S 405

HEAVIEST YIELDING FINE EARLIEST HYBRID

About 100 to 105 Day

We have taken four outstanding inbreds to make this Hybrid. These are lines that have high factors for big yields, fine grain quality, strong stalks of good height and early maturity. This combination makes a Hybrid that we consider second to none in its maturity class. We do not know of any that will make larger ears, deeper grains or better stalks.

This corn starts fast in the spring and matures early in the fall. The strong stalks under average conditions grow around 9 feet and they are quite leafy. While it is grown chiefly for grain this leafy growth makes it well adapted for ensilage. The length of the ear and depth of the grain is extra good for such early maturity. That makes it produce exceptionally well.

Berry's 405 has proven even a better yielder than some of the later maturing kinds. In actual tests it outyielded them by a big margin. It husks easily by hand and is good for machine picking. It is also very good for shredding. We know this is just the kind of corn many farmers are looking for and we recommend it highly to those wanting a top notch early maturing Hybrid. It is not flinty and the grain has fine feeding value.

We consider this corn adapted to sections having conditions similar to that from southern Minnesota to central Iowa. This would include southern Wisconsin and Michigan and considerable areas in states of Colorado, Nebraska, South Dakota, Illinois, Indiana, Ohio, Pennsylvania, New York and West Virginia. It can go farther north for ensilage and farther south when an early maturing variety is desired. It is adapted to a wide range of soils from high to low fertility and has done remarkably well on muck land.

You should find this a most profitable variety to grow. The performance of this corn last year has been so fine we wish we had grown double the acreage of seed. Late buyers may not be able to get this seed so in order to avoid disappointment we suggest you buy now. Shaded area on map at left shows where 405 is considered adapted.

Famous

BERRY'S 813

TOP YIELDER

"STOUT STUFF"

450 bu. and
50 lbs. of
Berry's 813
Grown on
2.95 Acres.

Harry Stout is a good name for him. He is one of our neighbors right out of Clarinda and is also one of our producers of Berry's 813, 77 acres of it this season. Harry is mighty proud of his "813" and he wanted to get some exact figures on it, without any guesswork, so he could tell the world! And he certainly did!

With the help of some friends he came up with the startling results mentioned above, over 151.9 bu. per acre on the area checked. The largest yield on any corn ever gathered in Page County, where we all live.

Just ask Harry Stout if you want to hear someone talk who is really sold on Berry's 813. We would be accused of bragging if we talked like he does. Picture No. 1, the field checked. Picture No. 2, the men who checked it. Mr. Stout is the man on the right in the corn field.

"My Friends Thanked Me"

Dear Friends: I have been doing you a lot of good in regard to your seed corn and can truthfully say that I enjoyed it very much when farmers came to me and said, "Well, Henry, you told me the truth. Berry's 813 is the best!" I could have sold hundreds of bushels in the last two years had I not been so busy. Farmers around here were slow about trying something new. But today the picture has changed. They've seen what Berry's 813 will do.

Henry Wilde, St. Elizabeth, Mo.

"My 813 Largest In The Neighborhood"

Dear Mr. Sinn: This is our third year in ordering seeds and corn Hybrids from you. So far have been very well pleased. Had some Berry's-813 hybrid corn that was the largest in the neighborhood. 405 has been a sure thing and am ordering it for the third year. Am trying your medium Blends this year also 203 W.

A. C. Michael, Fremont, Ohio.

"813 Is Really A Knockout"

Gentlemen: A few days ago I sent an order for 10 bushels of Berry's No. 813 Hybrid and 10 bushels of your No. 800 Hybrid corn from Berry Seed Company at Clarinda.

I had Berry's 813 this year and it was the best ever, making 90 bu. (no irrigation). Have used in the last 3 years quite a number of noted numbers, and 813 was really a knockout. Planted and tended in the same manner as other numbers were tended.

W. L. Otto, Ulysses, Nebr.

RECORD BREAKER!

151.9 BU. PER ACRE

It's Sensational!

If you could only hear the enthusiastic reports from farmers who have grown this great Hybrid we wouldn't have to say a word about it. The big long ears, the deep golden kernels, the large strong stalks, the fine feeding qualities and the tremendous yields are the things they talk about. Many of these farmers grew more than one Hybrid and to date we have found none who reported he had anything that yielded as much as our 813.

Read About The "Stout Test"

(Pictures and Story at Left)

We wish you could have been here and seen the great seed field in the Harry Stout Farm. Would like to have had you help harvest those 2.95 acres checked and watch the great big ears of Berry's 813 being weighed in at 80 pounds to the bushel, for the amazing total of over 151.9 bushels to the acre.

190.36 Bu. Per Acre On One Test

In test plantings we have the following reports on "witnessed" yields. 190.36 bu. per acre at 15% moisture, Andrew K. Hovden, Decorah, Iowa; 169.05 bu., U. S. Newcomer, Auburn, Indiana; 146.57 bu. from Green City, Iowa; 137.28 bu., Calmar, Iowa; 131.64 bu., Lakewood, Illinois. These records of yields indicate the wide adaptability of Berry's 813 and show the enormous capacity of this variety to yield. It is far the best for main crop.

A Wonderful Pedigree

Berry's 813 has everything that U. S. 13 ever had plus a lot more. Extra later pollinating Inbreds have been incorporated. Our purpose is to provide additional pollen to assure fertilization of the ears in event the main pollen crop shall be burned by excessively high temperatures.

Thus there is provided an extra assurance of better filled ears. This also has a tendency to lengthen the ears and it appears to reduce ear dropage.

Character of Berry's 813

One large ear per stalk. Easy to husk by hand or machine. Deep grains of high feeding value. Enough soft starch so livestock will eat it readily but not a real starchy kernel. Dark green foliage. Husks dry before stalk matures. Strong stalks. A vigorous grower. An exceptional drought resister. Resistant to chinch bugs and disease. High shelling percentage. A fine feeding corn. A longer pollinating period assuring better filled ears under adverse conditions. Adapted to a wide range of soils and suitable wherever U. S. 13 can be grown. (See map.) Be sure to grow some this year.

SAVE MONEY ON BERRY'S HYBRIDS

IOWA 939

A hybrid with a wonderful record. Won the Banner Trophy two years in succession as the corn with the highest performance score in the official Iowa State Yield Contest. Adapted to a very wide range of soils and climate. Widely grown from Nebraska on east to the coast and from northern Iowa south to the Ohio river. Especially adapted as a main crop corn to sections similar to the northern half of Iowa and to sections where less fertile soil types and dry spells require a corn that will mature in about 105 to 110 days. See map under No. 615 page 2.

It is a single ear hybrid. Medium rough type Kernels thicker than the average and soft so they can be readily eaten. Color deep yellow with reddish tinge on sides of kernels. In Nebraska it was the best yielder for a 6 year period. Colorado official yield averaged 132.1 bu. per acre for 3 years. Tops in central Penn. Illinois yield 107.8 bu. Top early hybrid in Ohio. Fine in West Va. and New York. Shortly before going to press Claude Nash of Stevensville, Michigan, writes, "I have been growing your hybrid corn for 3 years and your 939 is excellent." He sends a photo of himself and a write-up by his local paper showing a yield of 149 bu. per acre as found by his County Agent. You can't go wrong with this time tested hybrid.

FLAT
\$7.50 BU.
ROUND
\$5.50 BU.

Special quantity prices and samples of any variety or grade mailed on request. We guarantee satisfaction and to save you money. Any grade of flat or round can be planted uniformly for perfect stands.

SEED CORN GUARANTEE

We guarantee our seed corn to germinate 90% or better. It generally is 92 to 95%. We guarantee it to be graded for accurate planting. See page 2 for grades. You can test our seed corn for germination and in any way you desire. If you do not find it satisfactory for any reason notify us within 30 days after you receive the seed. We will give you prompt shipping instructions and refund including freight.

BERRY 666

This hybrid has three of the same Inbreds used in making U. S. 13. Change of the 4th Inbred makes a definitely different variety. The kernels are just as soft or perhaps a bit softer. The grain is just as deep. Maturity a little earlier. It has a high shelling percentage. Ears are slightly more tapered than U. S. 13. Ear droppage is less. Color of grain a little lighter. Ears somewhat lower on the stalk.

We consider it superior for machine husking but it is not difficult to shuck by hand. The stalks are strong. It stands up well and resists heat and drought. You will find it an excellent variety for its yields are exceptionally heavy and will give you both quality and quantity production.

We consider this variety adapted to all sections having conditions similar to eastern Nebraska, Kansas, South Central and Southern Iowa and Northern Missouri. It is widely grown throughout these sections and on east to the Atlantic coast. Makes a fine corn further north for ensilage and further south where early maturity is desired. It is a time tested Hybrid that has proven itself one of the best.

FLAT
\$7.50 BU.
ROUND
\$5.50 BU.

HYBRIDS for Ensilage

\$4.25
PER BU.

Farmers from many sections and especially from Wisconsin, Minnesota, Michigan and other states where a lot of corn is planted for ensilage have said, "we would like to put in hybrids for ensilage but the seed is so expensive." They recognize the extra grain yield and the stronger stalks as a big factor in ensilage corn as well as for mature grain. Some have used hybrid seed in spite of materially higher seed costs.

Now you can plant hybrid as cheap or cheaper than open pollinated corn. We have some special grades of hybrids in the round grain that are admirably suited for ensilage planting. They will grow just as well and produce just as much as flat grain corn. In fact we consider it is better for early planting and that it will withstand more unfavorable weather in the spring. You might have to get plates for planting but you get the corn at a big discount.

You can select from any of the varieties on pages 3, 4 or 5. Just state variety wanted and that you want ENSILAGE GRADE ROUND. Figure it at only \$4.25 per bu. Seed is graded for accurate planting and is of guaranteed high germination.

WHITE HYBRID

Berry's 203 W

There is a large demand for a clear, white, heavy-yielding Hybrid corn. It brings premium prices for milling purposes and it has good feeding qualities. Berry's 203 W brings you the fine character of the old open pollinated plus strong stalks. Seed that is easier to harvest and heavier in yield. We have been looking for a White Hybrid that had the characteristics our customers were asking for and this 203 W has what we believe you want.

Big Yields 134.8 bu. per acre

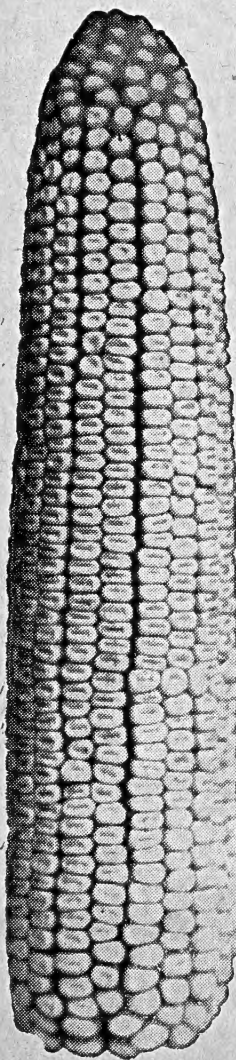

In tests made in 1942 this Hybrid in three experiments made an average yield of 122.3 bu. per acre. The lowest yield was 108.1 and top yield 134.8 bu. It outyielded all yellow varieties in the test. The top yield of U. S. 13 was below the lowest yield of 203 W. U. S. 13 contained only 2% less moisture and this 203 W had a lower score in root lodging and breaking. A Hybrid that will out perform U. S. 13 is a real good corn to select.

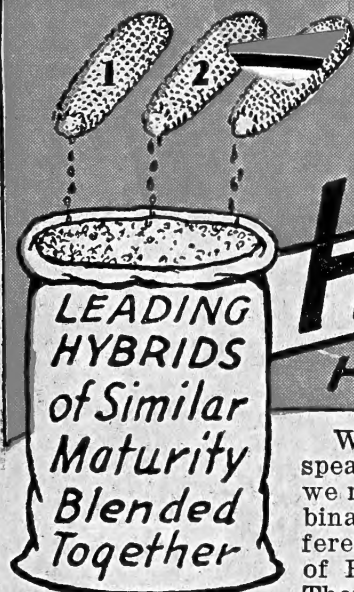

Widely adapted

Our seed stock was grown in the same latitude as Clarinda and should mature about as far north as U. S. 13. It should be a good corn for all sections having conditions similar to the southern third of Iowa as well as in the south.

White Hybrids are more difficult to produce than Yellow Hybrids. Properly isolated fields are hard to find and in this variety the male is planted ahead of the female. We guarantee shipment to be absolutely satisfactory and considering quality our price is lowest. Supply limited so please order early.

FLAT
\$9.00 BU.
ROUND
\$7.00 BU.

Berry's

Hi-Yield

HYBRID BLENDS

\$4²⁵ BU.
ROUND GRAIN
\$4⁷⁵ BU.
THICK FLAT GRAIN

When we speak of a blend we mean a combination of different varieties of Hybrids. There is a very definite reason for making these blends. Most Hybrids have a short pollinating period. If hot, dry weather happens to strike at that time considerable pollen will be killed and this will result in poorly filled ears and thus lower yields. By using two or three varieties mixed, which mature at about the same time and yet have slightly different pollinating dates, this danger is reduced. It gives greater assurance of well filled ears and bigger yields.

Low Cost Big Yields

Berry's Hi-Yield Blends are made from the varieties listed in this catalog. We make our prices low as a special inducement to get you started growing them. Cost is only about half what many companies ask for corn. More important than low cost is big return. Here are some typical customers reports, "It was the best corn I ever grew" "None of the high priced Hybrids excelled your Blend" "Your Hybrid Blend was the best corn in this community" "I want some more of your Blended Hybrids—they were as good as any" "Your Hi-Yield Blend was the best ensilage corn I ever grew. Filled a 120 ton silo from 6½ acres" Here is real value at a genuine saving in cost.

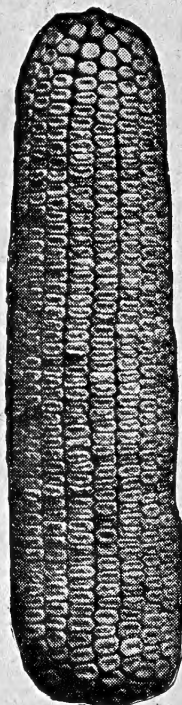

Guaranteed Quality

We guarantee that you will be completely satisfied with the shipment you will receive. The corn has been tested and will germinate 90% or better. The seed is treated to give you added assurance of good stands even under unfavorable conditions after planting. The seed both Round and Thick Flat is graded for accurate planting. After you receive your shipment you can take up to 30 days to test it for germination and do anything you wish to satisfy yourself that you have a great value. If, for any reason whatsoever, you are not thoroughly pleased, drop us a line. We will give you shipping instructions and promptly refund the money you paid—plus freight charges.

THICK FLAT GRADE

\$4.75 Per Bu.

The Thick Flat is a grade in which the kernels are too thick to make the regular flat grades, although they have about the same length or depth. This in our opinion is the sturdiest and most vigorous kind of seed available. It is graded to plant accurately when proper plates are used. We believe you will prefer this to any other grade once you find out what it can do for you.

Better Filled Ears

Improved Yields

In the average year any single Hybrid variety will pollinate very satisfactorily. It is during hot, dry spells that the blends are most outstanding. We have had reports from customers telling us that the blends or mixtures they made themselves almost doubled the yield of other single Hybrids and that they had by far the heaviest yielding fields in their neighborhood. Berry's Blends, therefore, are based on actual practical farm experience.

In making these blends we select varieties that are relatively close together in maturity as too wide a variation would result in mature and immature ears mixed in the field. Thus you can secure proper blends and secure this added assurance of big, well filled ears and bigger yields.

Our Two Most Popular Blends

110 Day. This averages around 110 days maturity. May vary from 105-115 days. This blend should be found suitable for most Corn-Belt farmers, except northern sections where early maturity corn is desirable, and the south third of the Corn-Belt.

120 Day. This blend is about 10 days later in maturing than our 110 day. It is composed of main crop varieties such as U.S. 13 and others adapted for the southern part of the Corn-Belt, such as southern Iowa, northern Missouri, south central Illinois, southern Indiana, southern Ohio etc.

Both 110 day and 120 day blends are excellent for ensilage. Order either 110 day or 120 day Hi-Yield Blends in Round grain at \$4.25 or Thick Flat at \$4.75 per bushel, to save money and still have the best in Hybrid Corn.

ROUND GRAIN

\$4.25 Per Bu.

Because of more plant food in the kernels Round Grains will often produce stronger, more vigorous plants and therefore better yields. Under cold conditions after planting, it usually shows better germination. Graded for accurate planting. If your planter does not have plates for round corn the cost of a set is more than paid for by the saving in cost. Make big savings and get fine heavy producing seed.

J. F. SINN
Chm. of Bd.
Berry Seed Company

A farmer by birth and early training. A man who has had 40 years of experience in the seed business. Recognized as one of the foremost men in the farm seed trade. He strives to give our customers better seed values.

He is always at your service and glad to help you with your seed problems.

He has something special for you on Hybrid Corn and low prices on all seeds.

SAVE MONEY on QUALITY SEEDS EVERY POUND GUARANTEED TO PLEASE

Dear Friends:

January 10, 1946.

In this my first message to you I'm proud to say that our organization in every way has spared no effort or expense in preparing ourselves to serve your interests better than ever before in 1946. We're pleased to have back with us once more many of our old employees from the armed services. Being in the armed services also I want to extend a special greeting to all ex-servicemen, whether they be old or new friends of Berry's.

Besides the fact we can save you money on all of your seed requirements we want you to know in ordering from Berry's you are placing your seed problems in the hands of those most capable of solving them to your entire satisfaction. Berry's have reached their heights of success today because of the confidence placed in us by hundreds of thousands of friends or seed buyers like yourself. Our organization is one of specialists built up to give you better service in every way. Feel free to write us at any time about anything pertaining to seeds or problems about their use. We're here to be of service to you. That's the only way we can give you real satisfaction on every order handled.

Regarding seed supplies many of our most important crops are very short again. Alfalfa and Red Clover supplies are way short of meeting all demands. Forage crops such as Sudan, Jap Millet, and Cane are also in limited supply. Also on the short side are Alsike Clover, Hubam Clover, Blue Grass, Reeds Canary Grass and Rape. Despite these shortages we've tried to anticipate your every need and accumulate ample stocks of every item on our price list pages 40-41.

Berry's Corn-Belt Alfalfa pages 36-38 and Hybrid Corn pages 2-6 are world famous. Our New Strain Brome, page 23, has also met with universal acceptance and success. This year Berry's have two new crops which we think will meet with your approval and be here to stay in years to come. Be sure to try them. They are Berry's Golden Rustproof Oats page 18, and New Sweet Sudan Grass page 10. Berry's introduce these new items to you as always at very reasonable prices.

Don't overlook Berry's extra fine values on all garden and flower seeds, especially Berry's famous "Prize" and "Lucky 7" collections page 49. On Nursery Stock we feature Evergreens pages 72-73 and small fruits and fruit trees pages 75-80 at guaranteed money saving prices.

I mentioned before we're here to serve your interests to the best possible advantage. So kindly cooperate by ordering as early as possible. Don't delay because you're not sure of some item, but order what you do know you'll need today. Thousands already have saved money and solved their 1946 seed problems by ordering from Berry's December Sale Bulletin. Some prices in the catalog have already advanced and we can protect these only as long as supplies last. Start your 1946 farm program off right by ordering your seeds of Berry's today. Yours truly,

Charles Sinn

President

Picture above gives a view of our main office, cleaning plant and storage for grass and clover seeds. The picture to the left is our corn dryer, and grading plant at Clarinda. There are several other buildings not shown.

TESTED QUALITY

Mr. L. C. Jorgenson is our analyst and has had 28 years of experience. He secured his training through U. S. Government at Washington, D. C.

The test tags attached to shipments of seed show the results of the purity and germination tests of a composite sample of the lot of seed from which shipment is made. This sample is obtained by taking small quantities of seed from different portions of the lot. These are mixed thoroughly so as to make the composite sample as representative as possible of the entire lot of seed. A portion of this sample is taken to make the purity and germination test. That is the general method of testing seed and is followed by ourselves. In most cases the analysis is our own but occasionally we use the analysis furnished by the party selling us the seed. It is our aim to attach such test tags to all shipments made. Sometimes a tag will be missed or lost from the shipment but in such case a test tag may be had upon request. Individual bags may vary from the lot test.

New Federal Seed Law

Gives Added Protection to Mail Order Buyers

A new Federal seed law requires that all seed shipments in interstate commerce be tagged in accordance with the laws of the state into which it is shipped in respect to any noxious weed seeds. In addition the purity and germination tests are to be given. Thus shipments of seed ordered by mail are required to give you truthful information and correct tests on all state and interstate shipments.

Better Service—Clarinda Shipment only—Safe Arrival

Our buying, cleaning and shipping departments have been reorganized to give quicker service. We are making all our prices f.o.b. Clarinda as there is less congestion than in Chicago. Our prices here are lower to help equalize freight charges to eastern points. During the spring season most of our seed is shipped in full carlots to different junction points. These cars move fast and the local freight trip is shortened. In this way freight moves fast and you get better service. War is over, service is bound to be better. See page 9 on how to order.

Service on Seeding Problems

Perhaps you may be undecided as to what you should sow. You may desire further information on some crops. Possibly you have a farming problem that is hard to solve. If so, write to us. We may be able to help you. Our vice president and secretary, Mr. Joe Faassen, has made quite a study of farm crops. He is always glad to help whenever he can. His services are at your disposal. Feel free to write at any time.

Cleaned Seed

The seed we sell our trade is not as it comes from the grower. It is cleaned and graded either by ourselves or direct through our buying connections. Seed cleaning and grading requires experience and equipment. Often it is necessary to run seed over different kinds of cleaners to get the desired results. Careful adjustments and expert operation are needed to do the best work. This applies also to grading for not all grades are of equal quality. The size and weight of berries as well as color enter into making grades. Our aim in cleaning or in buying cleaned seed is always to give the customer the greatest possible seed value at the price he wants to pay.

GUARANTEE

We guarantee that our prices are lowest, considering quality. If upon receipt of your order you are not entirely satisfied you can return it and your money, plus transportation charges, will be promptly refunded. Or you can keep it 60 days and have the seed tested in order to satisfy yourself that the quality is good and that you have saved money and secured a big bargain. Then if you are not pleased you can return it, and have all money, including freight paid, refunded. You must be satisfied and we guarantee to save you money.

We also guarantee to replace, free of charge, any garden or flower seed that fails to grow on account of poor germination. Our nursery stock is guaranteed to arrive in good live planting condition or it will be replaced free of charge. For garden seed guarantee see page 53—nursery stock page 75. Our guarantee protects the buyer and is lived up to, so it means just what it says.

DIRECT BUYING

The Sensible
Thing to Do

Buy Early—Get Best Selections

The seed situation in many lines is more serious than ever this year. Backward growing season and early freezes cut seed production drastically. Alfalfa, Red Clover and Alsike are all short. Forage crops have been cut. Supplies are limited. Early buyers will get the best selections and the most attractive values. Order now and have the seed on hand when you want it. If you are delayed in ordering please state if we may send you the nearest available to what you order.

BERRY'S SEED GRADES

World Brand

This is our Extra Fancy grade. It is our purest and highest testing stock. For years it has been the choice of our most exacting and critical trade. We recommend this quality to those who demand the best and invite comparisons to any highest quality grade sold by any dealer.

Dealers Fancy

A high quality. Not quite as fine as the World Brand. It is still a very desirable grade and will pass for the best in many cases.

Planet Brand

This extra choice grade satisfies many customers. Not quite so bright and uniform but they report good seeding at low cost.

Square Brand

Our lowest priced grade. Smaller berried. A little lower germination but more seeds per pound, so it can perform well.

Special Lots

Some seed does not exactly fit into a regular grade or is secured for special prices. These are listed by name such as Lot Leader Red Clover, Honest John Alfalfa, etc.

IMPROVED SERVICE

Since the end of the war and the return of key employees we are again in better shape to give our customers good service on their orders. During the past few years it has been very difficult to do this. Labor was scarce. We had many old people in our employ. Most of them did the best they could but at times that wasn't good enough.

Now we have in a large measure restored the working organization of different departments such as cleaning, buying and shipping. In so far as supplies of seed permit we are able to assure you of greatly improved service on all seed orders you send to us. Not only do we have large stocks in most items, we have the seed processed in advance and can get orders moving more promptly. Furthermore, there is not the congestion on the railroads that existed during the war. As a result shipments move to destination faster.

It is our aim to give you satisfactory seeds and service and have supplies of seeds that are very short with many dealers. Therefore, you can secure from us seeds that may not be available locally. On these short items like alfalfa it might be well to make a second or third selection and on all seeds please order early. Don't wait until the last minute rush.

Parcel Post Rates

Any package up to 70 lbs. in weight and not exceeding 100 inches in length and girth combined can be sent by parcel post. If you want anything shipped by parcel post that is not quoted postpaid be sure to remit to cover postage.

First find the zone you are in and then figure the amount of postage from the following table:

	Lb. Costs	All Additional Pounds
Zone 1	10c	1c
Zone 2	10c	1c
Zone 3	10c	2c
Zone 4	11c	3½c
Zone 5	12c	5½c
Zone 6	13c	7c

For example, a 10-lb. package to the 3rd zone costs 10c for the first pound and 2c a pound for the next nine pounds. 10 + 18 = 28c total. For short distances or for small packages parcel post is cheaper. Otherwise express. Freight, of course, is cheapest excepting on packages of 35 lbs. or less.

HOW TO ORDER

It is easy to order by mail. Use our regular order blank form if you have one. If not, you can use any kind of paper or we will send you order blanks.

Give full name and complete address. Tell where you want the seed shipped to and whether to ship by freight, express or parcel post (see to left for postage rates). Express costs quite a lot more than freight except on 35 lbs. or less. If your freight station is different from post office be sure to say so. In case there is no agent at your freight station, then include freight charges in your remittance or let us ship to the nearest station where there is an agent.

Figure up the cost of your order according to latest catalog or price list.

Some lots or grades of seed may become sold out. Whenever possible we ship exactly as ordered. Otherwise unless you specify "No substitution" on your order, we ship the next nearest grade or variety and either refund the difference in price or bill you for the difference if a higher priced lot is shipped.

Send your remittance with your order. You can send this in the form of a Postal or Express Money order, Bank draft or your own personal check on any going bank where you have funds to cover. Do not send stamps or coin when convenient to remit otherwise. We advise registering letters containing currency.

Address all mail and orders to Clarinda. We have discontinued Chicago shipment.

BUY SEED EARLY THIS YEAR

The hard early freeze caught many of the northern Sudan Grass fields that are generally left for seed. This has caused a drastic shortage in seed supplies. Sudan Grass seed supplies are the shortest in eleven years. At our present prices you will find savings up to five dollars a hundred over later quotations. Buy your Sudan seed now.

A Most Profitable Crop

This valuable, quick growing, heavy producing grass should be grown on every farm. Produces enormous hay crops. Makes fine pasture during hot summer months. If you are needing a big hay or pasture crop this year be sure to sow Sudan. It is a sure crop and easy to grow.

Description

Sudan belongs to the cane family but is finer stemmed and a free stooler. Grows 4 to 7 feet high and yields 4 to 10 tons of cured hay per acre. Livestock is very fond of Sudan. It has good feeding value. First hay crop can be cut in about 60 days after seeding and second and third crops 30 to 40 days apart.

Sudan is one of the best drought resisters known and supplies an abundance of fine pasture or hay during the hot dry months of the summer when feed is often scarce. That's why every farm should have some of it. It has been a life saver to thousands during the past few years.

How to Handle

Sudan is a warm weather crop. Do not sow until corn planting time or after. Prepare a good seed bed as you would for corn. Drill in close rows or broadcast. Cover seed about an inch deep. Sow 20 to 25 lbs. per acre. You can begin to pasture it when 6 to 8 inches high. It reaches that growth quickly for it is a very rapid growing grass. It can be pastured until frost. Many consider it best not to pasture Sudan after frost as there is some danger of prussic acid developing in the plant while it is in a dying condition. Any growth there may be at that time can be used for hay or silage. Generally makes best hay if cut when in bloom but will make good quality feed if cut either earlier or later.

A Saving Guaranteed

The true basis of value at a bargain price is the quality you receive. We will sell you this seed subject to any test you care to put it to. You can have up to 60 days to satisfy yourself that you have secured a quality lot at a bargain price. We guarantee to save you money on our Sudan Grass. If this seed fails to please you in any way let us know and prompt adjustment will be made in conformance with our guarantee.

BILLION \$ GRASS

A tall growing variety of Millet. Yields up to 26,000 to as high as 50,000 lbs. of green feed per acre have been produced under favorable moisture conditions. Seed yields of 1,000 to 2,000 lbs. per acre are reported. Does not stand heat and drouth as well as Sudan. Photo above shows yield in a dry year in southern Iowa. This crop is grown in Iowa and states to north and east including the New England states.

It is a fast growing crop making hay in 6 to 8 weeks. May be sown during May, June or July. We recommend 20 lbs. of seed per acre. Will grow up to 6 to 8 feet high on soil of good fertility and not too dry. Makes good feed for cattle and sheep. Widely used for pasture. Does not become poisonous due to drouth or frost.

Seed supplies are very short this year as much of the acreage in the largest seed producing sections was put to other crops like hemp. Therefore order Billion Dollar grass seed early.

Price 100 lbs. \$8.50; 50 lbs. \$4.30; 25 lbs. \$2.20.

Rockwell City, Iowa.

Gentlemen: I have been a customer of yours for several years. Your Red Clover seed is a wonderful producer. Your Dakota No. 12 Alfalfa, both in price and quality, has given me the best of satisfaction.

Yours respectfully,
S. G. FOWLIE.

It's New! It's Different! It's Better!

Delicious-Nutritious

Sweet Sudan

The Most Palatable, Fastest Growing, Heaviest Yielding Pasture Grass.

Cattle Love It. Make Bigger, Faster Gains at Lower Cost.

THERE IS NO OTHER CROP JUST LIKE IT

Something New is Born

Many crops are being improved and new varieties are being developed by crossing related varieties of crops. The object, of course, is to get the most desirable characteristics of each into the new line. Sometimes the results of such work are disappointing. Often there is a decided improvement. Once in a while a new and sensationally better crop is developed. Such a crop is "Sweet" Sudan.

Different and Better

Here is something so new and different and so superior to the old regular Sudan Grass that we predict it will replace it in a few years. It was made by crossing Sudan on Leoti. This Leoti is a heavy yielding, sweet juicy sorghum that has high resistance against disease and seed shattering. This new crop has the best characteristics of both parents. It grows very much like ordinary Sudan. It stools even more freely and grows taller. The leaves are a little broader. Think what that means in the way of yields.

Enormous Production

This crop is so new that widespread yield reports are not as yet available. We do know that regular Sudan will produce up to 10 tons of hay per acre. Sweet Sudan with its free stooling, taller growth and broader leaves should outyield it at least 30%. You can cut Sweet Sudan over a long period and get good hay. Even when taken for a seed crop it still makes good feed. The seed, by the way, is very easily distinguished from ordinary Sudan. This enables any farmer to tell it from Johnson Grass and thus avoid getting seed containing that noxious weed. That one reason alone makes it very desirable in southern states. The high feeding value, delicious flavor and big yields give you a combination that's hard to equal.

Palatable Fast Growing Pasture

You know that when livestock is particularly fond of a certain feed they will eat more of it and make faster and usually more economical gains. Feeding tests show without a question of a doubt that Sweet Sudan is a very delicious and palatable grass. When regular and Sweet Sudan are sown side by side in a field the cattle will eat Sweet Sudan down to the ground while they will only nip at the regular Sudan and it will be growing to a height of a foot

or more right next to Sweet Sudan. Even when planted in alternate rows the cattle will find and eat the Sweet Sudan first every time.

You can imagine what a carrying capacity a crop has that will yield over 10 tons of hay per acre. It is a warm weather crop and you should not sow it until the ground is thoroughly warm. This would be corn planting time or after. Then it sprouts rapidly and after it is up it will grow an inch or more a day. You can really put the livestock on a field of Sweet Sudan and you can pasture it just as safely as Regular Sudan (see page 10).

Provides a Long Season

Sweet Sudan is a little later in maturity. It will not mature a seed crop as fast as the regular but will maintain its high quality feeding value for hay and pasture longer because it is a little later.

Sweet Sudan grows best during hot weather and thus provides you with this palatable, juicy food when many grasses have become dormant because of the heat. There is hardly a farm but what will make more money by having some Sweet Sudan available on it for pasture or hay. If desired for seed in northern states we do not advise pasturing or taking a hay crop. Otherwise you can pasture it a while and then take a hay crop. Take two or three hay crops if you do not pasture or pasture all the time after it is 8 to 10 inches high until frost.

Seed Scarce Yet Cost Reasonable

You can get a very good stand by sowing only ten pounds per acre, which would make it cost only around \$1.80 per acre. You will, however, get a finer growth by putting on more seed per acre. Fifteen pounds is only \$2.70 an acre and that is a low seeding cost for a crop that is so new and scarce. We suggest drilling in the seed at corn planting time or after, not before. Cover seed about one inch deep. The seed we have is new crop thoroughly cleaned, high germination, guaranteed free of Johnson Grass and to be satisfactory to you in every respect. We have just one carload of this seed and we urge you to place your orders for it early even though you will not plant it till late.

Grow this new, different, better, heavy producing, sweet, juicy, palatable grass this year. Show your neighbors something superior and make bigger profits for yourself.

Price: 100 lbs., \$18.90; 50 lbs., \$9.50; 25 lbs., \$4.80. Small Lots Postpaid. 1 lb., 50c; 5 lbs., \$2.00.

MARKET ADVANCING—SUPPLY LIMITED—ORDER NOW!

ATLAS SORGO

\$4.85
 100 LBS. \$9.50
 25 LBS. \$2.50
 NOT SHIPPED IN-OUT
 THAN TEL.

THE HEAVIEST PRODUCING SWEET SORGO

This is one of the most sensational forage crops ever developed. An enormous producer. Yielded up to 18.7 tons per acre where corn yielded half as much. In dry seasons out produced corn 3 to 1. Nebraska and other states report it the heaviest forage producer.

A matchless drought resister. Corn if it is severely injured by drought will stop growing. Atlas will start again. In sections where drought completely dried up corn, Atlas remained green. Where grasshoppers almost completely wiped out a corn field an adjoining field of Sorgo was practically untouched.

Atlas makes a highly palatable and very nutritious feed. The juice is sweet and live stock, especially cattle, will leave most any kind of feed to get it. They thrive on it. In dry seasons farmers have brought their livestock through with nothing but this feed and had them fat and sleek in the spring. Makes wonderful ensilage.

State Certified or Grown from Certified Seed

There are many varieties of sweet sorgo but we consider Atlas the most profitable to grow. Compare the growth of Atlas with Hegari as shown in the pictures on this page. All pictures were taken near Clarinda on the same day. The Hegari was on second bottom the Atlas on upland. Why grow a crop that grows 5 to 6 feet when you can get 10 to 12 feet. Atlas makes a leafy, sturdy growth. Very resistant against lodging. The white seed is very palatable.

The State Certified seed is priced above. The seed grown from Certified seed is \$1.00 per bushel cheaper. See page 41. Both are high quality lots. Shipment guaranteed entirely satisfactory.

Atlas must have a warm seed bed. Drill it in with seeds 4 to 6 inches apart, 8 to 12 lbs. per acre are used for single row planting. Cut in fall a little before severe frost. Shock to cure.

HEGARI - 6 Foot

ATLAS - 12 Foot

NORKAN "New Early Atlas"

Excellent for Grain or Fodder

Norkan is really a cross between Atlas and Early Sumac cane yet it bears a close resemblance to Atlas and one authority says it may be described best as an Early Atlas. It has the earliness and tonnage of Early Sumac and the palatable white grain of Atlas. The plants are medium early and medium tall, sweet and juicy. Makes a good forage variety especially for sections further north. Since the grain matures earlier it is ready for ensilage or forage quicker. This is very desirable as the best silage is secured if cut when seeds are in the hard dough stage.

Norkan is not quite as tall as Atlas but will grow 8 to 10 ft. tall depending upon location and soil. It is heavily leaved and being somewhat finer stemmed it is easier to handle.

Atlas Growers Switching to Norkan

The grain yield of Norkan is fully equal to Atlas Sorgo in grain production. Tests at Lincoln, Nebraska, show Norkan superior in yield of grain producing 55.8 bushel per acre. The reason many Atlas growers are switching to Norkan is that it is two weeks earlier and they have therefore greater assurance of getting a crop of mature seed. As mentioned above the earlier maturity of grain is of added value when the crop is wanted for forage or ensilage as more mature grain improves the quality and raises the feeding value. One of the biggest Atlas growers in Nebraska said he was going for Norkan from here on because it was earlier and easier to handle.

Suitable to a Wide Area

Many of our customers live east and north of the regular grain and forage sorghum section yet find big profits in growing these crops such as Atlas and Hegari. If you live north of the Missouri line and east of Lincoln, Nebraska, we strongly urge you to grow some Norkan. Farther south the Atlas may have some superiority because of its somewhat taller growth. For these other areas we advise Norkan because it is so much earlier, more certain to mature grain and still very satisfactory in fodder growth. Even if you are located quite far north or in sections requiring very early maturity Norkan should make excellent silage and forage. Livestock is very fond of this juicy sweet stemmed feed both in green and dry stages. Its heavy yields will give you a lot of food per acre. It is a big money crop yet economical to plant. Plant as suggested for Atlas. Regular corn-rows 10 to 12 lbs. per acre. Double row 20 to 25 lbs.

REED CANARY GRASS

**BIG
YIELDER
RICH
FEEDING
VALUES**

**\$54⁰⁰
PER 100 LBS**

**GROWS
ON VERY
WET LAND
GREAT
DROUGHT
RESISTER**

A Remarkable Permanent Grass of Great Value

Here is a crop that can really "go to town." It's a remarkable crop in many ways and in a class by itself. It grows on extremely wet land, stands a lot of overflow yet withstands drought amazingly well. You should have seen it at the Iowa Experiment Station on upland one dry year. It stood out like an oasis on a desert. Farmers who came to look at the experimental field would spot it as soon as they entered the field. The Reed Canary Grass yielded 3 tons per acre when it was so dry Sudan made only half a crop. Produces 2 to 3 cuttings a year. No wonder farmers were enthused about it. You would be, too, if you had such a crop on your farm.

Grows 5 to 6 ft. High

You almost have to see it grow to appreciate the value of this crop. It is a very leafy grass. And how it can yield. Up to 3 to 5 tons of cured hay per acre from two cuttings. The second crop is even leafier than the first although not as tall. You ought to hear farmers bragging about its feeding quality. We do not consider it equal to alfalfa in feeding value, but some growers claim it is. They report increased milk flow on Reed Canary Grass. Tests show 9.43% protein in first cutting and 11.76% in second cutting. They like it for pasture. They like it for hay and many make good money out of the seed crop.

Grows from Early Spring Until Late Fall

Lots of times you can hardly wait for spring to come and give you pasture. Reed Canary grass starts on the job real early in the spring and keeps at it until late in

the fall. It is well adapted to pasturing after a good sod has been formed. And what a sod it makes especially on wet land.

Reed Canary grown on land so wet cattle would bog down in it, made a sod so strong it would support a team and wagon.

It is a perennial grass with a long life. In Minnesota a field was used for hay crops for 15 years and then 18 years as a pasture. A government report from the Pacific Coast showed it pastured four dairy cows per acre for seven months of the year.

Widely Adapted

You may ask, "Can I grow Reed Canary Grass?" This grass is adapted to all states from the Atlantic to the Pacific in the entire northern half of the country and as far south as into eastern Tennessee. If you have any low wet land there isn't a better grass you can grow. It will change acres that are worthless into valuable acres—real money makers. But it isn't limited to wet land as the Iowa Experiment Station has shown. It has been a real money maker. Use it for hay, pasture and seed production.

You can get all three in one year. First a seed crop. See below. Immediately after a hay crop and then pasture or hay. Sometimes a third cutting. The water table can be practically at the surface yet Reed Canary grass flourishes and it stands a lot of overflow. Again we would repeat that it also shows marked drought resistance. At the Urbana, Illinois Experiment Station for two years it averaged 5 tons of air dry hay per acre a year.

Postpaid: 1 lb., 80c; 5 lbs., \$3.50; 10 lbs., \$6.50.
Not prepaid: 25 lbs., \$13.60; 50 lbs., \$27.10.

How to Grow Reed Canary

It should have a relatively cool season for starting. Both fall and early spring seeding are widely practiced. Use 6 to 8 pounds per acre. Sometimes it is sown late in the fall so the seed will not germinate until the following spring. Be sure to prepare a good seed bed. Make it fine, smooth and get it well packed. Fall plowing is desirable although spring plowing can be worked into a good seed bed. Late fall seeding may be necessary on some poorly drained soils.

Sometimes the seed is sown during thawing weather in the spring. We suggest a light covering and packing it with a roller. About 1/4 to 1/2 inch is plenty of covering. If weeds get bothersome clip them back. Seedlings are as hardy as those of Timothy and will stand considerable freezing. The growth is not fast the first year. Second and following years give full and rapid growth.

Profitable Crop

Gordon Aebischer of Chilton, Wisconsin, says, "Hay yields run 1 to 3 loads per acre per cutting." Ordinarily 4 tons per acre in two cuttings. Seed yields range up to 450 pounds per acre. First seeding was in 1931. Have added more since and never had to reseed. Some of the seedling growing it is subland growing for as long as six months at a time.

Report from South

Frank Litchske near Enid, Oklahoma, sowed Reed Canary Grass in the fall four years ago. It has been growing continually since. He grazed 20 head of Hereford cattle on 4 acres for 60 days continually and there was still plenty left. He said it still makes good hay and checks soil erosion effectively in that wheat country.

Money in Seed Crop

Reed Canary Grass will produce 100 to 400 pounds or more of seed per acre. Even if the seed should get as low as 10c per pound that produces a nice extra cash income per acre. You don't have to sacrifice a hay crop for it. Good hay is obtained if cut immediately after seed harvest. It is a profitable crop as hay or pasture even if no seed is saved.

High Points in Canary Grass

Grows on very wet land. Withstands drought. Value of seed crop may run as high as \$90.00 per acre basis 20c price. Gives two to three cuttings per acre. Yields up to 4 and 5 tons per acre. Makes fine pasture. A seeding lasts many years. Comes on early in the spring and grows until late in the fall. Adapted to a wide area. It is a money making crop.

SOY BEANS

A Fine Cash Crop

The value of Soybeans is by now so generally known that it is hardly necessary to describe that. Most Beans are now grown for the crop of mature beans and it is a question which variety will bring the biggest yields. It should not be overlooked, however, that soybeans are also a very valuable hay crop. They are practically equal to alfalfa hay in feeding value. No need to be without plenty of rich hay. If your clover or alfalfa fails sow soybeans. They stand heat and drought and deliver the goods.

Variety to Select

There are hundreds of varieties of Soybeans. Many claims are made, some of which are very extravagant. There is no need to confuse yourself in trying to learn about every kind. We sell only those which have proven themselves sound and dependable. You cannot go wrong with any of the varieties described on this page. If you live under conditions such as may prevail from central Iowa on south through Missouri the Lincoln is your best selection unless you want a strictly haybean. Then choose Virginia or Kingwa.

We clean our beans carefully and test every lot for germination. Such beans are more economical than stock containing a lot of splits. Send us your order for beans. Your money back if you are not completely satisfied with your shipment. See guarantee, Page 8.

How to Handle Soy Beans

Plant when weather and soil is warm, corn planting time or later. Prepare a fine clean seed bed. For hay broadcast or drill in close rows $1\frac{1}{2}$ to 2 bushels per acre. For seed in 18 to 20 inches apart 30 to 40 lbs. per acre. Cultivate with a harrow while beans are small and dry. Cut for hay when beans are fairly well formed, but before leaves fall. Harvest for seed when beans are practically ripe.

Inoculate Your Seed

Inoculate Soybean and Cowpea seed. That helps to secure a more vigorous growth, heavier yields and higher value. Cost is low. Easy to apply. Full directions furnished.

Postpaid Price Berry's Nodule Germ Inoculator for Soy Beans: 2 bu. size, 30c; 5 bu. size, 45c; 25 bu. size, \$1.95; carton six 5 bu., \$2.60. Also see page 41.

Other Types of Soy Beans

Richland. A fine early yellow bean with high oil content. Averaged 30 bushels per acre in 4 years central Iowa test. About 7 days earlier than Illini. Not quite as early as Earlyana. Straw very strong. Will stand up on richest ground. Somewhat shorter than average on thin land. Adapted to southern Minnesota, Wisconsin, Northern and Central Iowa and sections having similar conditions. Good for late planting farther south.

Mukden. A little later than Richland and a little earlier than Lincoln. An excellent bean for sections similar to north central and central Iowa. Very popular in southern Iowa because they can be harvested fairly early, and are very heavy yielders. High quality yellow bean with a very strong straw.

Kingwa Type. A Black Soybean of outstanding merit and quality. According to all customers' reports it is greatly preferred to Wilson Black or Black Ebony both for hay and seed production. Especially valuable as a hay variety. Heavy producer and excellent quality hay.

Virginia Type. Hay bean. Makes large growth with enormous yields of hay. One of the best for poor land. Seed brownish and smaller than the average. Requires less seed per acre. Prices on Pages 40-41.

CERTIFIED

EARLYANA

EXTRA EARLY HIGHEST QUALITY

This variety is in our opinion the very best of the early soybeans. In yield it is very close to later maturing varieties like Illini yet matures 10 to 12 days earlier. It is 4 to 7 days earlier than Richland and will do well on much thinner land. The straw of Earlyana is taller and that is a distinct advantage excepting on rich land. The lower branches and pods are well off the ground which reduces harvesting loss. The pods run 2 to 4 beans with an average of about 3 per pod. On a moisture free basis the beans average 20% oil of a high drying quality. Protein 43 to 45%.

The Earlyana is more lodge resistant than Illini, not quite as strong as Richland. They are not only adapted to a wide range of soils but to a large range of climate. They are fine for southern Minnesota, Wisconsin, Michigan, Northern and Central Iowa and all sections having similar conditions. This takes in large portions of Illinois, Indiana, Ohio, New York, Pennsylvania and West Virginia. It makes a good bean for late planting farther south and where it is desired to get the land cleared early for winter wheat. For a heavy yielding, early maturing high quality soybean we know of none to equal Earlyana.

Price \$3.75 bu., 60 lbs.; 10 bu., \$3.70; 25 bu., \$3.65.

FIELD PEAS

For early hay or green feed nothing equals Field Peas. Can be sown as early as land can be worked. Disc or harrow in 1 to $1\frac{1}{4}$ bushels Peas with 2 bushels Oats. Cut for hay when oats are in the dough stage. Production is very heavy and feeding value very high. Also fine to plow under for soil enrichment. Crop very fattening. Increases milk production. Excellent for hogs. Solves the problem for early green feed as no other early crop can do. Inoculate Field Peas. Shipment is guaranteed to please you in every way. Crop limited but our prices low. If you are going to be short on feed next spring we recommend this crop very highly.

Price \$5.50 bu., 60 lbs.

Edwardsville, Ill.

Dear Sirs: I have bought seed from you for several years. I find them to be O. K. in every way. The quality and the germination is very satisfactory. Your seeds produce results. Also your prices are real money-saving quotations. I am well pleased.

Yours truly,

H. C. STRASEN.

NEW SOY BEANS

The Sensational LINCOLN

Lincoln

The tests below is a summary of the yields obtained from Lincoln compared with the average of Illini and Dunfield tests in Iowa, Illinois, Ohio, Indiana, Missouri, Wisconsin, Michigan and Virginia. We consider it too late for normal planting in northern states. It is the ideal bean for sections having conditions similar to the southern two thirds of Iowa and the northern half of Missouri. This takes in practically all of the corn-belt. Lincolns will make you more money. Be sure to grow them this year.

	Average Yield Per Acre -						
	1938	1939	1940	1941	1942	1943	Average
Lincoln	39.7	41.5	28.2	29.5	37.8	31.3	32.9
Illini	33.9	34.6	25.3	25.4	29.7	28.2	28.0
Dunfield	27.3	32.2	23.4	24.3	27.5	27.5	27.4
Increase	9.1	8.1	3.8	4.6	7.7	3.5	5.2

You not only get more beans from Lincoln but better beans, because they contain more oil and the oil is of better quality. An increase of 18.6% over a five-year period in widely scattered sections prove unquestionably the great superiority and wide adaptability of Lincoln. When planted real early they are good north of the territory suggested and can go well into the south for late planting.

Never in all our seed experience have we ever seen any kind of a variety of seed become so popular so quickly. The reasons are clear. Larger yields of higher quality beans. We can ship direct from Illinois point to save your freight.

20% to 30% Bigger Yields

Lincolns have shown an average increase in yield over Illini and Dunfield of 20% to 30% and they have the highest oil content of any bean tested to date. The quality of this oil is extra good as it has a very high iodine member which shows its drying quality.

This in a nutshell is the reason why Lincoln have leaped into popular favor overnight. Every experiment station report we have seen praises them. Every farmer who has seen them growing wants Lincolns.

Experiment Station Reports

An Iowa station reports in this way,—The Lincoln has showed its heels in yielding ability to any other bean with which it has been compared in the past five years, in northern central and southern Iowa tests. Ohio says it should replace all other Yellow Beans.

An average of 1940-1943 tests at Indiana show:

Dunfield 34.0 bu., Illini 37.3, Lincoln 45.9

This means 10.2 bu. more per acre than the average of the other two. This is 30% larger yield than Dunfield. The oil content of Lincoln was higher and quality superior.

It matured 2 to 4 days earlier than Illini.

An average of 61 tests over a five year period in Ohio, Indiana, Illinois and Nebraska showed Lincoln outyielded an average of Illini and Dunfield 6.1 bu. per acre or 22%. The Lincolns are stronger strawed than either of these. When stands are thin they branch out considerably. Prices. Certified and non-Certified page 41. Write for quantity prices F.O.B. Illinois point or delivered.

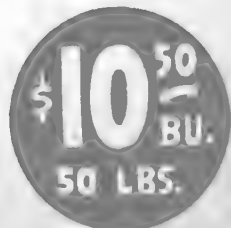

Dwarf Essex Rape for High Protein Pasture

This is a crop of such great value that we want to emphasize its money making features. There is other information on Rape on page 16. There have been many tests made on the feeding value of Rape. Extensive Iowa tests show that good Rape pasture is equal or superior to Alfalfa for hogs. It made gains just as fast and required less corn and less tankage per hundred pounds of grain.

Most farmers know Alfalfa is one of the best hog pastures known. But everyone doesn't have alfalfa to pasture. You can get equal or better

results from Rape pasture and it is just as good for sheep. Get faster gains at lower cost. Can be sown from early spring until in July and if moisture conditions are favorable grows until after heavy freezes in late fall. The cost is low. Requires only 6 lbs. of seed per acre. If you don't have plenty of high protein pasture like clovers or alfalfa sow Rape for quick heavy yielding crops. Be sure to read page 16.

CROPS of SPECIAL VALUE MILLETS

GERMAN OR GOLDEN

This is that beautiful, heavy growing variety that makes such wonderful production. Its leafy growth is 4 to 5 feet tall. Yields up to 4 to 5 tons per acre and seed yields of 40 to 50 bushels. The feeding value is fine. It is one of the most popular varieties of millets and very widely grown.

This crop can be sown any time after corn planting until the latter part of July. Sow 40 to 50 lbs. per acre for hay production; 25 to 30 lbs. per acre for a seed crop. Our seed is secured from good sources and we guarantee shipment to please you. \$3.25 bu., 50 lbs. See page 41.

WHITE WONDER

This runs our Golden Millet a close second in popularity. Many think it is better. It has a dense foliage and broad leaves. A wonder for production. Matures early in spite of its big size. It has long heavy seed heads and is a good seed producer. Color of seed is white. Makes excellent hay if cut when seed heads are forming.

Millets make an excellent "catch crop" or to give an extra crop after an early maturing one has been taken from the land. \$3.25 bu., 50 lbs. See page 41.

SIBERIAN OR EARLY RUSSIAN TYPE

Two to three weeks earlier than German, but does not yield as much. Hay is of very fine quality. Grows 2 to 4 feet. Sow 35 to 50 lbs. per acre. \$2.60 bu.

PROSO OR HOG MILLET

Also Known as Broom Corn Millet and Russian Wheat.

This Millet is grown almost exclusively for seed. A very prolific producer. Seeds are larger than other millets. Makes fine feed. It is used in some countries for human food. Equal to Barley in feeding value. Makes extra fine poultry feed.

Proso is a heavy seed producer, yielding up to 60 to 70 bushel per acre. It matures in sixty to seventy days. Makes a good cash crop. Needs warm weather and soil for quick germination. Sow 40 to 50 lbs. per acre. Drill in close rows or broadcast.

The demand for this seed has increased very rapidly in the past few years. Order as early as possible. \$2.25 per bu., 50 lbs.

DWARF ESSEX RAPE

**Reduces Pork Production Costs
Enormous Producer—Grows Quick**

See Page 41 for Prices

One of the greatest of all quick growing forage pasture crops for the corn-belt. Can be pastured within six to eight weeks after seeding. May be sown from early spring until mid-summer. Equal to alfalfa in feeding value for hogs and sheep and also good for calves, cattle and horses. Cuts down on amount of grain required and gets hogs ready for market quicker. In tests at the Iowa Experiment Station Rape pasture cut down more on grain consumption and tankage than Alfalfa and carried more head per acre.

Rape under favorable conditions yields 40 tons or 80,000 lbs. of green matter per acre. On a dry basis it analyzes as high as 37% protein. It is also high in calcium and phosphorus. Superior to alfalfa and clover as a corn balancer. Endures trampling and grazing if not eaten too close to the ground. Provides pasture from early spring until the ground freezes in November.

Sow alone in spring or with oats and pasture when oats are removed. Also good to sow in corn at last cultivation. Use 5 to 6 lbs. of seed per acre. Grows on many soils. Does best on fertile well drained loams. Not so well adapted to sandy or stiff clay soils.

Our seed is produced from Genuine Dwarf Essex seed stock and guaranteed the finest obtainable in the U. S. Rape seed is a very short crop this year. 25 lbs., \$5.40; 50 lbs., \$10.50; 100 lbs., \$21.00. Postpaid 1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00.

BERRY'S ANNUAL PORK PRODUCER

A rapid growing mixture of legumes, forage and grass crops. Makes a wonderful pasture. Can be used a few weeks after seeding. Very productive. High in protein. Builds big body frames, reduces grain consumption. Makes hogs of marketable size in quicker time. Contains Vetch, Rape, Rye, Barley, Oats, Wheat, etc. Sow 40 to 50 lbs. per acre early in spring. This is a great pasture combination at low cost. 25 lbs., \$1.60; 50 lbs., \$3.10; 100 lbs., \$6.00.

VETCHES

SPRING VETCH

Spring. An annual variety having much the same characteristics as peas. Does well wherever Canada Field Peas are grown. Requires cool growing season. Should be sown early, using 50 lbs. per acre. Grows 3 to 5 feet high. Is quite finely stemmed. Generally sown with a bushel or two of oats and the two cut together for hay. Grows rapidly, yields heavily. Excellent feeding value; high in protein. Produces a wonderful early hay crop. Makes best hay if cut when in full bloom. Does not live over winter.

You will find Spring Vetch with oats an exceptionally fine combination for early hay or green feed. \$5.50 bu., 50 lbs. See page 41.

WINTER OR HAIRY VETCH

This is a very hardy plant. Seed is smaller than Spring Vetch. Twenty pounds per acre is plenty to sow. Can be sown in spring or fall. Spring seeding common in northern states. Fall seeding alone or with winter wheat or rye. A great Nitrogen gathering plant. Grows on poor land without lime. Helps build up soil fertility. Makes fine high protein hay. Spring or early fall seedings generally provide fall pasture. Remains green late in fall. Starts very early in spring. Get started with Vetch and grow a crop of great value and especially so on poorer soils. Inoculate all Vetch seed. 25 lbs., \$4.60; 50 lbs., \$9.10; 100 lbs., \$18.00.

CANE

A Leading Forage Crop

A crop that is rich in sugar and fat and very palatable. An enormous yielder producing from 10 to 15 tons of excellent green feed on rich land. A most remarkable drought resister. Especially valuable in dry hot seasons. Makes a wonderful hay crop when sown at the rate of 75 to 100 lbs. per acre.

Some farmers get cash out of their ordinary hay crops and use cane for their own feed supply. A few acres of cane will make as much hay as many acres of Timothy. Your live stock will relish cane hay and fatten on it. You can also pasture cane or cut it for green feed. Makes excellent summer and early fall feed. It is also used for ensilage. Cane is also a good seed producer, yielding 30 to as high as 60 bushels per acre.

How to Handle

Sow quite heavily for hay or pasture, 75 to 100 lbs. per acre. Heavy seeding makes a finer growth and therefore easier to cure. Do not sow until corn planting time or after. It is a warm weather crop. Drill in close rows, or broadcast. Cover about an inch. Can be cut and cured like ordinary hay. Takes a little longer to cure than ordinary grass hay.

Early Amber Type. The kind most generally grown and of great value because of its splendid growing qualities. \$4.10 bu., 50 lbs.

Early Orange Type. Heavier stalks, more abundant leaves. Head more compact. Heavier yielder but a little coarser. \$4.10 bu., 50 lbs. See page 41.

CANE for MOLASSES

To make good sorghum, seed must be pure and we take care in getting this seed direct from sorghum producers. We do not guarantee the crop, but we consider our seed equal to if not superior to any on the market.

Red or Orange Type. Secured by us for Molasses purposes from local growers who make sorghum. We know this sorghum or molasses is of excellent quality both as to color and flavor and we believe you will be highly pleased with it. It is juicy and is the choice of most sorghum makers in this section.

Price, 1 lb., 30c; 5 lbs., \$1.00, postpaid. Not prepaid, 5 lbs., 75c; 10 lbs. or more, 12c per lb.; 50 lbs. or more, 10c per lb.

KALO

This is Early Kalo. A drought resistant grain sorghum. Heavy in production. Becoming very popular in sections outside regular grain sorghum section because of its fine quality and wide adaptability. \$2.75 bu., 50 lbs. See page 41.

BERRY'S Special GRAIN and HAY CROPS

KAFFIR CORN

Our Kaffir type grain sorghum is used to some extent for hay. Stalks less juicy than cane and not sweet. Stands lots of hot dry weather. Makes fine poultry feed and suitable for all kinds of live stock when ground. Produces up to 40 to 50 bushels of seed per acre. For grain drill in rows 30 to 40 inches apart using 6 to 8 lbs. of seed per acre. For hay drill close or broadcast 75 to 100 lbs. Cut off heads, cure 10 days to 2 weeks, then thresh. The use of Kaffir corn is on the increase. While it has always been a main crop in sections subject to drought, farmers in the regular corn-belt are planting at least small acreages. They like it especially well for winter poultry feed. You can produce a lot of feed on a few acres and the seed cost is low.

\$2.60 bu., 56 lbs. See page 41. Postpaid: 1 lb., 20c; 5 lbs., 75c.

HEGARI

Our Hegari Type sweet sorghum is somewhat similar to Atlas (page 11), but does not grow as tall. Very nutritious. Valuable for grain, dry fodder, ensilage and pasture. Yields up to 5,000 lbs. of grain per acre and up to 18 tons of ensilage. Live stock especially cattle are very fond of it due to its sweet taste. It combines the grain production of Kaffir and Milo with the high forage value of cane. For grain production drill like Kaffir 6 to 8 lbs. per acre. May be double rowed using double the amount of seed. For hay drill in close rows at 75 to 90 lbs. per acre. \$3.10 bu., 50 lbs. See page 41. Postpaid 5 lbs. for 75c.

BUCKWHEAT

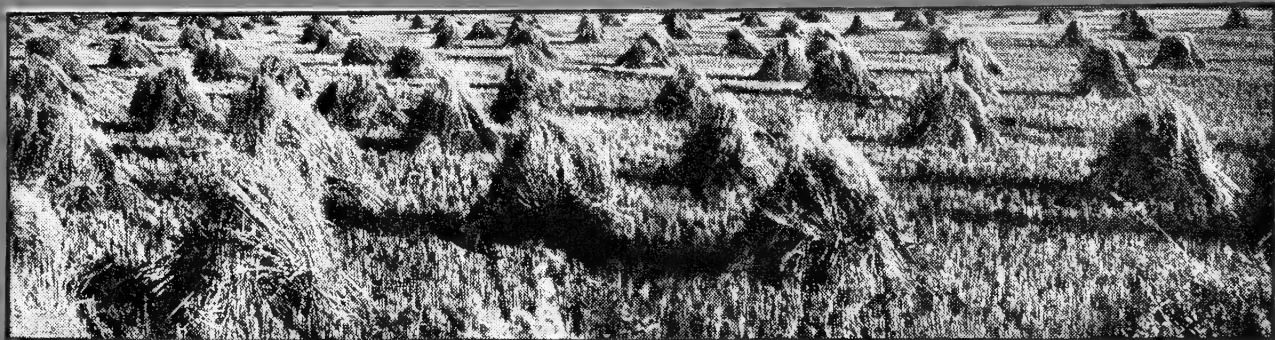

A quick growing grain crop. Matures in 10 to 12 weeks. Excellent catch crop. Sometimes sown after small grain so as to get two crops from the land. Good cover crop for orchards. Makes land mellow. Good for bee pasture.

One of the best crops for very poor soils. Responds to increased fertility. Does not like lime and should not be sown on very wet land. Can be grown most anywhere north of the cotton belt. Prefers cool weather, especially at blooming time, but is sensitive to frost. Prepare a good seed bed. Sow 3 to 4 pecks per acre. Yields up to 50 bu. per acre depending on conditions. \$2.50 bu., 48 lbs. See page 41. Postpaid, 1 lb. 20c; 5 lbs., 75c.

MILO MAIZE

Our Milo Maize type grain sorghum is similar to Kaffir. The stalks, somewhat more pithy, are considered one of the best drought resisters. The grain makes fine feed. White in color. Follow suggestions given for Kaffir in planting. Milo is a good yielder. Widely used for Chicken feed. It is grown in place of corn in sections of extreme drought. Farmers who have grown these grain sorghums generally want at least a few acres. \$2.60 bu., 56 lbs. See page 41. Postpaid 1 lb. 20c; 5 lbs. 75c.

Berry's GOLDEN Rust Proof SEED OATS

DISEASE RESISTANCE

There are two types of rust that can play havoc with yields namely crown rust (leaf rust) and Stem Rust. This variety is highly resistant to both kinds. In the opposite column we gave you a comparison of increased yields. That was comparing it with one of the better varieties. In bad rust years Berry's Golden Rust Proof may outyield ordinary oats $2\frac{1}{2}$ to 1.

Loose and covered smut are other diseases that reduce yields and lower quality of grain. Our Rust Proof are resistant to both. Therefore, you get resistance in four of the major oat diseases; two kinds of rust and two kinds of smut. You get an assurance of big heavy yields and a finer quality of heavy meaty kernels. Fine for feed or oat meal. You should be able to sell your crop for seed.

ADAPTABILITY

Early and Strong Strawed

Berry's Golden Rust Proof oats mature early which helps avoid losses from hot weather. That is a big factor in many years. The straw is not coarse yet very stiff. Resists lodging remarkably well. Weak strawed oats go down so you lose part of the crop. Since the straw is not coarse and not too tall (about 33 to 36 inches) it makes an ideal nurse crop. Some oats through lodging or heavy growth smother out clover sown with it or keeps the clover too tender and it dies out later.

Berry's Golden Rust Proof has everything. Big yields, Fine Quality, Disease Resistance, Strong Straw, Early Maturity. Be sure to grow some at our special low introductory prices at right.

SENSATIONAL YIELDER

An Oat Worthy of a Good Name

A number of years ago we sold a very outstanding oat under the name of Berry's Golden Rust Proof. That was before the days of the hybridized oats. Since then the name was dropped. Now we again have a variety that is worthy of the name Berry's Golden Rust Proof. It is a greatly superior variety. This is as sensational an improvement over the old oats as Hybrid Corn, Pawnee Wheat or Lincoln Soybeans. No matter what kind of oats you may have grown in the past you should make sure to sow Berry's Golden Rust Proof this year.

115.5 Bushel per Acre

This crossed or Hybridized Oat has made yields of 115.5 bushels per acre of good dry oats having a test weight of 36.1 lbs. per bushel. We have had them run in excess of 39 lbs. per bushel. They have outyielded other hybridized oats like Vicland, Boone, Control, etc. and had better weight per bushel. Oat yields and quality will of course, vary according to soil and season. It is in unfavorable seasons that it shows exceptional superiority over the old type oats. See opposite column for information on disease resistance.

Best Under Unfavorable Conditions

There are years when cool nights and heavy dews followed by hot sunshine during the day cause a lot of rust trouble. That breaks down straw and lowers yields. In a poor oat year Berry's Golden Rust Proof will show its greatest superiority. In one year this crossed oat showed 15.5% increase over the best of the old varieties and the next year it showed 43.6% increase. That was a bad rust year. In a poor oat year prices are higher and it pays to sow a variety that will give you bigger yields when they count the most.

HIGH QUALITY SEED STOCKS

We have a good stock of these oats, nice plump heavy seed thoroughly recleaned. The supply, however, is limited so we urge you to order now and get started with Berry's Golden Rust Proof this year. Be the first to introduce them in your neighborhood. They will all want seed after seeing your yield at threshing time. We have made special introductory prices for early orders or while supply lasts, limit 25 bushels per customer: Less than 10 bushels \$1.85 bushel; 10-24 bushel \$1.90; 25 bushel \$1.85 F. O. B. Clarinda, bags free.

SENSATIONAL CEDAR

A GREAT DISEASE RESISTER

A Most Outstanding New Variety

This heavy-yielding, early-maturing, disease-resisting oat was not released until 1943 and the farmers in the territory where it was released think there is nothing else like it. Last year we received scores of letters from farmers asking: "Can't you get me some Cedar Oats." It's no use talking Tama, Vicland or Boone to these farmers. They Want Cedars and they don't mean maybe. Now we have them—Fine, Beautiful, Heavy, recleaned, high germinating, State Certified seed.

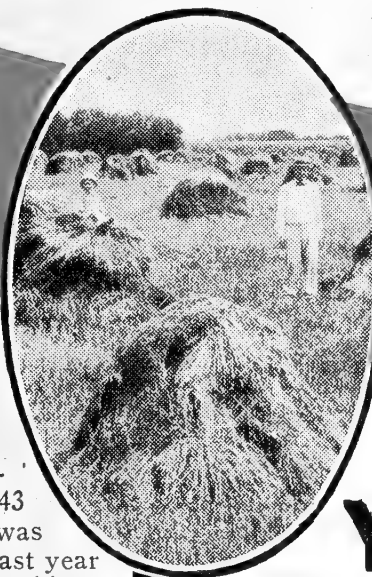

These oats have come from the same section that developed the famous Pawnee winter wheat that has produced such sensational yields the past few years and is rapidly replacing other wheat. Cedar Oats are developed by the Nebraska Experiment Station in cooperation with U. S. Dept. of Agriculture and the Iowa Station. It is a crossed or hybridized variety.

Heavy Yielding—High Quality

Farmers who have seen these oats growing have been impressed by their fine quality as well as heavy yields. The test weight is higher than that of other standard varieties. The maturity is quite early. The straw is stiff and they stand up very well. In the average of 7 years testing at Lincoln it exceeded all standard varieties by as much as 34 percent. In unfavorable seasons the superiority of Cedars is even more pronounced. The great demand that has come for Cedar Oats is due purely and simply to their performance. They haven't been widely advertised but farmers who have seen them growing say there is no other oat to equal it.

Disease Resistance

Cedars are resistant to most races of stem rust, crown rust and smut. This gives better crop insurance in seasons when weather is unfavorable. You can expect those oats to be superior to standard varieties in all years and especially so in poor oat years. We have only a limited supply of these State Certified Cedars so please order promptly. 1-9 bu., \$1.85; 10-24 bu., \$1.80; 25 bu. or over \$1.75 F.O.B. Clarinda, bags free.

**NEW
SEED
OATS**

**HEAVY
YIELDING
TAMA**

This is perhaps the best known of the hybridized oats. It is widely adapted and is a very good selection for any part of the spring oat territory. The Tama gives early maturity, strong straw that seldom lodges, disease resistance, plump, heavy grains and big yields. By making a cross between Victoria and Richland an oat has been obtained that carries the best characteristics of both parents. Hybridized oats are different from Hybrid corn. They do not run out. You can get maximum results for many years once you start with quality seed.

These Tama Oats are resistant to rust and smut. They stand up under adverse conditions and deliver fine yields. You can be definitely assured of getting a superior oat when you order Tamas. We will have both Certified and non-Certified seed. Both will be of high germination, well recleaned as low as \$1.35 per bushel. See page 41. Certified Tama and Certified Vicland Oats can be shipped from Illinois to save on freight for Eastern customers.

Many oats are not good this year. Play Safe. We guarantee satisfactory seed on every shipment.

VICLAND BOONE

This oat is a selection from the same cross that made Tama and Boone. It was originally produced in Wisconsin. Some claim a little heavier yield and a little earlier maturity for Viclands. They have made yields of 100 bushel per acre. According to our observation there is very little if any difference between Viclands and Tama. It has the same early maturity, strong straw and disease resistance. The grain is of fine quality. Our seed is northern grown and State Certified. 1-9 Bu., \$1.80; 10-24 Bu., \$1.75; 25 Bu., \$1.70. F.O.B. shipping point; bags free. Order early. Supply limited.

Boone and Control were the first of the "Crossed" oats to be released by experiment stations. Overnight, as it were, they became a sensation and they are just as good today as the first year they were offered. The Boone and Control are identical as far as we can tell. We list them under the name "Boone." They have the same parentage as Tama and Vicland.

Boones give you resistance against lodging, rust and smut. You get early maturity, big yields and fine quality oats. Our seed is grown from certified seed and equal to certified stocks in every way. 1-9 bu., \$1.35; 10-24 bu., \$1.30; 25 bu. or over \$1.25 F.O.B. Clarinda, bags free.

See page 41 for further prices on Oats. Write for special prices on large quantities.

SPELTZ

ALSO CALLED EMMER

NORTHERN GROWN

Great Drouth Resister. Practically Rust and Smut Proof. A Good Producer. Dandy Feeding Grain

This grain is one of the oldest grains known to mankind. It was apparently grown in prehistoric times. German-Russian immigrants introduced it to the United States.

It is a remarkable spring grain crop. Really a type of wheat. Shucks cling to the grain. Generally two grains in a shuck and somewhat softer than wheat. Makes a nutritious feed. The kernels with the hulls removed have about the same composition as wheat. Best as ground feed. Highly resistant against rust and seldom injured by smut. Also an excellent drought resistant grain. A good producer and under drought or rust conditions it is especially a desirable crop. Matures early. Makes a good nurse crop. Grown from Canada to Texas. Iowa, Minnesota, Wisconsin, Michigan and other states are growing it as well as Western States where drought conditions generally prevail.

Grow some speltz this year and show your neighbors what this drought and disease resistant grain can do. Sow in the spring. It is an ideal nurse crop. Sow $2\frac{1}{2}$ bu. per acre. Set drill for oats. Sow early as possible. Cut before dead ripe. Thrash as for oats but not too close. It is a remarkable grain crop. Its nice heavy grains will delight you. Splendid for all kinds of stock.

SPRING WHEAT

for

NORTHERN GROWN THATCHER TYPE

Exceptionally Rust Resistant

Thatcher is a beardless rust resistant spring wheat first released to growers in 1934. Developed by the Minnesota Experiment Station. Has given sensational performance especially in years when stem rust was damaging. Reports during the bad rust years of 1935 and 1937 show yields of Thatcher 250% of New Marquis and over 350% of Red Fife. Think of $2\frac{1}{2}$ to $3\frac{1}{2}$ times as much wheat per acre grown side by side with the other varieties. If you have rains, morning dews and relatively high humidity by all means grow Thatcher wheat. Price per bu., \$3.10; 10 bu. or more, \$3.00.

SPRING RYE

Strictly a spring grain crop. Sow early spring. Grain looks like Winter Rye. Used mainly as a grain crop. May be pastured or cut for hay. Sometimes combined with Field Peas for hay. Big yielder on rich land. One of the best small grain crops for thin land. Makes fine feed. Sow early spring using about 2 bu. per acre.

See page
41 for
prices.

41

MIDA THE GREATEST NEW EARLY SPRING WHEAT

The seed of this great new variety is still scarce. The time to start growing new varieties is when they are scarce. You can then generally sell your first crop in your own neighborhood for seed at a premium price. That is especially true when a new variety has such great merit as Mida Spring Wheat. It is not an experimental variety but of proven quality in several big spring wheat states.

It is an early maturing variety with straw of good strength. It is a bearded grain. It is resistant to leaf and stem rust

and bunt. Under average conditions it will outyield Thatcher and other spring wheat that has excellent milling qualities. This variety was produced from several crosses made by the North Dakota experiment station. In buying spring wheat be sure to consider quality and do not be confused by claims of big yields on wheat that will not make decent flour.

Mida ranks foremost in yield coupled with quality. We were only able to get a limited supply. Customers who want to make extra money and grow the newest and best should order Mida early. Price per bu., \$3.75; 10 bu. or more, \$3.65.

Wilt Resistant FLAX for Bigger Profits

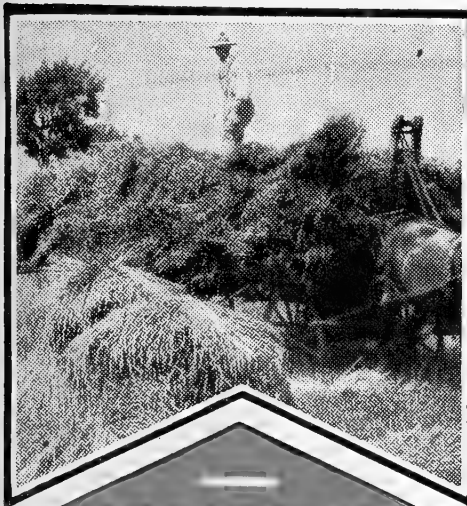

The demand for flax seed remains high and with these famous Wilt Resistant varieties yields of 12 to 18 bushels per acre are obtained. Flax is easy to grow and makes a wonderful nurse crop. Adapted to most of the spring oat section where rainfall is 25 or more inches per year. Grows best on medium to heavy land. Best results on clean land following soybeans or a cultivated crop like corn. Sow early in the spring on a firm seed bed. Cover lightly. Use a roller if you can where soil is loose. **Either Bison or Red Wing \$4.60 per bu., 10 bu. or more, \$4.50.**

Bison

This is the most disease resistant of Flax varieties. Resists both Rust and Wilt. It is also the heaviest yielder when sown early. Is large seeded and requires about a bushel of seed per acre. In the main flax sections it is in big demand.

Red Wing

Matures about a week earlier than Bison and is therefore better adapted when seedings must be delayed or where early maturity is desired. When it is necessary to sow late the Red Wing will usually outyield Bison. Seed is smaller. Sow $\frac{3}{4}$ bu. per acre.

ODERBRUCKER

The Old Reliable Standby

The Oderbrucker type Barley is also known as Wisconsin 55. It is a standard malting variety. Produces big yields of plump kernels. It has excellent feeding value and a high protein test. The grain has rough beards and has great disease resistance. Since much grain is being combined the beards do not bother. When grain is to be shocked you may prefer the Wisconsin 38.

In all our barley seed stocks we endeavor to secure the finest quality, heavy kernels and thorough cleaning makes seed capable of producing maximum yields and stronger plants. See our guarantee of satisfaction on every shipment page 8.

CERESAN

Treat Small Grain at 3c per Bu.

Increase your small grain profits by treating all small grain with this economical easy to use dust. No water required. Does not cause seed to clog in drill. Very effective. Generally controls stinking smut of wheat, covered and loose smut and stripe of barley and loose and covered smut of oats, and sorghum seed. Reduced seed decay of Flax and Peas. Makes for better stands, larger yields and finer quality. Only takes ½ oz. per bushel for seed grains. Full directions for use printed on can. Prepaid price, 1 lb., enough for 32 bushel of grain, only 90c; 4 lbs., \$3.25. It will pay you to treat all seed grains.

Danese, W. Va.

Dear Friends:
I have found you an honest and reliable house. Your seeds are certainly good and reliable in every respect. I am well satisfied with your service.

Yours truly,
WATSON COLE.

BARLEY

SPARTAN

A two-row, smooth awned spring barley. Beards without barbs. One of the strongest strawed barleys grown. Bears large uniform kernels. A fine variety for pearling. Not acceptable as a malting variety. Its unusual strength of straw makes it an ideal kind to sow on rich land. Easy to harvest and because of its smooth awns or beards it is very satisfactory to harvest and thresh. Heavy yields are recorded. It has greater value than some which, although yielding well, are discounted on the market or whose weak straw causes trouble. Spartan Barley is a profitable variety.

Small lots, any variety, postpaid, 1 lb., 20c; 5 lbs., 75c.

**LOWEST
PRICES
ON
HEAVY
PRODUCING
VARIETIES**

VELVET

The KIND With SILKY BEARDS

Our Velvet Type Barley Is Cleaned, Graded Stock

Velvet is a smooth awned or barless spring barley. The awns or beards give the grain some protection yet these beards have no barbs on them. They are as smooth as straw making the crop more pleasant to handle.

Velvet is a malting type barley that is in such big demand. It appears to withstand unfavorable conditions very well. It has a good stiff straw being close to logloss in that respect. Its quality and productiveness have made it one of the most popular varieties in the state of Iowa. It is now being grown over a wide area.

In many sections farmers are switching from oats to barley. These improved smooth awned kinds yield more and make more profitable grain crops. Barley has always been the heaviest producing grain in the northern states and this is materially above the average in production.

Barley makes a better nurse crop for grass and clover seedings because it does not shade the ground so heavily and matures earlier. Velvet is one of the most popular varieties.

A VERY POPULAR VARIETY

WISCONSIN No. 38

BARBLESS BARLEY

Our Wisconsin 38 Type Barley Is the Smooth Bearded Kind

This is claimed as an improvement over Velvet-type and has shown a slight edge over it in production. In one test Wisconsin No. 38 outyielded all others with a production of 50 bushels per acre. It is also a spring variety and has smooth beards or awns. It is a fine malting type barley. The straw is generally somewhat shorter than Velvet and a little later in maturing. In Central Iowa it should be ripe about July 15th.

Wisconsin No. 38 shares the popularity of malting types with Velvet and logloss. In some eastern and northern states it is even more popular. The straw is not quite as strong but it yields well. In localities where both are equally well known it is about a toss up between the two.

A farmer can scarcely make a mistake in selecting any of the varieties listed on this page. They are all recognized as excellent kinds. We price our barley at close figures. Our guarantee assures you of a satisfactory shipment or your money back. See page 10.

Barley makes a wonderful feed for hogs. It is fattening. Builds nerves, muscle and sinew. Matures early. It is a fine nurse crop. Malting demand creates a good market. Requires only 2 bushels of seed per acre. Grow better barley by sowing better seed.

We advise treating barley with Ceresan. It is a good investment. Costs only 3c per bu. as described at left.

See Page 41 for New LOW PRICES

BROMUS INERMUS OR BROME GRASS

DROUGHT RESISTANT

**Heavily Productive—Highly Palatable
Starts Early. Grows Late in the Fall
Canadian No. 1 and Domestic.
New Strain. See below**

One of the Most Valuable of All Grasses

Very palatable and greatly relished by livestock. Highly nutritious. Excellent feed as pasture or hay. Starts growing early in the spring and is one of the last to quit growing in the fall. Extremely winter hardy and very resistant to drought. It is widely grown and is adapted to the entire nation excepting perhaps far south. Even in the deep south fall seedings are being made.

You can greatly increase the value of your pasture by sowing to Brome or at least making Brome a part of it. It is a long lived perennial. Grows up to 3 or more feet depending on soil fertility. Roots go down deep sometimes 5 ft. or more. Does well on clay and sandy loams if not too low in fertility. Stands lots of tramping and abuse when once established. It is not difficult to eradicate.

Getting a Stand

Brome is sometimes a little slow in starting. Prepare a fine, solid seed bed as you would for alfalfa. Sow in spring or fall. The light seed does not feed readily through a drill. Mixing some sand or dirt or oats with seed and keeping it stirred helps seeding. An end gate seeder may be used. Some practice hand seeding. Cover seed lightly. If possible roll after seeding. When sown alone use 20 lbs. per acre. The most lasting results are obtained by sowing with alfalfa or clover, see below. Remember it grows slowly at first, what may appear a poor stand the first year may be surprisingly good the next.

Seed Grades and Prices

The regular Brome is available in two grades of Canadian which is good for northern sections and in mixtures and one of Domestic and then we have the New Strain described on page 23. Any shipment guaranteed to please you.
Fancy Domestic. Select quality home-grown, **\$18.00 per 100 lbs.**
Canadian Extra Fancy, thoroughly re-cleaned, **\$19.00 per 100 lbs.**
New Strain Brome, Extra Fancy Quality, **\$24.00 per 100 lbs.**
Small amounts any grades 1 lb., 50c; 5 lbs., \$2.00; 10 lbs., \$3.75, postpaid.

BROME AND ALFALFA MIXTURE

An Ideal Combination for Best Results 70% New Strain Brome Grass, 30% Alfalfa

Many experiments have been made with Brome Grass. These have clearly established that you can expect the maximum results over the longest period of years by growing Brome in combination with alfalfa or some other legume. Alfalfa is best because it fits so well with it. It has rapid growth and drought resistance so they make a good pair.

The alfalfa feeds nitrogen to the Brome so that it does not become "sod bound." Thus the Brome grows taller and has a higher feeding value. Brome holds up the alfalfa and keeps out the smothering grasses like Blue Grass. Both Alfalfa and Brome seem to last longer when grown together than when grown separately.

This mixture we have priced here is for a seeding of 70% New Strain Brome and 30% Lot Gold Alfalfa. That makes a well proportioned seeding. Sow this at about 15-20 lbs. per acre. These two seeds are shipped in separate bags as the seed tends to separate in shipping. We recommend the Alfalfa and Brome be seeded separately.

You may wish to make a mixture of your own of different proportions or using other Brome. It is simple to order the Brome you want and the alfalfa you like best and make seedings to order. The one we list above is what we think is best.
50 lbs. of Mixture—35 lbs. Brome, 15 lbs. Alfalfa—\$15.00; 100 lbs.—70 lbs. Brome, 30 lbs. Alfalfa—\$30.00.

**\$15.00
50 LBS.**

**\$18.00
PER 100 LBS.**

Farmer Reports on Brome Grass

Elmer Wagner of Ada, Minnesota, says, "It pastures better than Blue Grass. Has seen fields that stood severe pasture for 10 years. As a hay crop I have found it as valuable as alfalfa. Likes it mixed with sweet clover for pasture."

J. T. Dudgeon of Penick, Kentucky, reports he has been growing Brome Grass for more than 30 years. Cattle grazed in different grass prefer Brome to all others. He uses Alfalfa and Brome mixed with highly satisfactory results. All kinds of livestock eat Brome ravenously.

Achenbach Bros. of Washington, Kansas, say it is the only grass they have ever found to take the place of the old time prairie grass. Comes on early, stays on late in the fall and often eliminates weeds. When sown with Alfalfa reduces danger of blot when pastured. Yields 1½ to 4 tons of hay per acre.

Lack of space prevents giving many more reports but these are indicative of the great value farmers place on this crop.

Experiment Station Reports

Agricultural Experiment Stations now recognize its value and most states in the northern half of the nation have circulars or bulletins describing the crop and its value.

The Illinois experiment station considers it the most drought resistant grass in that state. Also very palatable and relished by cattle and horses. New York recommends it especially for pasture in mixture. Michigan finds it adapted, very drought resistant, highly palatable and especially suited for mixing with Alfalfa for pasture. Nebraska recognizes it as superior to all other cultivated grasses in that state. Iowa finds it of great value. Kansas finds it especially good in the northern part of the tame grass section with hay yields of 1 to 3 tons per acre. South Dakota says it is one of the outstanding grasses in the eastern section.

NEW STRAIN

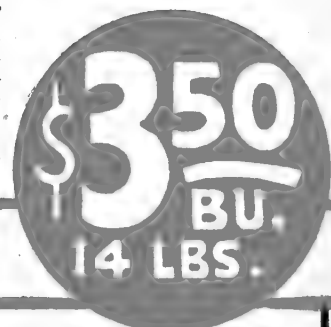

BROME

**Wonderful Yields—Superior Quality—
Big Crops**

**Up to 50% more pasture and hay.
Easier to get stands. Larger growth—More Profit**

This is the kind of Brome Grass seed to sow if you live in sections having climatic conditions like Iowa, Nebraska and states to east and south. Each year this New Strain Brome is playing a more and more important part in the nation's pasture and hay program. In our opinion it is the most important and valuable of all grasses. There is an enormous enthusiastic demand for this New Strain Brome. Experiments and trials in many sections show conclusively that special new strains are far more productive in states like Iowa, Illinois, Indiana, Ohio and east as well as Nebraska, Kentucky, Oklahoma, etc. Northern seed like our Canadian stock is good for northern states.

New Crop Recleaned Seed—Priced Low

Some of the Advantages

Kentucky reports such seed produced 50% more than the northern seed. Illinois says it is decidedly superior in yield especially in the southern half of the state and further that farmers are much more successful in getting stands. Reports from Iowa, Kansas and Nebraska show a much taller growth and all experiment stations find this greatly superior to northern seed. Ohio reports the new strain distinctly superior throughout the state. Some find in trials that the new strains last longer. The evidence clearly indicates it has greater resistance to hot weather. Therein is perhaps the main reason for its great superiority in yield.

New Strain Makes Big Money

A farmer near Lawrence, Kansas, is reported to have received this past year \$1900.00 for the seed from 16 acres of Brome plus \$435.00 for the hay, making a return of practically \$146.00 per acre.

Extra big yields are obtained when Brome and Alfalfa are grown together. In a Kansas experiment Brome alone produced 5860 lbs. of hay per acre the first year which declined to 2588 in the sixth year. When grown with alfalfa it yielded 6600 pounds per acre the first year and 8460 the sixth year.

A Liberty, Nebraska, farmer has 100 acres of Brome-Alfalfa mixture on which he pastured 700 hogs with excellent results, reducing his protein concentrate supplement 50%. Another Burchard, Nebraska, farmer considers his pasture worth \$50.00 to \$60.00 an acre as it carries a lot of stock and decreases the need of protein supplement. At Wisner, Nebraska, a large cattle feeder is increasing his acreage of New Strain Brome and Alfalfa because he says an acre of this will produce more beef than an acre of corn and cuts his protein requirements in half. He feeds 2000 to 3000 cattle and has no trouble with bloat. Iowa finds new strain Brome far superior to Blue Grass because it provides earlier grazing in the spring and a shorter period of dormancy in midsummer.

New Strain Superior

In practically every instance when you will check the production of Brome in the area outlined above you will find the new strain Brome of Iowa, Nebraska and Kansas production to be by far the most profitable to use. This is emphasized by reports from farmers as well as experiment stations. This is causing acreage

Quantity prices below

of Brome to be rapidly increased. In one Nebraska county there was practically no Brome 5 years ago—now 90% of the farmers are growing Brome or Brome and Alfalfa combination. This increase in Brome acreage is spreading throughout all states to the east and to the south at least as far as Oklahoma and Kentucky.

Very Palatable

Feeding tests have shown Brome to be more palatable than other grasses. The leaves retain their green color and palatability even after seed is ripe. Thus seed can be combined and still have hay or pasture. It starts growing early in the spring. Does far better than other grasses during dry summer weather. Keeps on growing until late in the fall. Experiments with Alfalfa mixed with Brome and used as pasture show that Brome and Alfalfa are both eaten readily while if other grasses are used the stock will often eat only the Alfalfa and thus cause it to kill out quickly. Brome and Alfalfa mixed will last longer than any other combination.

Widely Adapted

It is adapted to a wide range of soils from sands to peats. It wants a good supply of nitrogen in the soil. That is why Alfalfa or Clover is such a good combination. This Brome is also fine for ditch banks or wherever you want to keep soils from washing. It forms a dense sod and lasts for years, yet it is easy to eradicate.

Start This Year

Get New Strain Brome started on your farm this year and grow one of the most highly profitable grasses. Get fine quality, palatable, high feeding value and big yields of hay and pasture.

The best quality and largest yields are secured from mixed seedings. This is true of both hay and pasture. See page 22 for an ideal combination of Alfalfa and New Strain Brome. Sow about 15-20 lbs. per acre. If your land will not grow alfalfa you can use 5 or 6 lbs. of Red Clover per acre with 10 to 15 lbs. of Brome. Some like a pound of Ladino Clover mixed in for pasture.

Berry's New Strain Brome is the best developed to date we know about. Our seed is recleaned and shipment is guaranteed to please you in every respect.

F.O.B. Clarinda: 25 lbs., \$6.10; 50 lbs., \$12.10; 100 lbs., \$24.00. Postpaid: 1 lb., 50c; 5 lbs., \$2.00.

GRASSES

of SPECIAL MERIT

CRESTED WHEAT GRASS

EXTRAORDINARY DROUGHT RESISTER

If you want the most highly drought resistant grass, sow Crested Wheat grass. In sections with as little as 10 to 18 inches of annual rainfall and high evaporation it has made a very satisfactory growth. Yields of 3 tons per acre are recorded in more humid sections and seed production up to 900 pounds per acre.

It is a deep rooted long lived perennial grass. A fine stemmed leafy grass. Roots go down as much as 8 feet and are very dense. It does not spread by under ground root stalks, therefore is easier to eradicate than some grasses. On the other hand it does not become sod bound like some dryland grasses or to deteriorate like others.

Comes on Early—Grows Late in Fall

Starts growing unusually early as it likes cool weather. No amount of freezing or subzero temperatures seem to hurt it. Begins growing in the spring from one to two weeks before Brome Grass which is also an early starter.

Likewise it continues growing later in the fall. During hot weather it becomes dormant but responds quickly to a little fall moisture. It has not been definitely determined how far south it will grow. Has been grown in Colorado and Illinois and is worthy of trials further south and east.

It is under extremely dry conditions that it shows its most striking superiority over other grasses.

25 lbs.,

\$3.60;

50 lbs.,

\$7.10.

Other Valuable Characteristics

It stands close grazing and trampling remarkably well. In one test it was grazed continuously for five years from early spring until late fall without apparent injury. It has proven a fine weed eliminator. A field that was heavily infested with mustard and Russian Thistle was almost totally freed of these weeds after Crested Wheat was established, yet the grass is easily eradicated.

It is relished by all classes of livestock and especially horses. Cures to greenish stems and abundant leafage as hay which is very palatable and highly nutritious. No grass is more winter hardy.

Seeding Suggestions

Prepare a fine well settled seed bed. Rolling or packing are desirable. Use about 10 pounds per acre and sow with grain or grass seed drill. Relatively early spring seedings when weather is cool and moisture conditions most favorable for quick germination are best. Cover seed about half an inch. In very dry sections cover a little deeper. Rolling is a good practice.

Postpaid: 1 lb., 40c; 5 lbs., \$1.60; 10 lbs., \$2.75.

RED TOP GROWS MOST ANYWHERE

Seldom Fails to Make a Stand

No other grass will grow under as great a variety of conditions as Red Top. It will grow on soils so poor in lime that most other grasses fail. Next to Reed Canary it is the best wet land grass. It is also strongly drought resistant. Fine to sow on banks to prevent erosion. If you have trouble in getting a stand of grass, sow Red Top—it seldom fails.

It is second only to blue grass as a pasture plant especially in the northeastern part of our country and it grows when blue grass often fails. On sour land we know of no grass to equal it. Red Top and Blue Grass is good for both pasture and lawn purposes. Likewise it is good in hay mixtures and it is widely used in that way.

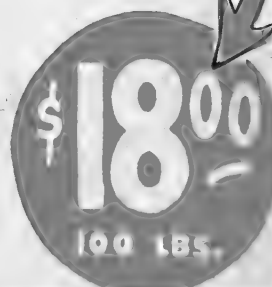

Adapted to the Entire Country

Red Top thrives from Canada to the Gulf and from New York to California. It is a vigorous grower and quickly forms a turf. Very valuable for use in soil erosion work to stop washing. When used with Timothy for hay it generally increases the yield. Matures at about the same time.

It is a perennial grass. One seeding lasts several years. The seed is small. Around 10 pounds per acre are sown when not mixed. A mixture of three or four pounds per acre is fine in pastures and meadows. May be top sown on old stands to increase production. Early spring or late summer is the best time to sow.

The seed is very small therefore the seed bed should be fine and solid. Take care not to cover it too deeply. Red Top is cheap this year compared with Blue Grass, Orchard, Brome, etc. If you wish to get a grass that is economical to sow and almost sure to get a stand even on poor land be sure to sow some Red Top this year. Use it with Timothy for hay and with Blue Grass for pasture. It will help you get more feed per acre. Check soil erosion with Red Top.

Postpaid, 1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00. Not Prepaid, 25 lbs., \$4.60; 50 lbs., \$9.10.

Bermuda Grass Orchard Grass

This grass is very widely used in the south for lawns and pastures. Stands the extreme heat of southern locations better than any other on soils of a clay or loam character. Grows on sandy soils too but is less productive on them. The seed is quite small. Five pounds sows an acre, although for lawn seeding a heavier rate is recommended. It is not very winterhardy and probably will winter kill north of Kansas and similar locations.

We have a very nice quality of seed for you and we are pricing it on a close margin.

Prices Bermuda Grass

Postpaid: 1 lb., 75c; 5 lbs., \$3.25; 10 lbs., \$6.25. Not prepaid, 10 lbs., \$5.50; 25 lbs., \$13.50; 50 lbs., \$26.50.

\$5.50
10 LBS.

This grass has been grown in nearly every state in the Union. Starts growing early and grows late in the season. Soil requirements are similar to Timothy and Blue Grass. Will stand more shade than most grasses. Especially valuable to mix with other grasses for pasture. Makes best hay if cut when just in bloom. It is what is known as a bunch grass. Seed has been very scarce in recent years due to the government land lease program. This grass is very popular in Europe where it is valued very highly. The seed we have is fine but supply limited.

\$36.00
100 LBS.

Postpaid: 1 lb., 65c; 5 lbs., \$2.75; 10 lbs., \$5.00. Not prepaid, 25 lbs., \$9.10; 50 lbs., \$18.10.

KENTUCKY BLUE GRASS

A Most Valuable Pasture

This long lived perennial grass is well known as an outstanding pasture and lawn grass in a great portion of our country. It is

very nutritious and highly palatable. Grows from early spring until late fall. Makes a fine sod and stands close grazing. Stands a lot of drought, coming out after long dry spells in an astonishing manner. It is adapted to a wide territory and to different soil types. Will stand some wet conditions and some acid but not as much as Red Top. Because of its fine quality it is widely desired for pasture.

Make Blue Grass More Profitable

Blue Grass pasture should be good money makers yet on many farms they are not. That is not the fault of the grass but more often due to neglect. When bare spots show up little attention is given them. It is hoped they may be reseeded by mother nature. Sometimes they are but it is slow. Meanwhile you lose what bare spots might be producing and weeds creep in. Save money by reseeding such places.

Other ways in which you can improve Blue Grass pasture is to fertilize them. Grasses use plant food same as grain. Sow clovers in Blue Grass to give them more nitrogen. Ladino, Sweet Clover and Birds Foot Trefoil are good. Clip weeds before they go to seed. Do not over-graze it in dry season.

Good pastures pay good profit. You lose money on poor ones. Use Berry's Extra Fancy Quality seed to build money-making acres.

Seeding Suggestions

Buy good seed but don't pay too much for it. Our prices will save you money. In spite of short crops our prices are very low. Prepare a fine, well settled seed bed. Sow in the spring or fall. Spring seedings may be made with a light crop of grain as a companion crop. Some clover also may be used with a spring seeding. Timothy is sometimes used both with fall or winter seedings. Blue Grass straight is sown 15 to 20 lbs. per acre. In mixtures, reduce to suit your ideas. For thickening thin spots 8 to 10 lbs. are generally sufficient. Whenever possible roll after seeding.

Blue Grass for Lawns

For lawns a very thick stand is desirable and a pound to every 5 or 600 square feet is suggested. An application of commercial fertilizer and a little lime will make a more luxurious growth, give it better color and help keep out weeds such as dandelions.

Small Lots, Postpaid: 1 lb., 70c; 5 lbs., \$3.25; 10 lbs., \$6.00. Not prepaid, 25 lbs., \$12.00; 50 lbs., \$23.85.

DOMESTIC RYE GRASS

An Early Starting—Fast Growing Grass

25 lbs.,
\$3.20;
50 lbs.,
\$6.30.

We receive many requests for a grass that can be sown early in the spring and make a good growth that same year. It is well known that grasses like Kentucky Blue Grass and Timothy will not make a large growth the first year and especially not early in the year. Domestic Rye Grass will make a good yield early. You can sow it as early as any grasses or about small grain seeding time. It sprouts quite quickly and grows fast.

This Rye Grass will normally not live over winter and should be considered an annual. Its greatest value is as a pasture crop and has special merit in mixtures. The leaves are somewhat like Blue Grass but a little broader and lighter green in color and grows taller. Do not confuse this with Rye that is sown for grain as it is entirely different. Most lawn grasses contain Domestic Rye Grass to provide green growth while the slower growing grasses are getting started. It responds well to favorable moisture conditions and good soil fertility.

A crop like Sudan Grass will make a much larger growth than Domestic Rye Grass and will stand more heat and drought. However, you cannot sow Sudan until around corn planting time while Domestic Rye Grass in at oat seeding time and for early pasture, alone or in mixtures, be sure to use some of this fine grass. When sown alone use 25 lbs. per acre.

Small lots postpaid: 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.25.

12⁵⁰
\$
100 LBS.

English Blue Grass

A Grass That Is Widely Adapted

A crop used for hay and pasture. Yields around 2 tons of hay per acre on average land. Grows 15 to 30 inches high. Exceptionally valuable for pastures because it comes on very early in the spring and keeps on the job until late in the fall. Grows well from Kansas and Nebraska east to the Atlantic Coast and from Canada to the Gulf of Mexico. Not critical as to soils. Few grasses can equal it on wet land. Lives longer than Timothy. Seed cost is low this year. Sow about 20 lbs. per acre. It is a profitable crop either alone or in mixtures. It adds variety to pastures and increases their value. Grow some of it this year.

Small lots, postpaid, 1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.50. Not prepaid: 50 lbs., \$15.60; 100 lbs., \$31.00.

Lot "TIM" Red Top & Timothy

A Popular Low Cost Seeding

Our trade uses a lot of this for top seeding in pastures and meadows, and new stands. Many sow it alone, others add Alsike and other clovers. Adapted to a wide range of soils and climate. Especially good for wet land. Ten pounds an acre makes a full seeding. A.A.A. payments 40c an acre where adapted.

Lot "Tim" is Red Top containing some Timothy seed. We secured this seed at low cost and are selling it at figures that make an appealing bargain. The low acre seeding cost and the ease of obtaining stands make this a very popular value. Shipment guaranteed to please.

Small lots, postpaid, 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.25. Not prepaid: 50 lbs., \$5.80; 100 lbs., \$11.50.

GROW QUICK PASTURE MIXTURE

\$3.30
BU.
25 LBS.

A Popular Mixture at Reasonable Cost

Our Grow-Quick Mixture is a big seller. The cost of seeding is low and it gives quick production. You can begin pasturing it lightly within relatively few weeks after sowing.

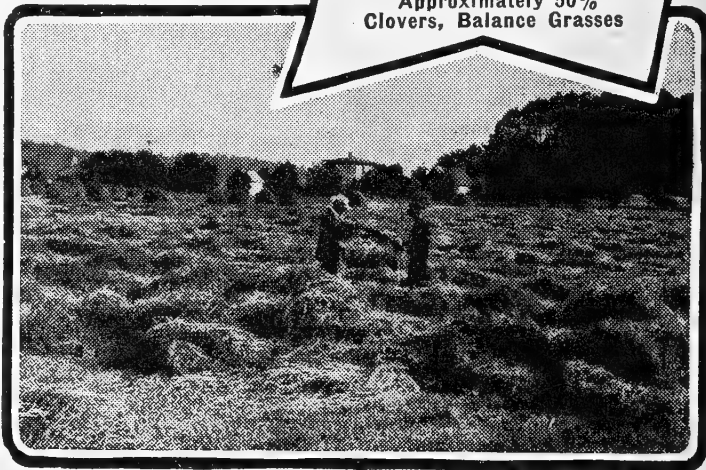

This spring may find many farmers short on pasture. This is a seeding that may help you solve your problem. Good quality seed is used and we mix it as thoroughly as we can so as to give you a fine value at low cost. Only around \$2.50 per acre for this rich mixture.

Contains Approximately 50% Clovers

The Rye Grass in this combination is a fast grower and affords the earliest feed. Meanwhile the Sweet Clover, Korean and Timothy are developing to increase its production and value. It keeps on growing until after frost. The Korean will reseed for the next year unless the season is too short. The Sweet Clover and Timothy of course live over winter and can be used the next year for plowing under, for continued pasture or cut for hay.

Sow 15 to 20 lbs. per acre. Cover seed lightly and roll if possible. A firm seed bed and a light covering are always helpful in getting stands. Sow about the time you sow small grain. Do not use a nurse crop.

\$13.00 per 100 lbs.
Contains
**Korean Clover,
Sweet Clover,
Domestic Rye Grass
and Timothy.**
Approximately 50%
Clovers, Balance Grasses

PERMANENT PASTURE and MEADOW MIXTURE

Thrifty Mixture

A combination of Grasses and Clovers that give our customers very satisfactory results at low seeding cost. A seeding that lasts several years. Produces a fine quality and variety of feed. Gives a longer pasture season. Some of the crops in it start early. Others grow through hot dry weather and late into the fall. Some stand wet conditions. Others prefer it dry. Under almost any conditions it can give you a stand that is productive.

The grasses in the mixture are Kentucky Blue Grass, Red Top, Rye Grass and Timothy. These are combined with Korean Clover and Sweet Clover. The Rye Grass grows fast and serves as a nurse crop although a light seeding of grain can be used if desired. Red Top is also quite a fast grower and these two grasses provide early feed. The Korean and Sweet Clover are generally ready to pasture by mid summer and on till late fall. The Timothy and Blue Grass also add to the fall pasture.

The grasses are all perennials excepting the Rye Grass. The Korean Clover is an annual but generally reseeds itself no matter how closely it is pastured unless the season is too short. The sweet clover is a two-year crop and it too, nearly always reseeds when in pastures. Thus you have legumes to build up your land, increase the growth of the grasses and improve the feeding value of the pasture. Sow 15 to 20 lbs. per acre.

We guarantee the quality of the seed to show up to your entire satisfaction and assure you of good value. Your money back if the seeds or the savings are not fully satisfactory. 100 lbs., \$14.50.

\$7.35
50 LBS.

Master Mixture

A combination of grasses only. Contains no clovers. Many of our customers want such a mixture. Some have clovers of their own to add. Some don't care for clovers. Others want to add one kind of clover and some another. So here it is. A straight grass mixture that we are sure you will like and priced to please you.

Our Master Mixture contains Kentucky Blue Grass, Brome Grass, Timothy, Reed Canary, Red Top and Crested Wheat Grass. These give a variety of grasses and that is what livestock likes. There are other advantages. All of them are perennials. Some start earlier in the spring. Brome Grass takes the heat and drouth exceptionally well. Meadow Fescue starts early and will grow until late in fall. It is widely adapted. Red Top grows most anywhere. Reed Canary stands wet and drouth. Timothy fills in well for several years as the other grasses are getting well established.

Poor thin pastures don't pay their way. They lose money. They become infested with weeds. They start to wash and erode. Thicken up old stands by reseeding. Disc the land, harrow. Sow one of our mixtures and roll or pack the ground. Make new seedings if old ones are too far gone. See page 25 under Blue Grass for seeding suggestions. Use 10 to 12 lbs. of mixture for top seeding or 18 to 20 pounds for a new seeding. Make those pasture acres profitable. More stock per acre for a longer period of time getting a greater variety of feed.

We use good seed and mix it as thoroughly as we can according to a definite formula. The shipment is guaranteed to please you. If you do not consider it a great value in every way at our low price you may return it for refund plus freight.

Gentlemen: We buy seeds from you. Some years the bill runs over \$1,000. The quality of the seed holds us as a customer. Then, too, the price is always less.

Yours truly,
RAYMOND C. LANGAN.

**Berry's Nodule Germ is the
newest in inoculants. See page 41.**

Early GIANT Korean

Early Maturing—Vigorous Growing—Heavy Yielding

This Lespedeza is far superior to ordinary Korean for all farms that have climatic conditions similar to the southern half of Iowa and northern Missouri. That takes in large areas in Nebraska, Kansas, Illinois, Indiana, Ohio, etc. The crop can be grown north of this area but it is not certain to make seed north of central Iowa.

Early Giant Korean is becoming more and more a crop of vital importance. The more farmers see of it the more anxious they are to start growing it. During hot summer months when blue grass pastures are thin and dormant this wonderful legume provides an abundance of high protein feed and enriches the land so the grass can grow thicker and heavier in the fall. It is often a "life saver" to have a field of Early Giant Korean to give you feed when you need it.

Fully two weeks earlier

This Lespedeza, also known as 19604, will mature seed 100 to 150 miles north of the ordinary Korean. U.S.D.A. states it is a reliable seed producer up to the northern limits of Illinois which gives you another indication of its wide adaptability. The early maturity is the big feature of Early Giant. Another important factor is that the seedlings make an early start in the spring and grow more vigorously than ordinary Korean. This vigorous growth helps give the best assurance of bigger and better stands and larger crops.

Big Profit Features

Growth up to two feet was reported in the dry season of 1936. It will stand a lot of dry weather and grows best when the weather is hot. It responds well to favorable moisture conditions. You can grow Early Giant on very poor soil without lime or fertilizer. On the other hand, on better land it will grow much taller and heavier. This clover may grow twice as high as common Lespedeza. It is a

prolific seed producer yielding up to 1,000 lbs. per acre, which is combined after leaves have turned brown. Heavy stands of Early Giant can yield 2 tons per acre of fine stemmed leafy hay equal to Alfalfa. Its greatest value is as pasture.

\$4.90
25 LBS.

Three crops in one year. Grain, Hay and Seed

Iowa farmers have gotten a triple return from their land by using Early Giant. We purchased seed from stands that had been sown the year before with small grain. It made a seed crop the year before. There was enough seed shattered to leave a good supply on the land. Oats were disced in early in the spring but no more Early Giant was sown. The oats were taken off early in July. A hay crop of Lespedeza was harvested in August and in October a seed crop was taken. This same procedure can be used several years in succession. Just disc in oats in spring and get three crops. Saves time, builds up land and brings big profits. Put the land back to a cultivated crop any time. Lespedeza will not become a weed or a pest.

A crop many Farmers need

Early Giant Korean provides an abundance of fine stemmed, leafy high protein pasture during hot summer months. It is an ideal companion crop for pasture grasses like blue grass, red top, etc. The grasses make early growth. Early Giant comes on later. It is easy to get started. Not particular about soils. Can be sown early. Does not require much seed bed preparation; just so your seed bed is not loose and do not cover seed over $\frac{1}{2}$ inch. Sow 15 to 18 lbs. per acre. It is often sown on top of the ground in early spring. It pays to inoculate your seed whether you sow on top of the ground or cover it. See page 41.

Early Giant Korean will make you money as a pasture, hay, and seed crop. Get started this year with this early maturing, vigorous growing Lespedeza that is the best money maker of all varieties for such a large section of the corn belt.

Small lots, Postpaid: 1 lb., 45c; 5 lbs., \$2.00; 10 lbs., \$3.50.

BERRY'S LAWN MIXTURES

GENERAL CHOICE MIXTURE

This makes a fine smooth lawn in the northern half of the United States. Contains chiefly Blue Grass, Red Top, White Dutch Clover and Rye Grasses. The quicker growing grasses provide a nice green stand while the slower kinds are coming on. It is our most popular mixture, because it gives such wonderful satisfaction. Postpaid price: 1 lb., 65c; 3 lbs., \$1.80; 5 lbs., \$2.75; 10 lbs., \$5.25. A pound sows about 500 square feet.

TERRACE MIXTURE

This mixture contains deep rooted grasses. They hold the soil firmly and resist drought. Select this for terraces and sloping places. Soil on terraces is often filled in dirt of low fertility. It will pay you to fertilize your ground well. You cannot have a nice lawn on poor soil. Postpaid price: 1 lb., 70c; 3 lbs., \$2.00; 5 lbs., \$3.00; 10 lbs., \$5.75. All seed is thoroughly cleaned and tested.

SHADY-SPOT MIXTURE

This contains grasses naturally adapted to growing in shade, such as Poa Trivialis. Fine for grounds shaded by trees or buildings. In heavy shade a light application of lime in addition to fertilizer will improve results. This is a dandy mixture. Postpaid price: 1 lb., 75c; 3 lbs., \$2.10; 5 lbs., \$3.25; 10 lbs., \$6.25.

WHITE DUTCH LAWN CLOVER

The small white clover so popular for lawns. This may be mixed with any lawn grass seed you have on hand or sown on an old lawn in the early spring. Very drought resistant. Helps soil fertility. Seed is very small. A pound sows 1,000 or more square feet, depending on how heavy percentage of clover is desired. Postpaid price: 1 lb., \$1.50; 3 lbs., \$4.25; 5 lbs., \$6.25; 10 lbs., \$12.00. See page 40 for larger quantities.

KENTUCKY BLUE GRASS

See also page 25. The most satisfactory all purpose lawn grass for the U. S. from Nebraska and Kansas east to the coast and from Canada south to Tennessee. Stands drought. Makes an excellent turf. Grows from early spring until late fall. Use Berry's quality Blue Grass. Postpaid price: 1 lb., 70c; 3 lbs., \$2.00; 5 lbs., \$3.25; 10 lbs., \$6.00.

KOREAN CLOVER

\$2.50
BU.
25 LBS.

See below for other prices

Grows on the poorest land
Wonderful pasture—Excellent Soil Builder.

A VERY VALUABLE CROP

Markets on Korean Lespedeza seed are very strong as there is a tremendous demand for it. Will be used in place of Sweet Clover in many sections.

Korean is a Nitrogen gatherer and will improve the poorest land where other clovers cannot even get started. It will resist more heat and drouth than any other clover. It will stop soil washing and will grow in ditches.

CHARACTERISTICS

Korean is an annual. It grows only one year from a seeding. It reseeds itself very readily and matures seed even after plants have been killed by frost. Thus it is proving itself adapted farther north than was at first thought possible. It is steadily and surely working its way north into Iowa, Illinois, Ohio, Indiana. If it does not reseed itself it will not come up the next year.

It is quite a common practice to put oats on land where Lespedeza has reseeded itself. After the oats are off, there is the Lespedeza to give an abundance of pasture until frost. A very valuable crop. Superior to Alfalfa and other clovers in acid or thin soils.

PASTURE VALUE

Korean shows its greatest worth in pasture. It does not afford much feed early but produces its best during the latter part of June and in July and August up to killing frosts. Therefore Korean gives pasture when most other grasses are dormant because of heat or drouth. No matter how close it may be pastured the crop will reseed if heavy frosts do not come too early.

VALUE AS A HAY CROP

Korean does not grow very tall. To get a good hay crop the stand should be heavy. While it is not tall the stems are very leafy and a surprisingly large yield can be secured from a stand that seems fairly short. One of our customers reports a yield of three tons per acre and a seed crop afterwards. This was in central Missouri.

SEEDING SUGGESTIONS

The firmer your seed bed the better your success. Just broadcast seeding during winter or early spring. If sown with spring grain just scatter on top and then roll the land. Be sure to avoid covering it much.

Korean Prices

Fancy Grade, \$2.50 bu., Clarinda.

25 lb. Bu. Nice quality recleaned seed of high germination and good purity. Sow 12 lbs. per acre.

Special Grade, \$2.75 bu., Clarinda, 25 lbs.

Selected especially to comply with provisions of Iowa Seed law. Sow 12 lbs. per acre.

Hulled Korean, \$8.40 for 60 pounds—30 lbs., \$4.30—15 lbs., \$2.20.

Has hulls removed. Generally germinates quicker. Best for late seeding. Sow 10 lbs. per acre.

In buying Korean don't be misled by too low prices. Much of the seed contains excessive weed seed and is no bargain. Considering quality our prices are low. Quality brings real satisfaction.

Ask for our Free Circular on Lespedeza.

INOCULATE YOUR SEED

Inoculation helps get bigger and better stands. Costs only 60c for a package that will inoculate up to 100 pounds of seed. Order a 60c size for every 100 pounds or any part of 100 pounds of seed. See page 41.

SEE PAGE 27 for EARLY GIANT KOREAN

SERICEA LESPEDEZA

A GREAT PERENNIAL VARIETY

Comes up from the old crown each year instead of through reseeding. Gets started earlier in the spring. Develops a big root system far larger than Korean and therefore excels as a soil builder. Has wintered over as far north as Vermont, New York and Southern Michigan. Official checks show little or no winter-killing with temperatures going to 17° below zero with little or no snow protection. It is adapted throughout the corn belt and in southern states as well.

VALUABLE CHARACTERISTICS

Its growth the first year is generally one main stem and will not produce a large growth. The second year the plant sends up 10 to 15 stems and in following years the growth gets still thicker and finer. Will grow to a height of 2 to 4 ft. if not cut sooner. Makes best quality hay cut early when 12 to 15 inches tall. Becomes woody if allowed to grow tall. Will afford 2 cuttings a year. Further south like in Tennessee 3 to 4 cuttings may be taken. Hay yields range from 1 to 4 tons per acre.

Has a large carrying capacity as a pasture and after getting a taste of it cattle eat it readily. Start pasturing when 4 to 6 inches high. Very valuable for summer pasture especially on poor soil. It is a prolific seed producer yielding up to 1200 pounds of seed per acre.

Do not sow too early as seedlings are susceptible to frost. Late April is suggested for southern Iowa, can be sown later. Some sow much earlier with good results as seed is a little slow in starting. Sow 12 to 15 pounds per acre on a firm seed bed. Get started with Sericea. It is a wonderful crop.

Small Lots Postpaid, 1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.50. Not Postpaid, 1 bu., 60 lbs., \$19.80; 1/4 bu., \$10.00; 1/2 bu., \$5.10.

POOR LAND ALFALFA or Birdsfoot Trefoil

You are going to hear a lot about this crop in the next few years. Seed is still scarce and high priced but now is the time to start growing it. It is a hardy, deep rooted, long lived legume. It is fine stemmed and leafy and has a feeding value equal to Alfalfa. It will grow on land too low in fertility for alfalfa. Stands a lot of heat and drought. Withstands some alkali. Can be grown all over the nation excepting deep south. Especially valuable in permanent pastures. Liked by all kinds of livestock. Be sure to drop us a line asking for full description of this great legume. Ask for Birdsfoot Trefoil Circular. Start growing it now.

Price Broadleaf Variety, 1 lb., postpaid, \$2.75; 5 lbs., \$12.50; 10 lbs., \$22.50. Not prepaid, 10 lbs., \$21.50; 30 lbs., \$63.00.

CYCLONE SEEDER

A handy substantial hand seeder. Saves on seed and labor. You can sow many acres in an hour with a Cyclone. Sows Clovers, Timothy, Alfalfa, Oats, Sudan, Wheat, etc. Can be regulated for different amounts per acre. Distributing wheel scatters seed evenly in equal amounts at equal distance from operator. Supply limited due to war time restrictions. First come first served. Postpaid Price, \$2.85.

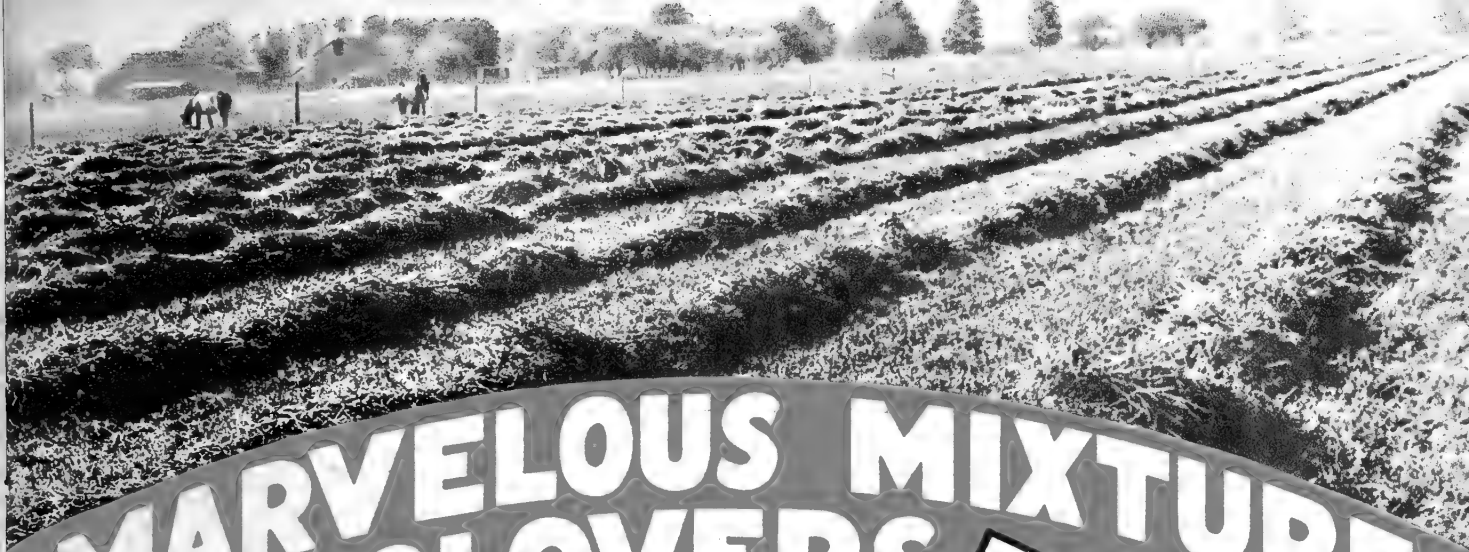

HORN SEED SOWER

Simplest of all seeders and very popular. Sows all smooth seed like Clovers, Timothy, Alfalfa, Lespedeza, etc. Patented seed gauge regulates amount per acre to be sown. Tube comes in sections that fit tightly. Easily operated. No wasted seed. Pays for itself many times over. Postpaid, \$1.00.

**America's Most
Popular Mixture.**

**One of Berry's Best Values. Note Customers' Report at
Right. See Sample Enclosed.**

Look at this great value. See the quality of this seed which is the heaviest yielder of all our mixtures. Fifty percent of clovers which are Red, Alsike, Sweet and Alfalfa balance Timothy. Rich in hardy, heavy yielding clovers yet low in seeding costs. You will have approximately 45 to 50 clover seeds per square foot when you sow this at 11 pounds per acre and the Timothy besides. That makes a cost of less than \$1.95 per acre. You can sow less seed, bring the cost still lower and get good results.

A Seeding That Lasts Several Years

Such a combination of clovers and grasses makes extremely heavy yields of hay. Our customers report highly satisfactory results. Big crops, Fine quality and Big savings in cost. Many use it as a pasture. They stock it heavily and get feed of excellent value. The alfalfa seed in the mixture helps to establish the crop on your land. The sweet clover opens up the soil and adds much nitrogen. The Red and Alsike fill the lower growth and the Timothy supports them and adds to the weight and growth of all. It is a great seeding and it is no wonder our customers are enthusiastic about it. Year after year this is our biggest selling mixture.

Quality Guaranteed to Please

The enclosed sample speaks for itself. Note the heavy clover content. This seed is all hardy domestic seed that has been re-cleaned. Note the letters in the opposite column. Results are what count. Satisfied customers can tell you of the great value of this seeding better than we can. Order with complete assurance of a satisfactory shipment. Your money back if you do not consider it a great value on which you have made a big saving. See our guarantee on page 9.

Start This Profit Maker

You, too, can become enthused over its wonderful production and high feeding value. See how it checks soil erosion and enriches your land. That dense heavy mat of clovers is a joy to behold. We sell thousands of bushels of Marvelous Mixture every year and with present low prices on such a combination of all home grown seed its sales should smash all previous records. We will protect prices until seed is sold or market advances make duplication impossible. Get the best bargain now. Sow around 10 to 12 lbs. per acre.

A Few Who Speak for Thousands

It is the experience of our customers that gives our Marvelous Mixture its strongest endorsement. It is the heaviest producer we have ever developed. High in feeding value. Rich in soil building elements. Suitable for hay and pasture. Low in seeding costs. It makes an ideal combination for thousands of farmers.

Saves 50% at Berry's

Stratford, Wisc.

Dear Sirs:

I was more than pleased with the seeds I bought from the Berry Seed Co. Never had a finer stand of hay. Sowed Marvelous Mixture this spring, and the seeding looks very good. I feel I saved about half by buying from this Co.

Yours truly, THEO ROGGENBAUER.

Yield and Quality Fine

Catawba, W. Va.

Dear Sirs:

I have been using your Marvelous Mixture of grass seed for more than eight years with satisfaction. The quality and yield has never disappointed me, and can heartily recommend to others desiring good seed.

Yours truly, WILLIE L. ROBE.

Good Stands—Big Yields

Hillsdale, Wis.

Gentlemen:

We have been using Marvelous Mixture grass seed on our farm near Blue River, Wis., for a number of years and have been well pleased with the results. Have had the best stand and best yield of any seed sown for several years.

Yours truly, G. L. POUND.

Splendid Hay—Lots of It

Martinsville, Ind.

Berry Seed Co.

Dear Sirs:

I find your Marvelous Mixture makes splendid hay and I got 21 loads off of 9 acres first cutting and 11 loads of fine Alfalfa this year in second cutting. In 1928 I bought one bushel of Kansas Grown World Brand Alfalfa, and it is still fine field of hay and thick as ever, so I have been using your seed ever since.

(Signed) W. L. COLEMAN.

Marvelous Satisfies

Kent, Ohio.

Dear Sirs:

I had good results with your Marvelous Mixture, very heavy crop and good quality. Your Marvelous Mixture is my choice. There is no guesswork about this seed. I have recommended it to a good many friends and neighbors.

Yours truly, J. B. SMITH.

LOT
HONEST JOHN
 FOR FINE STANDS
 BIG CROPS - LOW COST

Only
\$21⁹⁰
 BU.
 60 lbs per BU.

VERY POPULAR AND SERVICEABLE

SEE
 PAGE 34

Here you have one of our biggest selling lots of Alfalfa seed. Serviceable seed priced extremely low. We believe this to be absolutely the lowest price at which you can buy seed of this character. It has purity and germination tests that we have found adequate to produce good heavy stands. And our customers have found it so. The saying "thick as hair on a dog's back" indicates the character of reports we have from many customers. People write us "we want some of your Honest John because we saw what it did for our neighbors. They had better stands than we did from much higher priced seed."

Honest John is practically the same in hardness as any of our Corn-Belt stock. It should yield as well and last as long. The appearance of the seed, however, is not as nice as the higher priced lots. The color is not as good nor the berries as large. If you do not object to a lack of uniformity so long as it can produce satisfactory results, then seed should please you. It is a seeding that pleases thousands. Sow 15 lbs. per acre. There are more seeds per pound than in larger berried stock.

BUY LOT GOLD FOR HEAVIEST YIELD

**HARDY
 DAKOTA 12
 TYPE**

LOT GOLD
 99 1/4% PURE
 90% Germination

AN AUTHORITY CONSIDERS OKLAHOMA AMONG HARDEST ALFALFA

This beautiful golden Alfalfa seed carries a lot of vigor and vitality. Its sturdy character comes from factors that enable the parent plant to withstand wide extremes of temperature. One of the foremost government authorities on Alfalfa visited this section of Oklahoma. He examined the fields and plants. He stated that he considered their alfalfa to be from hardy strains as indicated by variegation of blossom. It takes stamina to withstand extreme heat and drouth and these non-irrigated crops have qualities of strength that pampered plants lack.

From the information we have obtained on this alfalfa seed we believe it to be adapted practically anywhere excepting perhaps under the most extreme winter killing conditions. This alfalfa seed should produce larger yields of hay than northern seed. It should give results equal to Kansas seed which is so widely used in Wisconsin and other northern states. We sincerely believe it will give complete satisfaction in yield and quality. You will not find seed any finer in quality than this premium grade World Brand quality. This beautiful seed was sampled in our December circular. We contracted this seed early by having our men right in the producing section. There is a good supply which may last through the season. Alfalfa, however, is so scarce and this Lot Gold is such a sensational value that we advise you to order at once.

BERRY'S Finest Grade GRIMM ALFALFA

Our Finest Northern Grimm

We sell different grades and origins of alfalfa as described on page 30 and 36 to 39. The greatest possible value is packed into each lot. Grimm is in considerable demand because of its hardiness and the fine character of its growth.

Berry's World Brand Northern Grimm is a favorite among our customers. This seed comes from states designated as "Northern" under OPA price regulations. Seed from these sections is very winter hardy and in Grimm Alfalfa this is especially true.

Supplies Short—Buy Early

We cannot recall a year since alfalfa has become widely distributed that alfalfa seed has been as scarce as it is this year. There probably will not be much price advance because of OPA regulations. However, it is very clear, that supplies will be very

short later so we advise early buying and making a second and third selection when ordering. By placing your order promptly we should be able to ship you this fine Northern Grimm without substitution.

World Brand Quality

There is a sample of World Brand Red Clover enclosed. That is indicative of our World Brand quality in other lines of seed as well. Note the smooth uniform character, the nice bold berries, the high purity and color. Old customers know World Brand represents our finest and best. For years it has satisfied our most critical customers. This is 99 1/4 % pure, 90 % Germination. The sample of Lot Gold sent in our December Circular also shows the character of our World Brand grade. Order it now if you demand the finest quality.

For best success with alfalfa—Inoculate your seed. The cost is low. Returns are large. See page 41.

DAKOTA No. 12 ALFALFA

WORLD BRAND QUALITY

The sample of World Brand Red Clover seed enclosed with this catalog and the sample of Lot Gold Alfalfa sent with our December Circular indicates the character of this fine quality in other lines of seed like alfalfa. This Dakota 12 is one of our most popular kinds. The seed we have is Nebraska grown which many consider the most desirable of all origins. In this state extremes of heat and drought and cold develop a type of alfalfa adapted to wide variations of climate. It is capable of taking a lot of punishment. Many farmers will sow no other kind, claiming it as hardy as Grimm and more productive. We consider it adapted anywhere that hardy Alfalfa is needed.

Compare our values on this fine alfalfa seed. Our price is good as long as present supplies last. Thrifty buyers will be delighted with the saving and the quality will please the most critical farmer. Better Buy Early for Best Selection.

\$30⁶⁰

UNITED STATES GROWN

RED CLOVER LOT LEADER

98% PURE Including Crop Seed

A SEEDING MANY FARMERS PREFER

I am constantly striving to give our customers the kind of seedings and values that will give them the best results for the lowest cost. While farm incomes are on the whole very good, the wise farmer is still watching expenses. The value of Lot Leader lies in its real high quality at a low cost. That is why it is so popular with our trade. By selecting lots of Red Clover seed that have been obtained by our purchasing department to special advantage we can make the value in Lot Leader outstanding in a very practical way. You will find in this Lot a fine clover mixed seeding at low cost.

only
\$16⁵⁰
50 LBS.

Character of Lot Leader

This is made up of quality lots of Red Clover seed. Sometimes we will get in some lots of seed that are beautiful in every way and contain a sprinkle of Alfalfa or Alsike seed, maybe 3 or 4 percent. When we have such lots they are used in Lot Leader. This year our clover seed has come in largely without any lots containing crop seed so Lot Leader is practically World Brand quality. With the Timothy as described below you will have a crop purity of fine quality at 98%. Fine beautiful bright seed.

All High Quality Seed

After figuring a discount on the Red Clover I wanted to lower the cost further without hurting quality or yielding ability. Experience has proved to me that a little Timothy in with clover improves rather than hurts yields. In fact quite a large proportion of Timothy can be used. However, in this seeding I decided that by including a very moderate amount a farmer sowing it would get practically the equivalent of a straight clover seeding. There is enough Timothy to act as a supporting crop for the clover. That really helps as the clovers then grow more erect, there is less loss of clover leaves. The quality of the hay is often superior. Also the clover increases the feeding value of the grass. The timothy content was therefore set at about twenty-five percent.

Cost Only Around \$2.35 Per Acre

Here then is a dandy clover seeding with a little grass having a high crop purity and very free of weed seed. Seven pounds will sow an acre. It should yield fully equal to a regular straight clover seeding. In fact I am certain it will yield more. The seed is all hardy domestic stock adapted anywhere in the U. S. It makes a thoroughly dependable seeding. I consider this the most outstanding value in clover seedings for the year. Buy it and if you are not completely satisfied let me know. I'll have it returned and promptly refund your money plus freight. This is truly a big extra value.

For best results with clover seedings be sure to inoculate your seed. The cost is low. It is easy to apply. A package that inoculates a bushel of seed costs only 50c; and 2½ bu. size 90c. See page 41.

A MONEY SAVING MIXTURE JUST-RITE RED CLOVER WITH ALSIKE AND TIMOTHY

\$10⁸⁰
BU.
45 LBS.

Very Satisfactory

This seeding is still lower in cost than Lot Leader. We have sold this for several years and it has proven very satisfactory and highly popular with our customers. The cost is only \$1.80 per acre as a bushel will sow around 6 acres. Contains plenty of clover seed for excellent stands and the seeding cost is very low. The seed is all hardy domestic seed adapted wherever these crops are grown. The best evidence of its great value is the many repeat orders we receive. Customers who have once used it like the results they get and buy it again when they make another seeding.

The crop produced from Lot Just-Rite is heavy and high in feeding value. It is an excellent soil builder and stores nitrogen in the land as well as increasing the humus content. Our sales records show this to be the biggest seller of its class. There is real economy in this lot.

Gives a Fine Clover Seeding

It contains 50% or better Red and Alsike Clover carefully mixed with Timothy. This runs 30 to 35% Red Clover, 15 to 20% Alsike. When you sow this at the rate of a bushel to six acres you will have approximately 20 Red Clover seeds and 18 Alsike seeds per square foot. A total of 36 clover seeds per square foot and you have the Timothy besides to hold up the clover and increase the yield.

Recleaned Quality Seed

Do not compare this with country run or cheap seed of doubtful quality. We haven't tried to see how cheap we could make this. On the contrary we have made it the best possible value at this low price. It is cleaned seed, carefully mixed. It has the quality to produce good stands.

You can use it for hay, pasture and for soil erosion control. It is an adapted seeding and a good one priced to save you money. If you don't believe you have made a worthwhile saving on quality seed, return it and get your money back including freight charges.

For best results from clover seedings—Inoculate your seed. 1 bu. size package, 50c; 2½ bu., 90c.

RED CLOVER

For
Highest Quality Buyers

When it comes to really building up land for a corn crop you can hardly beat Medium Red Clover. It gets the job done without excessive burning or drought damage. The real quality corn crops come from Red Clover sod. And of course there is good money in hay, seed and pasture crops. To get good clean vigorous hardy stands use Berry's World Brand. This Extra Fancy quality has pleased our most critical trade for years and is distinctly superior to the so-called best grade of many dealers.

ECONOMICAL AND SATISFACTORY—SEE SAMPLE

Berry's World Brand is economical because it requires less seed per acre than average seed. Its extra clean, bright high germinating quality gives the best assurance of getting clean healthy vigorous growing stands of clover. Seed of this hardy home grown top quality seed is scarce this year. Order it now.

THIS SEED IS HARDY U. S. GROWN

Suitable anywhere in the nation where hardy clovers grow.

You will find other grades of U. S. grown Medium Red Clover described on page 9 and priced on page 40. Lot Leader and Lot Just-Rite described on the page opposite this are also U. S. Grown. Postpaid, 1 lb., 60c; 5 lbs., \$2.50.

GETTING GOOD STANDS

Use Berry's World Brand Seed. Avoid heavy nurse crops. Cover seed lightly. Roll if at all possible. Inoculate seed. Inoculation pays well and costs little. Price: 1 bu. size, 50c; 2½ bu. size, 90c. Also see page 41 on inoculation.

**FANCY
BRAND
MEDIUM RED CLOVER**

Medium Red Clover

This is next to our top grade. We often refer to it as Dealer's Fancy because it compares favorably to the best grade sold by many dealers. It is indeed very desirable quality. While it lacks the extra fancy touch of World Brand it is nice bright recleaned seed that will give good results. You can make an extra saving by buying our Fancy grade. We guarantee shipment to satisfy you in every way. This quality pleases hundreds. If we had not been fortunate in having a good local production of Medium Red Clover seed we could not be selling any of these grades at these prices. In fact our supplies would have been very short. Profit by ordering your clover seed early.

\$24 30
BU. 60 LBS.

MAMMOTH RED

Extra Fancy World Brand Quality

Also known as Sapling or Bull Clover. Grows taller and somewhat coarser than Medium Red and is later in maturing. Makes one heavy crop of hay. It makes wonderful pasture or a crop to plow under. Mammoth is longer lived than Medium and many prefer it for pasture purposes. Mammoth is better in a mixture being a perennial.

Mammoth Red is grown extensively in northern states where the season is too short for two crops of Medium. Many farmers in the corn-belt use it where its growth habits fit best into their farming plans. Mammoth Red seed is scarce but we secured one carload of beautiful home grown World Brand quality seed. It is guaranteed to please the most exacting buyer. Another fine bargain is our Planet Brand Mammoth Clover. High quality with a trace of Sweet Clover. \$24.00 bu. See page 40.

\$26 00
BU. 60 LBS.

Planet Brand Medium Red

This grade is also known as Choice quality and is good serviceable seed. Not quite as uniform in appearance as World or Fancy Brand but widely used. Planet Brand is a very good money saving quality. Our lowest priced grade is Square Brand. See page 9 for description and page 40 for prices.

\$22 80
BU. 60 LBS.

ALSIKE CLOVER WORLD Brand

\$24³⁰
BU.
60 LBS.

Our finest quality—guaranteed to give satisfaction and save you money.

This is a clover so valuable, so adaptable to conditions unfavorable to other clovers that many farmers are passing up a good bet when they do not use it. In this World Brand you secure our finest quality. Highest in color and plumpest berries. The grade that has satisfied our most critical trade for years. All hardy U. S. Grown seed.

Alsiike is a fine stemmed perennial clover. Higher in feeding value than Red, greener in color and less dusty. Under favorable conditions stems grow 3 to 5 feet long. Prefers loam to heavy soils. Grows on land too sour for red and is extra winter hardy. It is excellent practice to sow a couple of pounds of alsiike per acre with Red. Helps to secure a better stand and a thicker growth.

Alsiike is economical to sow. It is a smaller seeded clover, 5 to 6 pounds per acre is plenty to sow. Use it alone or with other grasses for hay and pasture. Stands trampling. An extra good clover for pasture and makes wonderful hay.

Alsiike is grown from Oregon to Maine and from Minnesota to Tennessee and other southern states. In the south is used largely for pasture on lower ground. North and east it shows its great value as a hay crop. Extra good on wet land, stands a lot of overflow. Its use however, is by no means confined to wet land. It is generally easier to get a stand of alsiike. Compare our values. Although the seed is relatively scarce we have very low prices and can save you money on this our finest quality.

Postpaid 1 lb., 70c; 5 lbs., \$3.00; 10 lbs., \$5.50.

Lot ECONOMY ALSIKE WITH TIMOTHY

A Popular Seeding With Thousands of Farmers

A special lot and a seeding that our trade takes to in a big way. A bushel sows six acres. That averages about 60 clover seeds per square foot. You have the Timothy besides to hold up the Alsiike. That helps it grow taller and cleaner. One crop aids the other. They will produce a greater tonnage in combination than when grown separately. Makes heavy crops of fine quality hay and pasture. Very nutritious as Alsiike is higher in feeding value than Red Clover.

Lot Economy generally contains 50% or more Alsiike. This is mixed with the Timothy to make a blending and quality that our customers consider a real bargain and a money-making seeding. Do not confuse this with the average combination of Alsiike and Timothy. It is richer in clovers. Requires less seed per acre.

Shipment is guaranteed to please you. You can cut your seed bill. The seed is U. S. grown and hardy anywhere in the U.S.A. If you want to make an adapted seeding and an economical one order Lot Economy. We are sure you will be well pleased.

Be sure to inoculate all legumes. It costs very little and pays big dividends. See page 41.

Dorset, Ohio.
Dear Sirs: I have been using your seeds for years back and I find them the best seeds I can buy. I have saved money on the seed orders I purchased from you. I gladly recommend you as reliable company to deal with.

Yours respectfully,
LAWRENCE S. GIDDINGS.

LOT IDAHO BEAUTIFUL DARK ALSIKE

The finest looking Alsiike seed is generally produced in Idaho. It has that rich dark green color that denotes strong vitality. The berries often are larger. This beautiful seed usually sells at a premium price to trade that demands extra fancy looking seed. We are asking only the difference in freight charges over the price of our regular World Brand. Lot Idaho is of course also World Brand grade. You'll sure be proud to show this great Alsiike value to your friends. It will give you high quality, beautiful color and fine berries at a saving in price. We can't replace Lot Idaho so please order early.

\$25⁷⁰
BU.
60 LBS.

PLANET ALSIKE

This is our Choice grade of seed. A very serviceable grade that can be used at a material saving in seed cost. Does not require any more seed per acre and should produce satisfactory stands. Our customers buy large quantities of this quality every year and are well pleased with it. Color is not quite so dark and seed runs a trifle smaller. You will find it well worth the price.

\$21⁶⁰
BU.
60 LBS.

GIANT INCARNATE OF CRIMSON CLOVER

Resembles Red Clover. Grows up to 2 to 2½ feet. Upright branching plants. Roots deeply. A bountiful provider of nitrogen. Will thrive better than Red Clover on thinner and poorer soils. Very efficient for green manuring. Plowing under a good crop is estimated equal to 20 loads of manure per acre. Stubble plowed under 12 tons. A cheap source of nitrogen. One authority says it's worth \$20.00 to \$30.00 per acre in nitrogen.

\$13⁵⁰
BU.
60 LBS.

Most extensively used in the south as a fall sown crop. We suggest only spring seeding in north where it is a quick growing annual. Prefers cool growing season. Sow 15 lbs. per acre. Our seed guaranteed to please you.

Small lots, postpaid: 1 lb., 45c; 5 lbs., \$2.00; 10 lbs., \$3.50.

TIMOTHY WORLD BRAND

Our Finest Grade—Iowa Grown

The value of Timothy is again being appreciated. It is one of the surest to make a stand. Grows on a wide range of soils and is adapted to a wide area. Helps check soil washing better than straight clovers. Used alone and in combination with clovers and alfalfa to produce money making crops. Hay, pasture and seed crops are all valuable. A seeding lasts several years. Sow 10 to 12 lbs. per acre. Our present prices will save you money.

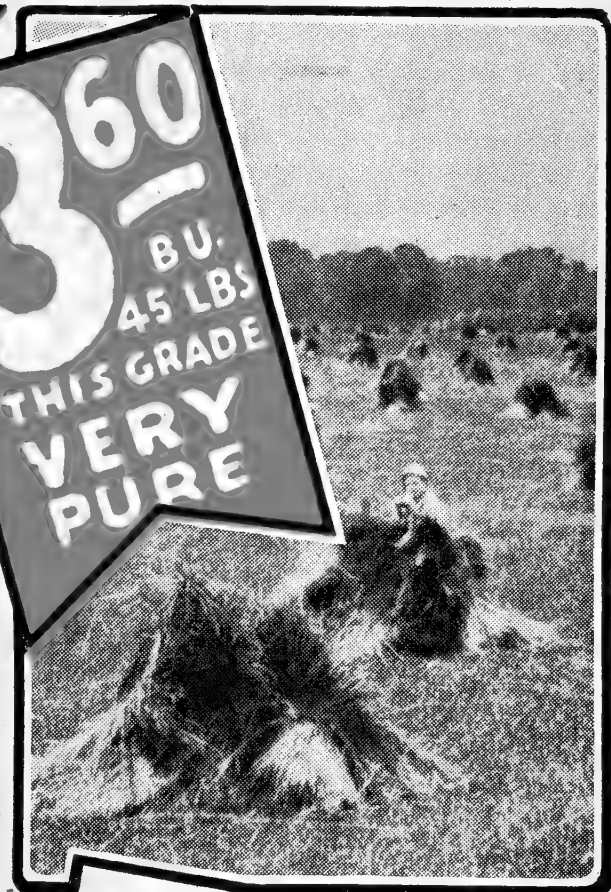

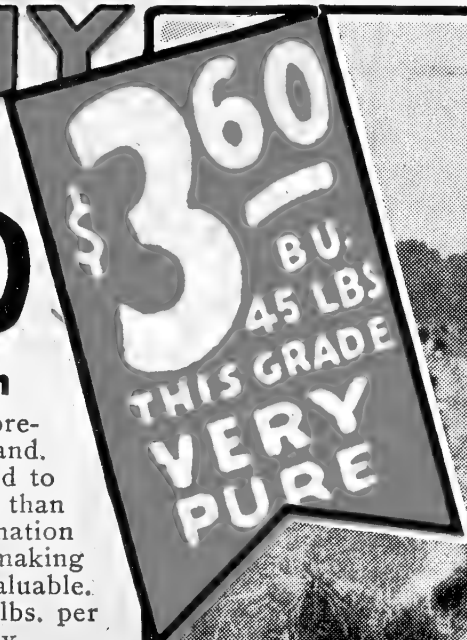

Berry's Quality Prices Low

Located as we are at the door of one of the World's greatest Timothy seed producing sections we have a better opportunity to get the best. Our buying costs are low. Transportation is a small item. For years we have been large handlers of Timothy seed. Our machinery is designed to handle it efficiently. Our experience has taught us much. We handle a large volume. All these factors combine to make our prices low and quality extra nice.

More for Your Money

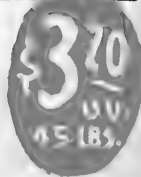

Our World Brand grade is extra fine. That is what our most critical customers have been demanding and using for years. We also have the Dealers Fancy Grade at \$3.40 per bu. A quality and a price to meet every need and a genuine saving guaranteed on each one. Return for refund if shipment not satisfactory. Buy direct. Save Money. Get that extra measure of value and ease the strain on your pocketbook. Our prices are far below O.P.A. ceilings.

Single pounds, postpaid, 25c; 5 lbs., \$1.00; 10 lbs., \$1.80

PLANET TIMOTHY

This is a good average quality of Iowa grown Timothy seed. Very serviceable seed. A little lighter in weight than World Brand and not quite as bright. Has been well recleaned and will compare favorably with much seed used. Cuts seedling costs and gives satisfactory results to a large portion of our trade.

LADINO CLOVER

Beautiful State Certified Seed

Heavy Yielding Giant White Clover

You may have read about this wonderful clover in your Farm or Poultry magazines. They have been talking about its splendid yields, high nutritive value and big profit features. You will be hearing more and more about this great legume for additional experiments are continually showing it has wider adaptability of soils and climate than originally estimated.

It is a rapidly growing perennial legume that grows two to four times as large as common white clover and about six times as big as the English wild white clover. It has creeping fleshy stems that root at the nodes and joints. It covers the ground thoroughly and grows profusely. Reports from Pennsylvania show that Ladino runs close to 30% protein on a dry basis where they recommend it highly for poultry range.

Up to 30 Tons per Acre

This same report showed that Ladino poultry range yielded as high as 30 to 40 tons of green feed per acre. This was based on small enclosures of wire placed throughout the field and clipping and weighing the growth every two or three weeks. An eight acre Ladino range carried 2500 to 3000 head of poultry from late April to late October. On a dry basis the yield was calculated of 5.4 tons per acre.

Adaptability

It was originally recommended especially for the northeastern U. S. Reports from other states show it is highly re-

garded over a wide area. Michigan says it has not equalled Alfalfa in yield but that it can be used for hay, silage or pasture, especially the latter. Kentucky says it outyields ordinary white clover in that state. Oklahoma reports that on the basis of recent tests they consider it will have a place in their pasture program.

In a general way it can be said that it does its best on fertile soils and responds well to fertilizer on poor land, especially phosphorus. Will stand quite a lot of drought and wet although not extremes of either.

Seeding Suggestions

Spring seedings are most general although fall seedings are not uncommon. It is very important that the seed bed be firm. Rolling very desirable. Ladino is widely used with other grasses. Two pounds of Ladino with 6 lbs. of Timothy is a good combination. Less Ladino may be used. For a straight seeding of clover only as much as 3 pounds per acre is suggested. The seed is very small and a little goes a long way. Another good mixture for cattle or poultry pasture is 3 lbs. red, 2 lbs. alsike, 1 1/2 lbs. Ladino with 4 lbs. of timothy or orchard grass. Rye Grass, Red Top and Blue Grass are also suggested to use in combination with Ladino.

While high in price this clover justifies its place on your farm because of its great value. Be sure to use some by itself or in mixtures even if only 1/2 lb. per acre in mixture for it is a clover you should know better for greater profit. Price not prepaid: 10 lbs., \$25.00; 30 lbs., \$72.50. Postpaid: 1 lb., \$2.75; 5 lbs., \$13.25; 10 lbs., \$26.00.

CORN-BELT ALFALFA

This is the type of alfalfa that is very popular throughout the Corn-Belt because of its heavy production and its winter hardiness. Its use however, is by no means confined to the corn-belt. Northern states like Minnesota, Michigan and Wisconsin use this character of seed with very satisfactory results and customers in eastern, western and southern states like it very much. See what other farmers say about it below.

Thoroughly Dependable

We sell this seed in different grades and pack the greatest possible measure of value into each lot. From the lowest to the highest price you will receive seed capable of producing good stands of hardy type heavy yielding Alfalfa. If you demand the finest order World Brand. Each lot and grade is a great value and every shipment is guaranteed to please you. For grades see opposite column.

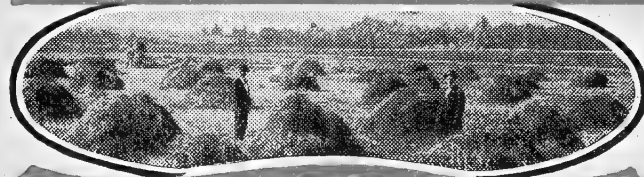

Reg. U. S. Pat. Off

Suggestions on Ordering Alfalfa

1. Don't delay. Order today. 2. Specify second and third choices.

The supply of Alfalfa seed is the shortest it has ever been since the crop has become widely used. The demand for seed will be enormous and therefore some of the grades and lots offered in this book may become sold out. Therefore we suggest that you make a second or third selection when ordering or authorize us to make a substitution if necessary. In case of substitution we will send you the nearest to your order and refund you if the price is lower or write you for the balance if only a higher priced lot is available.

HARDY and HEAVILY PRODUCTIVE

CUSTOMERS' REPORTS ON BERRY'S ALFALFA

Joseph Ash of Otsego, Michigan: "We got some of your World Brand Corn-Belt Alfalfa 2 or 3 years ago. It is doing so good we want some more."

C. A. Foster of Sparta, Ill., says he bought some of our cheapest Corn-Belt Alfalfa 5 years ago. Still going strong. Has another piece of ground ready for more.

Ed Phienheimer of Shipshewanna, Ind., has used Corn-Belt Alfalfa for seven years. Orders more. Says to send it whatever the price may be.

Ivan R. Arnsmeir of Juda, Wis., reports our Corn-Belt Alfalfa gave him four cuttings when his neighbors got only two. He had our lowest priced grade.

Wm. Koutny of Brandon, Iowa, states he obtained a fine stand. Lots better than some who paid five bucks per bushel more for their seed.

Oscar M. Hub of Riley, Wis., says the four bushels of Corn-Belt alfalfa was seeded with excellent results. Well pleased.

Frank L. Wilcox, Galloway, Ohio, wants another bushel and a half like the Corn-Belt he got the year before which gave very good results.

Wm. S. Van Tassel, Antwerp, N. Y., says: "I secured a wonderful stand last year of your seeds, especially of your alfalfa."

Elmer Broedlow of Jefferson, Wisconsin, writes: "Just wish to say the alfalfa I purchased of you last year withstood the drought and ice of last winter. My seeding is excellent although some report their seedings are dead again this year."

GRADES of CORN BELT ALFALFA

Berry's Corn-Belt Alfalfa comes in four regular grades of common. These grades are separated largely according to color and size of berries. Read page 9. There are also special lots of Corn-Belt designated by names such as "Big Krop," etc. We also have the Corn-Belt Grimm such as our World Brand on page 31 and Lots Bonafide and Bed Rock. We have found our Corn-Belt Alfalfa hardy and heavy in production. See money saving prices on regular grades on page 40 and get seed that is suited to corn-belt conditions.

INOCULATE ALFALFA SEED

Better Stands—Heavier Growth

Alfalfa gathers nitrogen from the air. That is why it builds up soils and contains so much protein. But it can do this only when the plant's roots have certain bacteria working in them. You can get these bacteria by inoculating your seed. These bacteria can thus enter the roots and form nodules as soon as the seed sprouts. Then your plants will be healthier, stronger and grow larger. Plants that are not inoculated often turn yellow and die. Inoculation may mean the difference between success and failure.

Berry's Nodule Germ Inoculation is inexpensive. It is easy to apply. Full simple directions with each package. **Price 1bu. size, 50c; 2½ bu. size, 90c.** If this inoculation does not form nodules on the roots of your plants we will refund the price of the Nodule Germ.

Market Conditions

Production in some of the big seed producing sections was very short. There is practically no carryover seed. The demand is enormous. While prices may not advance much due to government ceiling the question will be whether you can get seed at all later in season. It will pay you to buy now if you want alfalfa seed.

Sowing Alfalfa

Get your seed bed as fine and well packed as possible. Sow a little later than Red Clover with a very light nurse crop. Better still a little later seeding after some advance harrowing to kill weeds. In such case sow without a nurse crop. Fifteen pounds per acre is plenty. Do not cover over half an inch. Roll, if possible after seeding. **Inoculate your seed.**

North Liberty, Indiana.
Dear Sirs: Your seeds are the best I ever used. The Yellow Biennial Sweet Clover is certainly the best. Every seed came up. I am well satisfied and can recommend your seeds highly.

Yours truly,
ELDEN KANE.

ALFALFA

Inoculate your Alfalfa Seed. Easy to apply. The cost is low. It pays big dividends. See page 41.

LOT FANCY

A Great Value in Alfalfa

We generally call this our Dealers Fancy Grade because it is a quality that is so often sold as the best in a retail way. It might easily pass for the best if you didn't compare it with an extra fancy quality like our World Brand.

You'll like its high purity and smooth berries. It has good color too. Not quite as bright as the World Brand but plenty nice at that. And it has the growing power to produce good stands. The hardiness is the same as the World. In fact it will do everything the higher priced grade will do. The main difference is in the color and that difference isn't great.

You can save approximately \$2.10 per bushel over our World Brand and compared with average retail prices the savings would be more. You can buy this or any other lot and if you do not think you have made a good purchase and savings don't keep our seed. See Guarantee on page 8. This Lot Fancy is a great value. Buy early.

\$26⁷⁰₈₀

See Page 41 for Inoculation

LOT GOOD SERVICE

\$22⁵⁰₈₀
60 LBS.

Corn-Belt Alfalfa Seed

A low priced grade-extra line value

This is a quality similar to our Square Brand. Thousands of our customers have been using this type of seed for many years. They know the seed isn't the best for looks but they also know by experience that they can get good results from such seed. The great saving in seeding cost is clearly seen in our very low prices. Less expense with satisfactory results, gives plenty of reasons for the popularity of this lot.

The crop from this seed is just as hardy and productive as any of our corn-belt alfalfa. If you don't object to smaller berries and some discolored seed we're sure you'll like it as so many of our customers do.

WORLD BRAND CORN BELT ALFALFA

\$28³⁰₈₀
60 LBS.

We ask every critical buyer to check the savings you can make on this high quality grade. This is Corn-Belt alfalfa at its best. Our extra fancy quality. The highest color and plumpest berries. A grade that nearly always runs 99½ pure. Priced to save you real money. See the sample of World Brand Red Clover seed enclosed. That indicates the beautiful character of this grade. Such seed is always a sound value and we guarantee to save you money on it. We have ample seed on hand as this catalog goes to press and will endeavor to supply it all season long. The wise thing is to get it by ordering now.

The hardy character of our Corn-Belt Alfalfa is described on page 36. The beautiful quality of this seed is sure to please you. This is seed that we consider winter hardy and highly productive. It is this character of alfalfa that has helped build up such an extensive alfalfa seed business for us. Quality to please our most critical trade and a price to suit our keen judges of value. You will appreciate this high grade bargain.

LOT BIG KROP

Choice Quality Corn-Belt Alfalfa

\$24⁶⁰₈₀
60 LBS.

If you want a good serviceable, in between quality, order Lot Big Krop. It is a finer grade than the Honest John (page 30) and the Lot Good Service described above. It is not as smooth and uniform as the extra fancy World Brand described in the opposite column.

It is the same hardy Corn-Belt alfalfa like the others. This medium quality seed has given our trade a high degree of satisfaction for many years. The very low price we have on it makes it a great value that we do not believe can be duplicated anywhere. It is a good practical value for thrifty buyers. Order early while supplies are available.

Chippewa Falls, Wisconsin.
Gentlemen: My father used your seeds for 30 years and would never think of planting any other seeds than Berry's. I have been farming for 14 years and always bought my seeds from you. The seeds always come up, have strong hardy plants and bear excellent crops.

Yours truly,
WM. E. KLEMKE.

EXTRA HARDY ALFALFA

Shipped in a Sealed Bag A Real Value

A selected bargain in medium grade Grimm Alfalfa seed. Honest-to-goodness quality without the extra high color that means higher prices. It is seed of good character; cleaned, good growing power, extra hardy.

Lot Bonafide is Northern Grown of a productive hardy type. It is one of our most popular and biggest selling lots. This grade may sell as a fancy quality. It certainly is a serviceable lot.

We know that a lot of farmers have to watch their expenditures very carefully. That is why we made a special effort to secure seed of this type. We strive to supply the needs of every customer. It is typical of Berry Service to enable you to secure such quality of Grimm Seed at so low a price. Shipment is guaranteed to satisfy you. Any buyer of Lot Bonafide who does not think he has made a big saving can return shipment and get his money back.

Lot BED ROCK GRIMM

\$23.40
BU.
60 LBS.

Our Lowest Priced
Grimm. Serviceable Seed
of Hardy Origin.
Supply Limited Again
This Year. Order Early

Grimm Alfalfa is still in very good demand. This lot places it within the reach of every farmer who wants this kind. This lot is priced very low for such quality. It is a grade that has given our customers satisfactory results. Has good growing power. Produces the same kind of alfalfa as higher priced seed.

This low price is possible because we obtained some Grimm seed that was somewhat discolored. It would not classify for fancy colored grades. Berries are a little smaller. While the germination per hundred seeds is lower there are so many more seeds per pound that this is largely compensated for. Several tests per ounce show more sprouts than an ounce of larger berried kind.

A Heavy Producer

We sell this seed because we know that it has the ability to produce good, strong stands. In appearance it isn't the best but from a practical standpoint it does very nicely. Sow 15 pounds per acre. Shipment is guaranteed to satisfy. If you want to get a start with Grimm at a low cost, order this lot. Customers report it an outstanding bargain.

World Brand Corn Belt Grimm

This seed offered under our famous Corn-Belt name we consider our finest Grimm Alfalfa. That goes for quality, hardiness and all factors concerned. Our World Brand Corn-Belt Grimm is beautiful quality seed, strictly premium grade or 99 1/4 and better in purity and 90% or better germination. This origin seed prior to OPA always sold as Mountain or Northwestern grown brought top prices.

Grimm Alfalfa always used to bring higher prices than Common or Dakota #12. This World Brand Corn-Belt Grimm isn't any higher in price than our World Brand Corn-Belt Alfalfa, the 60c per bushel difference being the higher freight cost into Clarinda. This lot of highest quality Grimm Alfalfa will save you several dollars per bushel on Grimm seed while the supply lasts.

We are sorry the supply of this World Brand Corn-Belt Grimm is limited for on value alone in finest quality Grimm Alfalfa it would be by far our biggest seller.

We suggest as next choice in ordering either Lot Gold at \$26.40 per bushel described on page 30 or World Brand Northern Dakota #12, page 31. Lot Gold is Dakota #12 type also and we consider this nearly as hardy as Grimm. For your protection our World Brand quality alfalfa in Common or Grimm regardless of price is of hardy origin and guaranteed satisfactory.

Beautiful Top Quality NEW CROP ALFALFA

Year's Biggest Value

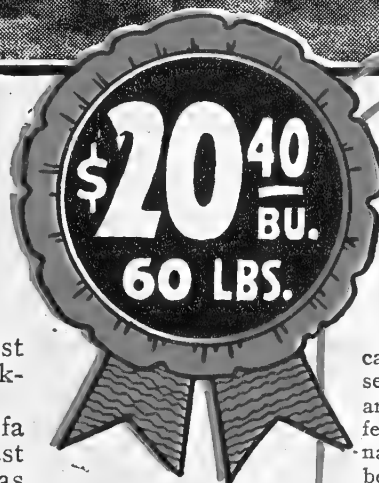

Again Berry customers can get the greatest Alfalfa seed value of the year. Only because of early contracts can we make this exceptional offer. It could not be duplicated on present markets. Alfalfa seed is scarcer than ever this year. That makes Lot Hi-Test a premium value for it is highest quality Argentine seed, dodder and buck-horn free.

This is nothing new to the Alfalfa grower. A great deal of it was used last year and when the alfalfa acreage was expanding so rapidly a number of years ago we sold many carloads of it each season. We never had an unsatisfactory report from any customer.

This seed is being widely used throughout the United States because domestic seed is so short and according to reports we have it is equal in quality and tonnage of hay to domestic seed. See report below. What it has done for others it should do for you.

Federally Inspected Seed

This seed must pass all the provisions of Federal import seed law for purity, germination, etc. The government certainly would not permit importation and unrestricted seeding of this seed if it did not consider the seed suitable for this country. There are some men who would advise against the use of Kansas and Oklahoma seed in northern states like Wisconsin and Michigan yet large quantities of that seed are used there. Many of those northern farmers prefer it to any other. Argentine seed may prove equally satisfactory. We make no claim for special hardiness but we would not sell it if our past experience with this seed did not indicate it gave satisfaction to those who used it.

LOT HI-TEST

This is beautiful seed. Better than 99% purity and 90% germination. Fine, big, bright, yellow berries. You can see just by looking at the seed that it has strong vitality and growing power. Only a difference in price levels between nations makes possible such beautiful seed at such low prices. Domestic seed of similar grade sells up to \$30.00 per bushel. This seed has been stained with a harmless red color as required by import regulations. Shipment is guaranteed to please you in every respect.

Tens of thousands of acres will be sown with this Argentine seed this year. We can fill all orders excepting possibly late buyers. Play safe. Order Lot Hi-Test now.

Past Experience with this Alfalfa

Seven Years in Nebraska

In a letter dated Sept., 1945, Amos Ebel near Falls City, Nebraska, writes as follows: "I have a field of Argentine Alfalfa that was seeded in the fall of 1938. I thought you might be interested in the results I have had with this field. It has always yielded as good a quality and as large a tonnage as any alfalfa I ever had. Two years I had 70 head of hogs running on this field. The past year the stand has started to thin out in some places so I plan to break it up. I can say I am very well pleased with the results I have had with Argentine Alfalfa."

This certainly indicated that this Argentine seed had hardiness as well as yield and quality. Seven years is longer than many plan to keep alfalfa stands.

Inoculate
Alfalfa Seed
1 Bu., 50c;
2½ Bu., 90c

Seed Producing States Use It

Farmers in many of the big seed-producing states like Nebraska, Idaho, Colorado, Utah, etc. use Argentine seed. Wholesalers who supply retail dealers in these states report it is being used in increasing quantities. They want more this year than a year ago which shows farmers were well pleased with results. Our sales last year were heavy in other states like Iowa, Missouri, Illinois, and many eastern states. It should do as well in corn belt states as western ones. We expect the demand for it to be extra heavy this year and have the seed on hand ready for you. With all the evidence of good success with Argentine Alfalfa we would consider ourselves lacking in service if we did not make the seed available to you. It gives you high testing seed at very low cost.

Myerstown,
Pa.

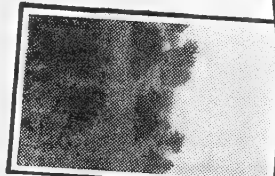

Dear Sirs: I have been getting my seeds from you for twelve years. I get the kind of seeds I want and save money. The Grimm Alfalfa I sowed in 1930 gave me three cuttings of fine hay this year.

Yours truly,
MILES L. RISSER

INOCULATE ALL LEGUMES

Showing difference in yield between crop from inoculated and not inoculated seed.

The cost per acre is small. The extra returns are large. Bigger yields and better soil building.

Inoculation Necessary

No legume can thrive without proper inoculation.

In order to be inoculated there must be a certain strain of bacteria working in the roots of the plants. Then and then only can these legumes take nitrogen from the air and use it for their own growth.

Legumes are heavy users of nitrogen. If they cannot make it for themselves because they lack the proper bacteria, they generally turn yellow and often die. Meanwhile instead of building up your land they are robbing it of nitrogen which is the most valuable plant food. You grow legumes because you want them to store nitrogen in the soil but they will take it away if they are not properly inoculated.

When you buy Berry's Nodule Germ you get a package containing millions of bacteria suited for the crop you specify. You put that on the seed. See opposite column. As soon as the seed sprouts the bacteria start to work and give the plant the power to make its own nitrogen out of the air. We urge you to inoculate. The cost is small. It is easy to apply. We guarantee our Nodule Germ to give satisfactory results. If it does not make nodules on the roots of your plants we will refund the price of the material. See opposite column for prices.

Berry's

Nodule Germ

A Wise Investment

In the opposite column we have explained the necessity of proper inoculation for your seed. Berry's Nodule Germ is one of the best and most economical ways of securing this inoculation. It is very easy to apply. The simple directions are printed on each package. Guaranteed to produce nodules if used as directed or money refunded.

A New Development

Most inoculants are prepared so that you have to buy different packages for different kinds of legumes. For example you buy one kind if you want to inoculate Red and Alsike Clover, another for Alfalfa, Sweet Clover and still another for Soybeans.

Now, Berry's Nodule Germ is prepared by a laboratory that has devised a satisfactory method of combining different strains of bacteria in one package. This will inoculate Red, Alsike, Crimson Clover, and all Alfalfas. You can order as much as you need of Berry's Nodule Germ and use part of it on Clovers and part on Alfalfa, if so desired. It can also be used on Soybeans.

NODULE GERM PRICES

Order size nearest to the amount of seed you want to inoculate. It does not harm the seed if you use an excess amount.

3 Timothy AND CLOVER MIXTURES

AT
LOW
SEEDING
COST

TIMOTHY ALSIKE and RED CLOVER

Regular Grade

**Contains 20 to 25% Clovers
All Hardy U. S. Grown**

An economical seeding but a good one. There is ample clover seed to produce a good stand. At 10 lbs. per acre it provides around an average of 25 clover seeds and at 8 pounds per acre 20 to 22 clover seeds per square foot. The Timothy is in addition. There is a distinct advantage to the Timothy. It supports the clover plants. They grow straighter and taller. There is less loss of clover leaves because there are not so many in contact with the ground. Most of the feeding value is in the leaves.

The clovers help the Timothy. It gets the benefit of nitrogen gathered by the clovers. A number of tests show that grasses contain more nitrogen when they are grown with clovers. It has also been shown that Timothy and clovers grown together will yield more than when grown separately. Thus better quality, larger yields and low cost are big factors in making our mixtures so popular.

Costs around \$1.20 an acre

That is all it costs when sown at 8 pounds per acre. No one can afford to neglect seedings when the cost is so low. Build up your land. Get good hay and pasture crops. The way to big permanent profits is to make liberal clover and grass seedings every year.

**\$6⁷⁵-
BU.
45 LBS.**

TIMOTHY & RED CLOVER HOME GROWN

SUPER GRADE

**Contains 28 to 32%
Red Clover**

Hardy U. S. Grown

**\$8¹⁰-
BU.
45 LBS.**

Red Clover is hard to beat as a soil builder in the corn-belt. It leaves the land in ideal condition for corn crops. The ground works up nice. It is easy to cultivate. There is less danger of burning than with some other legumes. You can be surer of a good vigorous well filled crop of corn. In fact a good grass sod is good too, only it lacks the nitrogen clovers bring. A combination of Red Clover and Timothy gives wonderful results, for you get both humus and nitrogen from the growth plowed under.

Berry's Timothy and Red Clover mixture has always been and long will be a seeding to give you these results. Yes, soil building, soil conserving, and at the same time produces money making hay and pasture crops. Then too it is economical.

The clover grows erect in the Timothy because the grass helps hold it erect. Thus the clover can do it best. Less spoilage; more leaves. The Timothy benefits by the nitrogen gathered by the clover. That increases its feeding value. All this for a cost of around only \$1.50 per acre. Some sow 8, some 10 lbs. per acre. At the latter rate you get around 23 clover seeds per square foot. Three or four clover plants make a wonderful stand. You have the Timothy besides.

Compare any prices on such a reclaimed mixture with Berry's direct-to-you quotations. We guarantee a saving of 20% and complete satisfaction on every shipment. See page 8.

Send us your order. Cut costs. Make a real seeding.

TIMOTHY and HALF AND HALF RED CLOVER

50% Hardy Home Grown Medium Red Clover

For the average corn-belt farm and to the north of the corn-belt Red Clover is the most popular of all legumes. It does not require as much lime in the soil as alfalfa. It is easier to get started. If you do not use too heavy a nurse crop it is easier to get a stand. It fits into corn rotations unusually well because it puts the soil in ideal condition for corn. You can often get pasture the first year, two hay crops or a hay and seed crop the second year, or hay and pasture or green manure. Clover adapts itself to the needs of individual farms in an admirable way.

Sowing Timothy with clover adds to yields, improves pasture and checks soil erosion better. Makes fine hay and lots of it. This half and half mixture is the way many farmers want it. It is a dandy. You will find mixtures of other proportions. The Super about 28 to 32% Clover, the Lot Leader 75% Clover on page 32 and Regular 15 to 20% on the next page. We give you quality at low cost, way below ceiling. Save money on your Clover orders at Berry's.

**\$11²⁵-
BU.
45 LBS.**

North Manchester, Ind.

Dear Sirs: After using Berry's seeds for five years I am fully convinced as to the quality of them. It is to my interest to buy from you. I always speak a good word for Berry's Seeds whenever the occasion arises,

Yours truly,

A. F. STELLAR.

3 POPULAR MIXTURES

Our ready mixed seedings have always been popular. They give a blend of clovers and grasses that produce heavily. They yield more when grown mixed than separately. The cost of seeding is reasonable. All the seed is recleaned and shipment is guaranteed to satisfy you in every respect. Return it for refund if not satisfactory.

TIMOTHY AND ALSIKE

15-20% Clover

Regular Grade Low Cost — Big Yields

An Economical and Highly
Satisfactory Seeding

Costs Only \$1.10 an Acre

A seeding rich in clovers at a very low cost. At 8 pounds per acre you will have around 25 alsike seeds per square foot. It would take around 40% Red Clover mixture to give you that much clover. Makes a wonderful quality of hay. Less dusty than Red Clover and higher in feeding value. Fine for pasture. Checks erosion. A seeding lasts several years. Very popular with our trade because of the satisfaction it gives.

Both Alsike and Timothy are very winter hardy. Alsike being the hardiest of the clovers. It will also grow on soils that are too sour or too wet for other clovers. Timothy and Alsike have the same soil and climatic requirements. They are naturally adapted to growing together. The Timothy supports the clover, enabling it to grow erect, taller and more leafy. The alsike forms a dense mat of clover down in the Timothy and it seems to stimulate the growth of the grass. Thus both do better when grown in a mixture instead of separately.

We know the sections where large quantities of this seed are grown together. The seed is harvested mixed. Because it is so difficult to separate the two we can buy it at a substantial discount below the cost of the Timothy and the Alsike unmixed. We secure the bulk of our seed from these sections. It is processed, cleaned and uniformed. It is passed on to you at prices that are low figures for such fine quality clover rich seeding.

This mixture when sown at 10 lbs. per acre will give an average of 32 Alsike seeds per square foot. It would take about a 50% Mixture of Red Clover to give you as many clover seeds. Alsike seeds are smaller and go farther. This mixture satisfies because it is easy to get a catch, lasts for several years and produces big crop of the finest mixed hay.

We guarantee to save you money on this seed. Ask for sample. Compare for color, purity and clover content. This seed has good growing power. It is truly a remarkable value. We recommend and urge its use because we know it is a seeding that gives satisfaction and the seeding cost is low this year. Buy early and protect yourself on price.

Small Quantities Postpaid any Mixture on this page.

1 lb., 40c; 5 lbs., \$1.75; 10 lbs. \$2.75.

Inoculate Clover Seed
See Page 41

TIMOTHY and RED CLOVER

REGULAR GRADE
15-20% CLOVER

Seeding Cost as Low as \$1.15 an Acre

The same quality of seed that is used in our extra rich grade described on page 42. A very low cost mixed seeding. Contains sufficient clover to give an average of 12 to 13 clover seeds per square foot when sown at 10 lbs. per acre. That costs only \$1.40 an acre. 8 lbs. per acre costs only a trifle over \$1.15 an acre. Satisfactory stands of clover can be secured from such a seeding. All hardy U. S. Grown, cleaned seed. If you want to economize as much as possible, buy this Regular Grade of Timothy and Red Clover mixed. If you don't consider it an exceptional value in every way at this low price, return shipment for full refund.

Dalton, Ohio
Dear Sirs: I have been using Berrys seeds for many years, especially Red Clover. I have often compared with others, but find none to equal Berrys' for quality and price. This year I have the best stand of Red Clover in the community.

As ever, your customer,
S. J. KULA

28 to 32% Legumes

Red Clover, Alsike and Alfalfa in a generous measure mixed with Timothy to form a splendid seeding. This is one of our most popular and biggest selling combinations. Ample clovers to produce a good legume stand. An excellent way to see how Alfalfa will do on your land. A seeding of 10 lbs. per acre averages 30 clovers and Alfalfa seeds per square foot, 8 lbs. per acre 25. This seed is all hardy home grown. All recleaned seed, carefully mixed. Comes ready to sow. Produces heavily. Makes fine hay and very good for pasture. It will build up your land and check soil washing.

Costs only around \$1.60 an acre to sow and that is a really low price this year for such a fine 4 way mixture. No farmer can afford to neglect grass and clover seedings and with this combination you get a good one at small cost. We consider this one of our best mixtures. Our price is guaranteed to save you money and shipment is guaranteed to satisfy you. See page 8. We are sure you will be delighted with this seeding. It is economical, productive and very popular.

VARIETIES AND TYPES

That which we list as Sweet Clover is the White Blossom. Because of conditions in principal seed producing sections it may contain some yellow. Lives two years.

GRUNDY COUNTY BLOSSOM. Matures about 3 weeks earlier than common white. Grows around 3½ ft. high. Lives 2 years. See page 46.

YELLOW BLOSSOM. Lives 2 years. Matures between White and Grundy County. Finer stemmed and leafy. See pages 46 and 47.

HUBAM—Also known as the 7 Wonder Clover. Annual White Blossom that makes its full growth in one year. Be sure to read page 47.

Sweet Clover Seed Limited

There are a number of factors that have reduced the supply of sweet clover seed below that of normal years. Unfavorable weather conditions which cut the formation of seed. Plowing under large acreages of sweet clover in the principal seed producing sections. This was done because the soil building benefits were greater than the profit from limited seed crops. We have good supplies with which to start the season and our prices are below ceiling. You can get excellent value in sweet clover seed at Berry's this year.

Sow early spring like Red Clover. Use 12 to 15 lbs. per acre. Have a firm seed bed and cover lightly.

SWEET CLOVER

WORLD BRAND YELLOW SWEET CLOVER

This biennial or two year yellow blooming sweet clover is finer stemmed than the white which is just one of the reasons, why many farmers like it especially well. Other reasons for its popularity is the ability of the plant to tolerate more adverse conditions such as drought and close grazing or cutting. It will make about as large a growth the first year as the white, 12 to 24 inches depending upon soil and seasonal conditions.

Such a growth can provide a lot of pasture the first season. You can generally begin pasturing in August when it is around 8 inches high and pasture until frost. It also makes fine hay the first year. Cut or pasture so it can go into winter with about 4 or 5 inches of top growth. The yellow will stand closer cutting or pasturing than white. In the second year the growth of yellow will not be as tall and coarse as white. Since the crop is used largely as a pasture the fact that yellow stands more abuse is a big point in its favor. It will bloom and bear seed about 10 days earlier than white. It is a very prolific seed producer and can make you big money as a seed crop. As a soil builder it is very similar to the white.

This World Brand quality gives you the yellow sweet clover in a very fine extra fancy quality. This is our top grade and we guarantee shipment to please you. Lot Sav-Most on the next page is a lower priced lot of yellow and a good value. However, to our customers who consider the best is the cheapest in the long run we recommend our World Brand as the very finest bargain obtainable this year. Price per bu., 60 lbs., \$10.80. Write for special quantity or delivered prices.

60 LBS

BLUE RIBBON BARGAINS
UNHULLED
SWEET CLOVER
ALL RECLEANED SEED
\$4²⁰ at CLARINDA
PER BU.
30 LBS. 1.80. BAGS FREE

Our well recleaned unhulled seed is the best to use for early winter seeding. It is better than hulled seed either scarified or unscarified. Germination is slower. Will not start to grow during a warm spell in winter. Becomes firmly embedded in the soil. Waits until spring, then grows rapidly. Many customers report that the sowing of our unhulled seed early in the winter gave them the finest stands they ever had. Sow about 20 lbs. per acre. Just broadcast it. No seed bed preparation necessary. If convenient cover it a little before growing season starts. Otherwise let nature take care of it.

This seed is fancy cleaned quality that pleases our trade. It is a high grade product and our prices are very low. Compare qualities. Judge values and note the difference. \$14.00 per 100 lbs.

Buy Now—Save Money—Sow Early

Inoculate Your Seeds

Inoculation provides young plants with the bacteria they need to gather nitrogen from the air. Helps assure healthier and more vigorous plants and bigger yields. Easy to apply. Full directions furnished. Cost is low.

Price: 50c for 1 bu. size; 90c for 2½ bu. size. See page 41 for further information. Berry's Nodule Germ is guaranteed.

3 SPECIAL VALUES IN HULLED AND SCARIFIED SWEET CLOVER

LOT WONDERFUL SWEET CLOVER

\$9.90
BU. 60 LBS.

Our Greatest Sweet Clover Value

Fancy Quality

We made a wonderful buy on a large lot of White Blossom type Sweet Clover. It is practically equal to our World Brand Grade and still is \$1.50 cwt. lower in price. It is scarified, high germinating seed and as satisfactory to sow as any seed you can buy. We recommend it because it contains about 5% of mottled seeds which indicates the presence of yellow sweet clover. In our opinion this increases its value as a pasture, makes good hay and a great fertilizing crop.

Our Prices Below Ceiling

You've heard a lot about ceiling prices. You'll find dealers selling all legumes such as Alfalfa, Red Clover, Alsike Clover and Sweet Clover at ceiling prices. A lot of them, as you know from last year's experience, won't have seed for you.

Berry's have not only complete stocks but as always their prices are lowest. On Sweet Clover our prices are over \$1.00 per bushel under ceiling. On the more scarce legumes such as Alsike Clover, Red Clover and Alfalfa the fact Berry's have stocks for you when others have failed should be reason enough for you to order today. But we can save you money too, and give you the widest selection of grade or quality. Order where you know you can get everything. Order of Berry's and your seed worries are over.

SWEET CLOVER Lot DO-MORE

A Berry Special— Favorite of Thousands

This lot stretches your money over more acres than any other. It is our lowest priced grade. It is quality that has been giving our customers satisfactory results. It isn't the finest for looks but the favorable reports we get on it indicate its real value and after all, seed is sown for results.

Lot Do-More has been scarified, thoroughly recleaned and tested. The crop from this seed is the same kind as will be secured from any of the higher priced grades. Sweet Clover is the greatest of all soil builders and the greatest pasture crop.

\$8.40
BU.
60 LBS.

This Grade in Big Demand

Every year we sell large quantities of this grade and this year the quality is improved. As mentioned above it is not the finest looking seed. It has some off-colored seeds in it. The berries are smaller and therein lies the secret of its performance in the field. While the germination per hundred seeds is lower than in the average larger berried grades, this more than offsets the lower test per hundred seeds. The true value of a lot of seed in our opinion, is the number of sprouts per oz. or per pound.

Reduced Seed Costs

Sow 'Lot Do-More at the same rate as higher priced seed. It will save you up to \$1.00 an acre in seeding cost. Thousands use this special lot each year. You too, will be pleased with its performance, and we guarantee satisfaction. This is a special value to save old and new customers alike, money on Sweet Clover.

For better qualities see other special offers on this page and page 46. Be sure to inoculate every legume seeding. See page 41.

YELLOW SWEET CLOVER Lot SAV-MOST

\$8.90
BU.
60 LBS.

Yellow Blossom is a biennial or two-year kind. Somewhat leafier than the White Blossom. Does not grow as tall and coarse. Blooms and matures 10 days to two weeks earlier. Preferred by many for hay. Some claim it is sure to make a stand.

Our Lowest Priced Yellow Blossom

Lot Sav-Most gives you a very low cost on this finer stemmed leafier Sweet Clover. It gives you a lot of value at lowest cost. We sell large quantities of this seed. Naturally it isn't as nice looking as the World Brand on page 47, but we are sure you will find it a real bargain. There are some smaller berries in it. The color and uniformity are not equal to our World Brand but it gives satisfaction to thousands each year.

Sow it alone or in mixture for hay and pasture. Start Sweet Clover this year. It is a money maker. Stands heat and drought. Produces lots of valuable feed and does a wonderful job of soil building. Lot Sav-Most gives you the Yellow Blossom Sweet Clover at very low seeding costs.

Inoculate All Clover Seed

Inoculate with Berry's Nodule Germ. Inoculation helps make more vigorous growth, better stands and yields. Price: 1 bu. 50c; 2 1/2 bu. 90c. Easy to apply. Read page 41. It pays to use it.

3 WORLD BEATERS

SWEET CLOVER

BLUE RIBBON BARGAINS

LOT PEARL

**EXTREMELY
LOW
PRICES
COMPARE ON
A QUALITY
BASIS**

GRUNDY COUNTY

Dwarf Type Sweet Clover

An earlier maturing variety of biennial White Blossom Sweet Clover. Grows around 3½ ft. tall. Blooms about three weeks earlier than the Common Sweet. Matures seed more evenly. Easier to handle because of its shorter growth. It is in big demand where the common grows too rank or where earlier maturity is desired. Only requires 12 lbs. of seed per acre because the berries on this variety generally run smaller in size.

World Brand Quality

We have the Grundy County type only in our finest quality. World Brand has pleased our most critical trade for years. It is scarified, cleaned, tested and shipment is guaranteed to please you in every way. You may compare it with the finest obtainable. If you do not find this a superior value at our low price you may return it for refund. See page 8.

Supplies of this Grundy County type are much smaller than of the common type. Be sure to order

your Grundy County Type Sweet Clover early and save money. There is good money in seed production.

60 LBS.**

A Good Value—Moderately Priced

Lot Pearl is the biennial or two year sweet clover same as the World Brand grade described on this page and the Lot "Do-More" on page 45. The tall growing, big-rooted, long seasoned sweet clover. A leader in production. Unexcelled as a soil builder. Big pasture yields. Enormous hay crops. A valuable money making crop. Average seeding required is only 15 lbs. per acre.

A Medium Grade

Lot Pearl sells at lower prices because it is not as nice looking. If you demand the finest order our World Brand. If you want to cut seeding costs and willing to take seed that has some small berries and some off colored seed, then Lot Pearl should suit you ok. It has the ability to produce good stands. The seed is cleaned and blended. It lacks the appearance and plump berry of our higher priced lots, but many of our customers have used a grade like this for many years and they are well pleased.

Compare Values

Lot Pearl is like our choice grade. There are a good many more seeds per pound than in the World Brand. If you would weigh out an equal weight of seed out of both grades and test all of the seeds in each pile you might find the larger number of sprouts in the lower priced seed. It is important to remember that while the germination per hundred seeds is lower in the cheaper grades, that larger number of seeds per pound tends to equalize that difference.

**Don't sow without inoculating.
Costs very little. 50c bu., 2½

WORLD BRAND SWEET CLOVER

Do you want the satisfaction of knowing you have the best? Do you like to compare values with your neighbor and prove that you have the finest quality and the biggest bargain? Order Berry's World Brand, for it is our finest and best. A first class quality in every way. See the sample of World Brand Clover enclosed for the fine character of this grade. Consider quality. Then compare prices. You'll see genuine savings and you will receive beautiful seed.

Sweet Clover has been one of our specialties for years. We were the first to feature it as a main farm crop in a big way. These many years of specialization have taught us much about the great crop and about handling sweet clover seeds. Our buying contracts, cleaning and scarifying machinery, large volume, etc., enables us to give you values such as this. When you sow World Brand you sow our finest. There is no seed that would give you better assurance of success.

Sweet Clover is a crop of great value. Its enormous pasture capacity, its big seed yields, its heavy hay crops, its marvelous soil building power, these are all money making features. Cash in on them in the fullest degree by sowing Berry's World Brand. Sweet Clover seed supplies are not large this year. We can take good care of your order if you will send your order early. Do not wait until late in the season. Assure yourself of the seed you need and have it on hand at the same time you need it by ordering now.

SAVES ⅓—KNOW HE'S GETTING THE BEST

Binghamton, N. Y.
Dear Sirs: I have used your seeds for some time and I have had good results. I have used other seeds, but they are too high. I save about a third in buying from you and get better results.

Yours truly,
MIKE ZOPP.

SEVEN WONDER CLOVER

ANNUAL HUBAM SWEET CLOVER

\$14.90
BU.
60 LBS.

The sensation of the Sweet Clover family. It makes its full growth the first year. Sow with a nurse crop, get a full crop in the fall. Makes hay equal to alfalfa in feeding value. Big money in seed crop. Unusual for pasture, contains cumaren, less danger of bloat than Red Clover and Alfalfa.

Seven Points of Superiority

1. Makes its full growth the same year it is sown. Cash in on hay, pasture and seed.
2. High in Protein 20 to 25%. Fine feed, excellent for dehydrating and grinding for stock feed.
3. Wonderfully fine for fertilizing. Stores an abundance of nitrogen in the soil. A legume of exceptional possibility.
4. An excellent pasture crop. Produces big yields of hay rich in feed value.
4. A good honey producer. Blooms abundantly. It also is a fine drought resister.
6. A Profitable cash crop when saved for seed. Yields up to 10 bushels per acre.
7. Helps control root rot by giving you a quicker rotation. Keeps soil healthier.

The Wonder Clover

That Does Two Years Work in One

Ordinary Sweet Clover blooms and bears seed and does not make its full growth until the second year. Hubam, the annual Wonder Sweet Clover, gives you its full and complete production the same year you sow it. Makes a growth up to 6 feet and taller depending on soil and season. That indicates its tremendous yielding capacity for hay or as a pasture.

Yields of up to 4 tons of hay per acre have been obtained from Hubam. With a protein content of 20 to 25% on a dry basis you can see what a valuable crop that makes. You can sow it with spring grain or on winter wheat and generally begin pasturing a few weeks after grain is removed. It affords pasture until frost. It is a remarkable drought resister and furnishes feed when you need it most.

Two Cash Crops in One Year

Sow Hubam seed with a nurse crop. Get cash for your grain. Harvest a crop of Hubam seed in the fall for more cash often than for a grain crop as it yields up to 10 bushels of seed per acre, sometimes more. You can turn it into cash too, when used for pasture or hay.

The soil building value of a crop plowed under should be good for a 20 bushel per acre increase in corn the next year. Hubam plowed under does not come up again next year as often happens if ordinary sweet clover is plowed under the same fall. There is a big cash money too, if you will keep some bees near Hubam. It is a wonderful bee pasture.

Adapted to All States

Hubam can be grown in every state in the union. Here are a few reports which give further indication of the value of the crop and its wide adaptability. **Minnesota**—Planted May 22nd, going to seed Sept. 2nd, up near Canadian border. **Iowa**—Sowed May 4th, bloomed July 4, made 600 lbs. of seed per acre in the fall. **Ohio**—Stands temperatures as low as 20° in spring after seed had sprouted. **Colorado**—Dryland 7000 elevation. Hubam grew up to 7 feet. Tap root 1 inch in diameter. **Arkansas**—Made a growth up to 7 feet in 3½ months on light sandy soil. **Ohio**—Stayed green throughout a drought period when other clovers were drying up. **Maine**—Roots covered with nitrogen gathering nodules. Grew up to 8 feet.

Buy Extra Fine Seed. Start Now

Learn what Hubam can do for you. We have some of the finest quality seed we have ever handled. It is Extra Fancy World Brand Grade. High purity and germination. You don't see any nicer seed. Supplies still scarce but we can take good care of early orders. Sow 12 to 15 lbs. per acre in early spring.

Small lots postpaid: 1 lb. 50c; 5 lbs. \$2.25; 10 lbs. \$3.75.

MIXED SWEET CLOVER LOT PREMIUM

An Extra Value

This is a very remarkable value in biennial sweet clover. It is a strictly fancy quality of seed that would pass for the best in many cases. The seed has good color, size, purity and germination. You can buy this very fine seed at a discount because it has some yellow mixed in it. That does not lower its value for practical purposes. In fact, many prefer a mixture as it provides a fine pasture and also makes good hay. Do not confuse this with low grade mixtures sometimes sold. This is very nice quality. The seed is mainly white blossom. Lot Premium has the quality that pleases particular customers and the price will save you money.

Build Better Profits

Now is the time to build up soil fertility. There is no crop that will do it quicker than Sweet Clover. Adds nitrogen; restores humus; makes soils perform better. At the same time you get good returns in hay and pasture production. Sweet Clover has long been one of our specialties, and this lot is an extra value. Please order early.

Inoculate all Sweet Clover seed. 1 Bu. 50c; 2½ bu. 90c.

YOUR HOME GARDEN SAVES YOU MONEY

PLANT A COMPLETE GARDEN THIS YEAR

EAT THE BEST FOOD NATURE PROVIDES

Your own garden can provide you with delicious vegetables at their very peak of flavor and quality. Grow your own and eat or can them when they contain the most vitamins and at the right maturity. Plan a succession of plantings to prolong the period of finest quality foods for your table.

Difference in seed planted may make a big difference in the quality of food you raise. Berry's select varieties that are noted for quality and productiveness. We constantly strive to secure for our customers the kind of seeds that will please you in every way. See our guarantee on page 53. It is the recommendation of our customers that makes the fame of Berry seeds spread nation wide. Let us take care of your needs too.

and PROTECT YOUR Family's HEALTH and PROSPERITY

Raising lots of fresh vegetables for eating and canning not only insures you and your family better health but also adds greatly to your farm income. Surveys made recently show that the most successful farmers today are those who raise a big home garden. The whole family can take a part in it and the garden is the backbone of successful farm management. It also trains the children in a family to do their part and they here may learn the vital importance of assuming responsibility in contributing something vital to their own family's welfare.

We all know fresh vegetables from our garden taste better than any we may buy. There is also nothing like home canned foods. But some of you may not appreciate how far on food or living costs your own garden will carry your family. Government economists say a $\frac{1}{2}$ acre farm garden will save up to \$200 on food costs for the average family of 5. By using Berry's bulk seeds you get more seed for your money. See page 53 and our big collection offers on pages 49 and 53. You may get enough seed to plant 1 acre of all vegetables for as little as \$3.90.

GERMAIN'S HOTKAPS

Crop insurance at low cost enabling you to market your vegetables three weeks earlier and insures finest quality. (Pictured on page 52.) Hotkaps are "individual hothouses" for each plant giving protection and forcing plant growth. They allow the proper amount of air and light for quickest plant development. Hotkaps are used to protect any flower or vegetable, being particularly adapted for vine crops.

Complete instructions given with each size package ordered or get our free circular before ordering. Postpaid prices: 25 Kap (Home Garden) size with paper setter, 50c. 100 Kap Size with fiberboard setter, \$1.95. 250 Kap Size with setter, \$3.50.

Not prepaid: 1,000 Kaps without Setter, \$11.00. Weight, 28 lbs.

THE BEST ANSWERS TO GARDENING QUESTIONS

FREE CROP BULLETINS! SEE LAST PARAGRAPH

Every farmer and gardener can increase their yields and profits by reading the valuable and practical Free Bulletins distributed by the U. S. Department of Agriculture, the State Experiment Station in your own State, and your own County Agent.

There are several very good Victory Garden Bulletins which will enable you to increase your crops of vegetables without increasing your garden space and without increasing your investment. Different varieties do best in different localities. Some varieties are better for home canning and others for marketing.

The Free Bulletins on the planting and care of Fruits, Berries, Roses, Shrubs, Windbreaks, etc., are almost indispensable. Your County Agent can usually tell you which Bulletins to secure and where to write. If you have no County Agent, write your U. S. Senator or Congressman or write to the Division of Publications, Office of Information, U. S. Department of Agriculture, Washington, D. C.

DO NOT ORDER THESE FREE BULLETINS FROM THE BERRY SEED COMPANY AS THEY CAN ONLY BE SECURED FROM A GOVERNMENTAL OFFICE.

ORDER NOW BERRY'S TELL YOU WHAT AND HOW TO PLANT

With an order for \$1.00 or more of garden seed we will send you FREE, if requested when you order, a very valuable planting guide. This is a fine book packed with information on how to grow different vegetables and a great many general garden helps. See page 67 for another FREE book offer. If you want to be sure of an excellent variety selection and save the most money, order our Lucky 7 or Family Farm Garden pages 49 and 53. See pages 53 and 63 for insecticides.

SEE POST CARD ENCLOSED

You will find enclosed in this catalog a post card addressed to the Berry Poultry Farm of Clarinda, Iowa. This is a different firm than the Berry Seed Co. While there is no connection between these companies we are sure you will be well pleased with any dealings you may have with the Berry Poultry Farm. Mail this card promptly and you will hear from them direct. They will send you free large poultry catalog, printed in colors.

I WANT EVERY GARDENER TO "TASTE THE DIFFERENCE" OF THESE 8 FAVORITE VEGETABLES. A NEW THRILL AWAITS YOU IN THEIR EXTRA DELICIOUS QUALITY

Charles Sinn, our general garden seed manager, is now president of Berry Seed Company.

THE BEST NEW DWARF GREEN BEAN

LANDRETH'S STRINGLESS An Improved Burpee's Bean

For years everyone has planted the old standby, Stringless Green Pod Beans, in their garden. It has given satisfaction—just as the old "Model T" did in the days gone by. Now we are able to give you something new and much better at little extra cost. Did you ever stop to think how little your garden seed costs? But my, what a difference there can be—something you must see for yourself.

Be sure and try this one now. It is more prolific than the old Burpee's, much better quality and more hardy. It is disease resistant—will thrive anywhere. Make a succession of plantings this year. You need at least 2 pounds for your garden. Our stock is western grown, hand-picked and polished, germination about 95%. There is no better seed or variety than this for the home garden. Lot No. 135— $\frac{1}{2}$ lb., 20c; 1 lb., 35c; 2 lbs., 60c, postpaid. Other Beans, pages 54-55.

Nutrition experts are now urging us to eat more fresh vegetables. All 8 of these are important in our daily diet for health. Grow these at home—they'll taste better and save you a lot of money on food costs at our introductory offer of all 8 for only 75c, postpaid; you save 45c. Order No. 52X—Delicious fresh vegetables such as these are delicacies that cost little.

OUR BEST-A FAVORITE OF THOUSANDS

Berry's Beat-'Em-All Radish

Think of it! Crisp, snappy radishes ready to eat 20 to 22 days after planting. A decidedly superior bright scarlet, globe shaped variety, mild, tender. Extra early variety of superior quality for home or market. Save money by buying enough for a succession of plantings and enjoy fresh radishes all summer. Lot 527—Postpaid: Pkt. 15c; oz. 20c; $\frac{1}{4}$ lb. 75c; $\frac{1}{2}$ lb. \$1.25; 1 lb. \$2.00.

Radishes, Also Page 65

AN EARLY TOMATO OF WONDERFUL QUALITY

Berry's Early Wonder Tomato

A favorite with home and market gardeners for years. The very earliest tomato that gives you unsurpassed quality. The color is a deep, glossy, bright, brilliant red. The skin is smooth. The thick meat is finely flavored. The fruit is nearly round

and large in size. Has a small seed cavity, firm but juicy flesh. A vigorous grower, it bears enormous crops, over a long period. Grow this tomato for the earliest finest quality fruit. Lot 656 Postpaid: Pkt. 15c; $\frac{1}{2}$ oz. 35c; oz. 50c; $\frac{1}{4}$ lb. \$1.50; $\frac{1}{2}$ lb. \$2.75.

Other Tomatoes, Page 50

Berry's Tenderflesh Carrot

The finest health giving vegetable at its best. Crisp, tender, delicately flavored flesh makes this a garden favorite with anyone who grows it. Supreme quality. Coreless, distinctive cylindrical in shape with very little taper, its flesh has a deep rich orange color. This is a very early maturing strain developed for home gardens. Some say it is the favorite vegetable in their garden. Be sure to try it! Lot 210—Postpaid: Pkt. 15c; $\frac{1}{2}$ oz., 25c; oz., 40c; $\frac{1}{4}$ lb., 75c; $\frac{1}{2}$ lb. \$1.45; 1 lb. \$2.75.

EDIBLE SOY BEANS

Bansei

Try some of this very nutritious different bean. Especially desired for meatless days. Soy Beans are high in proteins and will add real tasty nutrition to your meals.

Bansei is an early variety which will ripen in all parts of the country. Used for both green shelling and dry like navy beans. The seeds are large, round, yellow, and of a mild pleasing flavor.

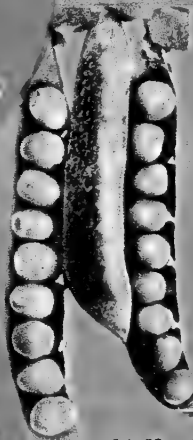

A fine home garden variety that is very productive and not susceptible to shattering. The plant is of medium height, and the pods are yellow with black tinge when ripe. 96 days from planting to eating. Lot 120—Pkt., 15c; $\frac{1}{2}$ lb., 20c; 1 lb., 35c; 2 lbs., 60c, postpaid.

Berry's Supreme Wonder Pea

Named because you will marvel at its quality and production. A dwarf wrinkled variety growing vigorous dark green pods about 20 inches high. They are loaded with pods filled with dark green peas. You have never tasted peas so tender, so sweet, so delicious. The best there is for your garden. Plant at least two pounds at different times so you will have plenty for canning. Lot 464—Postpaid:

$\frac{1}{4}$ lb., 15c; $\frac{1}{2}$ lb., 27c; 1 lb., 45c; 2 lbs., 80c.

See Also Pages 62-63

AN EXTRA FINE EARLY CABBAGE

Berry's Earliest Cabbage

We challenge you to beat this variety anywhere for earliness, quality and productiveness. A round head type cabbage that starts with a bang, heads in a hurry and is ready for the table before most kinds curl up its center leaves. Heads are firm, color bright green. Rich flavor. Grows compact so may be planted closer together than most varieties. For the first cabbage in your own garden, plant this. Lot 180—Postpaid: Pkt., 15c; $\frac{1}{2}$ oz., 20c; oz., 35c; $\frac{1}{4}$ lb., \$1.00; $\frac{1}{2}$ lb., \$1.75; 1 lb., \$3.00.

Later Varieties, Page 57

Page

Page 56

BERRY'S TOMATOES

Rich-Juicy

EXTRA EARLY SELF DETERMINATE KINDS

The varieties in this group have been developed for Extra early production of good sized fruit. They all yield very heavy crops on small stocky plants. They need no pruning since the plants are of dwarf type. If you live in the Great Plains area, from North Dakota and Montana to Texas, these varieties will grow best for you. If you have limited space and want neat compact tomato plants that really produce, order some of these varieties.

651 All Red. Needs no pruning. A fine first early variety with the good qualities of Bison plus large smooth fruits without green top or green core. Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$2.00, Postpaid.

658 Victor or Bounty. A new variety from North Dakota. Bears a huge crop of large smooth globe shaped fruit on a small sturdy plant. Actual counts have shown more than fifty fruits on a plant at one time. The fruit are scarlet and without green core or green top. 60 to 70 days from planting to eating. Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$2.00, Postpaid.

654 Bison. The old reliable mother of the above new varieties. Bison has proved through the years that tomatoes can be grown in a short, hot, dry season. 60 to 70 days. Large fruit, self determinate plant. Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$2.00, Postpaid.

INTERMEDIATE OR SECOND EARLY SORTS

664 Rutgers. The outstanding new variety in its class. Really an improved Marglobe maturing a little earlier and being a heavier yielder. It ripens from the inside out to a uniform bright scarlet color. Thrives under more unfavorable conditions than other varieties. Pkt. 15c; ½ oz. 20c; oz. 28c; ¼ lb. 80c; ½ lb. \$1.45.

674 Bonny Best. Earliest of all tomatoes in this group. Fruits medium large, apple-shaped, smooth, solid, bright scarlet in color, of excellent quality, setting in clusters of 4 to 8. Unexcelled as a general purpose tomato. Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$2.00.

665 Marglobe. A most popular all-purpose variety, very vigorous and productive, disease resistant. Uniformly large solid fruits, bright scarlet, of finest quality and flavor. Pkt. 19c; ½ oz. 30c; oz. 50c; ¼ lb. \$1.75; ½ lb. \$3.25.

672 Prichard. A new disease resistant early variety producing ripe fruit in about 75 days. Large globe shaped fruit ripening to a deep red both inside and out. A heavy producer on rich soils. Pkt. 10c; ½ oz. 30c; oz. 50c; ¼ lb. \$1.75.

652 John Baer. An old favorite with large smooth scarlet red fruits of excellent flavor. Pkt. 10c; ½ oz. 30c; oz. 60c; ¼ lb. \$2.00; ½ lb. \$3.75.

RUTGERS

JUNE PINK

650—68 days. The earliest pink variety. A fine first early shipper. And favorite with home gardeners. Fruits are medium sized, smooth, and very attractive. Produces throughout the season. Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$2.00, postpaid.

Oxheart

this giant of all tomatoes—a favorite of thousands. making it fine for slicing. Vines are vigorous and productive, fruits large, oblong-purplish red, thin skinned and solid. Recommended for superior flavor. Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$2.00.

663 New Stone. An old reliable home garden type. Very productive, fruits large, smooth, attractive scarlet-red, of fine flavor. Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.00, prepaid.

671 Oxheart—A distinctively attractive variety entirely different from any other tomato. Increasing in popularity each year because of its very solid meaty fruits of a delicious sub-acid flavor, almost seedless, the fruits grow extremely large and heart shaped. Flesh is pink. A favorite of thousands for the home garden. Pkt. 10c; ½ oz. 60c; oz. \$1.00; ¼ lb. \$3.00.

SMALL FRUITED VARIETIES FOR PRESERVES

CAN LOTS OF TOMATOES FOR YOUR DAILY DIET**

BERRY'S SWEET CORN HYBRIDS

**HYBRIDS
ARE SWEETER**

Why pay more for Hybrid sweet corn? Because Hybrids outyield open pollinated varieties, have large more uniformly shaped and filled ears, are sweet (actually contain more sugar), and Hybrids are disease resistant. You don't throw away half your crop because smut is in the ears when you plant Hybrids.

Plant early, midseason and late varieties on the same day. This will give you a succession with less labor.

**HYBRIDS ARE
MORE UNIFORM**

EARLY

SPANCROSS

64¢
LB.

70 Days from planting to eating. An extra early golden

Hybrid with cold resistance. Can be planted in April in all but the most northern states. Medium sized ears—short stalks. No. 291X—Pkt. 15c; ½ lb. 34c; 1 lb. 64c; 2 lbs. \$1.19 Postpaid.

MIDSEASON

MARCROSS

56¢
LB.

76 days. A fine market and home-garden variety. Stalks are short but sturdy, highly resistant to bacterial wilt. Ears are long and plump with 10 to 14 rows of medium broad kernels of finest quality. No. 294X—Pkt., 15c; ½ lb., 30c; 1 lb., 56c; 2 lbs., \$1.02, postpaid.

62¢
LB.

GOLDEN CROSS
80 days from planting to eating. A main crop variety that has proved its value over a number of years. Grows 6 feet tall, produces two or more ears per stalk. Ears 8 inches long, 10 to 14 rows, very uniform in size and shape. No. 276X—Pkt., 15c; ½ lb., 33c; 1 lb., 62c; 2 lbs., \$1.15, Prepaid.

60¢
LB.

TENDERGOLD
81 days from planting to eating. An outstanding main crop variety, grows 6½ to 7 feet tall. Produces best quality fodder. Ears 7 to 8 inches long with 10 to 14 rows. Highest eating quality. A dandy for the farm garden. No. 275X—Pkt., 15c; ½ lb., 32c; 1 lb., 60c; 2 lbs., \$1.10, Postpaid.

LATE

LINCOLN

67¢
LB.

85 days from planting to eating. A new main crop variety with unusual qualities. Drought tolerant, stiff-stalked plants grow 7 to 7½ feet tall. Produces 12 to 14 rowed ears with husks so tight that earworm damage is very small. If you are troubled with wormy corn, plant this beautiful golden hybrid for your main sweet corn crop. No. 283X—Pkt., 15c; ½ lb., 36c; 1 lb., 67c; 2 lbs., \$1.25, postpaid.

EARLIGOLD

66¢
LB.

Berry's "Best Early" Yellow Sweet Corn

72 days from planting to eating. A good sized extra early variety growing 5½ to 6 feet tall. Ears are uniform, 12 to 16 straight rows well filled tips, 6½ to 7 inches long. Extra fine quality. No. 280X—Pkt. 15c; ½ lb. 35c; 1 lb. 66c; 2 lbs. \$1.23; Postpaid.

66¢
LB.

IOANA
83 days from planting to eating. A main crop "All American Winner" producing especially attractive ears. Grows 6½ feet tall with good drought resistance and few suckers. Ears are 8 inches long with 12 to 14 rows, very uniform, cylindrical, and well filled. Exceptionally sweet and well flavored. A really outstanding golden variety. No. 282X—Pkt., 15c; ½ lb., 35c; 1 lb., 66c; 2 lbs., \$1.23, Postpaid.

Quality Gardens at Lower Cost

MORE AND BETTER SEED FOR LESS MONEY

Special savings when you buy in bulk. When we speak of "Bulk" seed we mean in lots of ¼ pound, ½ pound, 1 pound, or larger lots instead of in packets. The average packet is intended mostly for the small gardener. When you buy in the larger quantities you get a lot more seed for your money and make big extra savings.

There is no investment that we know of which will bring you as big a return as your garden seed purchases. At the same time when you plant a larger garden the seed cost is something the average person does consider. We have heard seedsmen and others say, "Oh, people have lots of money nowadays and will pay lower prices." That may be true but we

are old-fashioned enough to believe that there are still plenty of people who watch their expenditures and appreciate getting good value for their money.

Of course, a low price alone is not the full proof of a big value. It is the quality that counts. We do not claim to have the lowest prices of all on garden seeds but we do believe you will receive more in actual value; that is in quality, productiveness, flavor, etc., when you mail your order to Berry's at Clarinda. Each year we send tens of thousands of seed orders throughout the nation. We have been doing this for years and we are sure we can please you too and save you money on your seed bill.

QUALITY That Really Satisfies

The quality of your vegetable crops depends in part on the fertility of your soil and partly on weather. However, no matter how fertile your soil or how favorable the weather you will not have the finest quality unless you plant seed of the improved and twice tested varieties. We at Berry's pride ourselves not in novelties but in the best of quality that brings you delicious flavor along with heavy productions. So you will find here in this book the best of the new and older varieties that make for real satisfaction from your garden.

►BERRY'S GUARANTEE◄

Our large garden seed business is built on the firm foundation of thousands of satisfied customers and each year new thousands find Berry's value outstanding. Our seeds are all laboratory tested and produced by dependable growers.

We positively guarantee our garden and flower seeds to grow. If they fail to grow due to poor germinating quality of the seed we will replace such seed free of charge. Safe arrival as well as satisfactory quality are also guaranteed.

It is easy, safe and economical to order by mail. Save money and buy on an unqualified replacement guarantee.

BERRY'S FARM FAMILY GARDEN

Will plant an acre to delicious, heavy yielding vegetables

This is a collection of garden seeds designed especially for farm or large city gardeners. The selection of varieties and quantities has been made in cooperation with state authorities. This new revised assortment represents in our opinion the fullest measure of quality and value we have ever sold.

This collection will provide your family with an abundance of delicious, crisp fresh vegetables and plenty left for canning and storing. Each variety has been selected for its fine

quality, excellent flavor and heavy yield. By making it an all high quality assortment it saves you a lot of time in making out your order. We save time in filling orders, as we can put up these collections in spare moments. Save on living costs by growing a fine garden. Save on garden cost by ordering this Farm Family Garden which contains the following seed. This has a regular catalog value of \$4.70. Average retail price would probably range around \$5.50 to \$6.00.

BERRY'S BUG-DUST Kills Bugs and Insects

\$1.00
SPECIAL

A 2½ lb. carton of this famous Bug-Dust-O-Cide together with a duster. Full directions given. Ideal for the average gardener. Price is postpaid. If you do not have dusting equipment be sure to try this \$1.00 special.

Prepaid prices on a fine Insecticide

This is a powerful combination of Rotenone, Lethane Cupro-cide and Nicotine. It has a triple action on certain insects—as a stomach poison, a contact poison, and as a repellent. It is non-poisonous to humans and domestic animals when used as directed.

Bug-Dust-O-Cide controls aphids, bean beetles, flea beetles, leaf hoppers, cabbage worms, cucumber beetles, potato beetles, and certain other insects. Bug-Dust-O-Cide also controls certain plant diseases. Try it on mildew or other fungus diseases.

- 1 lb. Bug-Dust-O-Cide Sifter Can—35c.

GARDEN INOCULATION FOR ALL BEANS AND PEAS

BERRY'S GARDEN BEANS

Famous for Their Tested Quality

Beans, Peas and Sweet Corn require a large part of your total gardening space. Therefore in connection with Beans and Sweet Corn on these two pages also refer to pages 62-63 for Peas. In planning how much room you need figure an average family of 5 persons for the quantities shown in our "Lucky 7" Collection, page 49, or a total of 5½ pounds.

Garden Inoculation for All Beans and Peas

Inoculate your bean and pea seed this year and get the added benefits these nitrogen supplying bacteria will give to your legumes. Uni-Culture inoculation is prepared for all garden legumes. Beans, Peas, Sweet Peas, Edible Soy Beans, and Lupines can all be inoculated from the same package. A 10c package will inoculate up to 10 pounds of seed. You can't make your treatment too strong since Uni-Culture is not harmful to seed.

No. N-10—Will inoculate up to 10 lbs., 10c, postpaid.

GREEN PODDED BUSH BEANS

136 Full Measure. A round pod stringless variety very desirable for canning. Produces a large crop with very fleshy straight pods 6 to 6½ inches long. 54 days from planting to picking. Pkt., 9c; ½ lb., 21c; 1 lb., 37c; 3 lbs., 95c, postpaid.

116 Tendergreen. (See picture at right.) Hardy and prolific. Light green pods 7 in. long are round, meaty, tender, stringless. For the home garden, canners or truckers. Postpaid: Pkt., 10c; ½ lb., 22c; 1 lb., 38c; 3 lbs., \$1.00.

134 Burpee's Stringless Green Pod. The old favorite garden bean for home, market or canning. Plants sturdy, very prolific. Pods round, fleshy, perfectly stringless and of excellent quality. Postpaid: Pkt., 8c; ½ lb., 18c; 1 lb., 33c; 3 lbs., 88c.

132 New Bountiful. An extra early green podded variety ready to pick in six weeks. Vines vigorous and productive. Brittle, meaty and tender, absolutely stringless, and of fine flavor. Postpaid: Pkt., 8c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 95c.

133 Giant Stringless Green Pod. One of the favorite stringless podded sorts. Pods round, meaty, brittle. Stringless throughout entire growth. Heavy producer. Postpaid: Pkt., 8c; ½ lb., 19c; 1 lb., 34c; 3 lbs., 92c.

125 Tennessee Green Pod. One of the earliest snap beans, pods long, flat, dark green, of excellent flavor. Plants hardy and productive. Postpaid: Pkt., 8c; ½ lb., 19c; 1 lb., 34c; 3 lbs., 92c.

BEETS OF QUALITY

CHOICE TABLE BEETS

Beets should be planted both in Spring and Fall. Will keep fine stored in pit or may be canned. ½ ounce will plant 25 feet of row. Plant about 1½ inches deep about 2 inches apart in row. Make several plantings about one week apart. Average person requires 10 pounds per year.

156 Berry's Early Blood Red Beet. Very early, thrives anywhere, deliciously crisp and tender, good uniform size. (Pictured, described more fully page 50.) Postpaid: Pkt., 15c; 1 oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.

154 Early Blood Turnip. (Pictured at right.) Excels in flavor and appearance. A medium early variety, roots top shaped, dark red, retaining color even when cooked. Sweet and crisp. Matures quickly but is a splendid keeper. Postpaid: Pkt., 5c; 1 oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.

168 Detroit Perfected. A superb beet that is tender and sweet at all stages of growth. This is an improvement over Detroit Dark Red. Smooth globe shaped with small top root and beautiful dark red flesh, splendid for dicing. An all American Selection. Pkt., 5c; 1 oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00, postpaid.

155 Crosby's Egyptian. An extra early variety preferred by market gardeners, splendid for bunching. Roots globe shaped, slightly flattened, with small tap root. Finest quality, tender and sweet. Flesh purplish-red. Postpaid: Pkt., 5c; 1 oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.

157 Detroit Dark Red. The outstanding variety for home use, truck gardeners, and canning. Fine quality, tender and sweet. Roots perfectly round. With small tap root, uniform. Flesh dark red with slight zone. Postpaid: Pkt., 5c; 1 oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.

167 Berry's Early Wonder. (Pictured at right.) This wonderful early beet is the result of years of reselecting and improving. For earliness it can't be beat. Very uniform in growth, root globular in shape. Postpaid: Pkt., 5c; 1 oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.

158 Swiss Chard. Makes continuous greens of delicious flavor throughout the summer. Grows anywhere. Plant from early spring till July. Postpaid: Pkt., 5c; 1 oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.

159 Swiss Chard—Fordhook Giant. This variety is more popular every year. Grows larger than common Swiss Chard and has exceptional fine quality and flavor. Pkt., 5c; 1 oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.

Asparagus

ASPARAGUS

SEED AND ROOTS

101 Washington Rust Proof. Preferred by market gardeners because of freedom from disease. A large straight luscious stalk with firm tips of finest quality. Postpaid: Pkt., 5c; 1 oz., 12c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.10.

102 Paradise. A sensational new and early asparagus. Producing a normal crop one year earlier than any other. A heavier yielder. 1 oz., 30c; ¼ lb., \$1.10; ½ lb., \$2.05; 1 lb., \$4.00.

CELERY

251 White Plume. Earliest of all. A favorite for the table because of crisp tender quality. Stalks are uniformly large and solid. Pkt., 10c; ½ oz., 30c; 1 oz., 50c; ¼ lb., \$1.50, postpaid.

253 Giant Pascal. An excellent variety for fall and winter use. Large, thick, crisp, stringless stalks with a delicious nut-like flavor. Blanches to a beautiful yellowish-white. Pkt., 10c; ½ oz., 25c; 1 oz., 45c; ¼ lb., \$1.35, postpaid.

252 Golden Self Blanching. Most desirable for truckers. Stalks heavier than white varieties blanching into a rich golden yellow. Fine quality, crisp, tender, free from strings. Postpaid: Pkt., 10c; ½ oz., 30c; 1 oz., 50c; ¼ lb., \$1.50, postpaid.

255 Celeriac or Turnip-rooted Celery. Roots nearly globe-shaped, are used for flavoring soup, stews, etc. Postpaid: Pkt., 10c; ½ oz., 25c; 1 oz., 45c; ¼ lb., \$1.35, postpaid.

White Plume Celery

MANGELS AND SUGAR BEETS

Stock Feeders—Raise Mangels

The average yield of mangels per acre is 30 tons. Aside from the minimum feeding value of \$2.50 per ton, the mangel is a regulator that keeps stock in the best health.

Mangels are very easily grown. A loose or sandy loam type of soil is best to grow mangels on. Drill about 6 pounds of seed per acre in rows 2 feet apart. Cultivate right after planting down the drill rows.

The following 3 varieties postpaid: 1 oz., 20c; ¼ lb., 60c; ½ lb., 95c; 1 lb., \$1.75.

162 Mammoth Long Red. Heaviest yielding and largest of mangels. Flesh pink tinged.

160 Golden Tankard. Very large size and easily lifted. Skin deep orange, flesh yellow with white zones.

166 Giant Half Sugar. Heavy yielder, valuable for feeding. Flesh white, with good sugar content. Grows half out of the ground, making it easy to harvest.

CABBAGE

Golden
Acre

LATE VARIETIES

186 Premium Late Flat Dutch. Excellent for home and market garden use. Very solid, large, flat heads, 6 to 7 inches deep. High quality. Deserves its wide popularity. **Postpaid: Pkt., 10c; ½ oz., 20c; 1 oz., 30c; ¼ lb., 70c; ½ lb., \$1.60; 1 lb., \$3.00.**

187 Drumhead Savoy. Popular for its tasty flavor. Sweeter than ordinary cabbage. Has crinkled leaves. Round ball-like heads are very heavy. An excellent keeper. **Postpaid: Pkt., 10c; ½ oz., 20c; 1 oz., 35c; ¼ lb., \$1.00; ½ lb., \$1.85; 1 lb., \$3.50.**

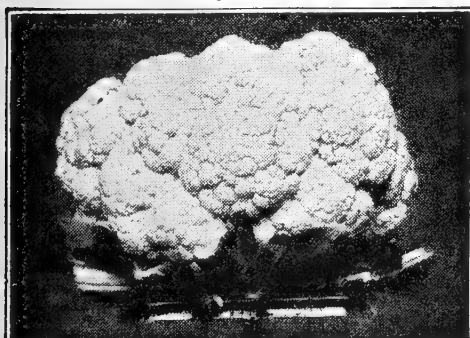

191 Danish Ballhead. A superior variety, one of the finest late cabbages. Extremely hard heads, 8 to 9 inches across. Desirable for shipping, storage, and kraut. **Pictured at right. Postpaid: Pkt., 10c; ½ oz., 20c; 1 oz., 35c; ¼ lb., \$1.00; ½ lb., \$1.85; 1 lb., \$3.50.**

CELERY OR CHINESE CABBAGE

175 Celery or Chinese Cabbage. Most popular for the home garden. Cylindrical, tapering heads. Crisp and tender. Plant during July-August. Makes fine chicken feed. **Postpaid: Pkt., 10c; ½ oz., 15c; 1 oz., 25c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.45.**

CAULIFLOWER

Choicest Imported Seed

Danish Giant

220 Early Snowball. Most widely used early variety, especially valuable for market. Dwarf habit. A sure header, medium size. Delicious, white and tender. **Postpaid: Pkt., 10c; ¼ oz., \$1.25; ½ oz., \$2.25; 1 oz., \$4.00.**

Cabbage is of vital importance for our health and nutrition. Rich in vitamins when eaten raw. Can be grown over a long season. Plant seed in hills for planting outdoors, as early as possible. Cover lightly about ½ inch. Plant both early and late varieties. One person needs about 50 pounds a year. Used more often in a health diet than any other vegetable except potatoes and tomatoes.

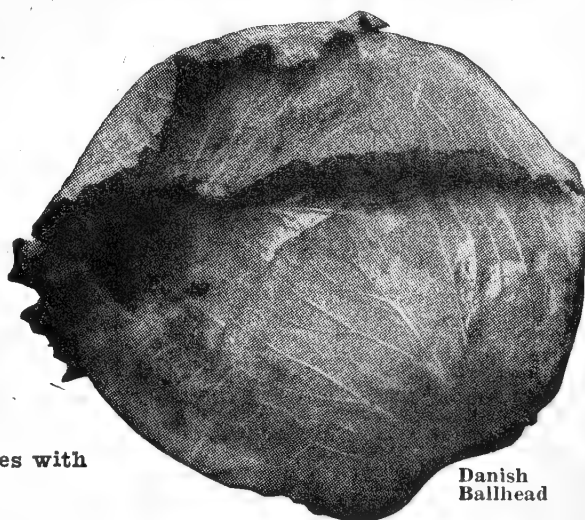

EARLY VARIETIES

180 Berry's Earliest Cabbage. The best for earliness, quality and productiveness. **Postpaid: Pkt., 10c; ½ oz., 20c; 1 oz., 30c; ¼ lb., 90c; ½ lb., \$1.60; 1 lb., \$3.00.**

179 Golden Acre. A new variety, sure header; heads round and very solid, few outer leaves. Used by truckers for earliest markets. **Postpaid: Pkt., 10c; ½ oz., 20c; 1 oz., 30c; ¼ lb., 90c; ½ lb., \$1.60; 1 lb., \$3.00.**

176 Early Jersey Wakefield. Small compact conical heads, broad base. Few leaves permitting close planting. A favorite of market gardeners and shippers. **Postpaid: Pkt., 10c; ½ oz., 20c; 1 oz., 30c; ¼ lb., 90c; ½ lb., \$1.60; 1 lb., \$3.00.**

182 Copenhagen Market. Finest round-headed early cabbage. Heads uniform, solid, excellent quality. Few outer leaves. Short stem. Desirable likewise for early kraut. **Postpaid: Pkt., 10c; ½ oz., 20c; 1 oz., 30c; ¼ lb., 90c; ½ lb., \$1.60; 1 lb., \$3.00.**

Danish
Ballhead

Order your insecticides with your seeds.

181 Early Flat Dutch. A strain popular with market and home gardeners. Heads almost round, good solid quality, weigh about 5 lbs. **Postpaid: Pkt., 10c; ½ oz., 20c; 1 oz., 30c; ¼ lb., 90c; ½ lb., \$1.60; 1 lb., \$3.00.**

YELLOWS DISEASE RESISTANT VARIETIES

The most destructive and widespread cabbage disease found in all sections east of the Rocky Mountains. "Yellows" is caused by minute organisms living in the soil indefinitely that thrive on living cabbage plants. The only control is to grow varieties that have been developed and are proven to be "Yellows Resistant."

174 Marion Market. Heads are almost round, very solid. Similar to Copenhagen Market but about 10 days later. **Postpaid: Pkt., 10c; ½ oz., 35c; 1 oz., 60c; ¼ lb., \$1.10; ½ lb., \$1.95; 1 lb., \$3.70.**

183 Jersey Queen. 55 days. Selected from Jersey Wakefield with which it remains identical in type and season. Leaves smooth and dark green. Heads pointed small and compact, permitting close planting. **Postpaid: Pkt., 10c; ½ oz., 35c; 1 oz., 60c; ¼ lb., \$1.10; ½ lb., \$1.95; 1 lb., \$3.70.**

BETTER SEED MEANS BETTER GARDENS

TABLE CARROTS

Carrots are vital to health. Rich in Vitamin A, also B₁ and C. They have a wide variety of uses in meal plannings, can be eaten raw from gardens, stored in pits or canned. The average family should plant 1½ ounces of seed or 150 feet of row half in the spring, half in the fall. Cover seed only a fraction of an inch.

203 Imperator. 77 days. An unusually fine variety. An All American Selection that does particularly well where soil is a deep sandy loam. Roots are smooth slightly tapering to a stump-rooted tip, smooth, rich orange color, very little core, crisp, and of fine sweet flavor. Exceptionally attractive for bunching. Postpaid: Pkt., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.

201 Oxheart. A short thick variety, best for heavy soil where it can be easily lifted. Roots orange-scarlet, about five inches in length; very heavy yielder. Postpaid: Pkt., 10c; oz., 18c; ¼ lb., 55c; ½ lb., \$1.00; 1 lb., \$1.85.

204 Danvers Half Long. None better for home gardens or market. Flesh bright orange in color and very tender. Grows six to seven inches long, tapered. Very productive. Postpaid: Pkt., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.

205 Chantenay. A fine sort for bunching, market or home gardens. About 6 inches long, stump, rooted, deep orange in color. A heavy yielder. Postpaid: Pkt., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.

212 New Coreless Carrot. The greatest improvement made on any vegetable in years. Fine flavor, tender, and sweet. Early, uniform size. Postpaid: Pkt., 10c; oz., 23c; ¼ lb., 69c; ½ lb., \$1.25; 1 lb., \$2.25.

STOCK CARROTS

206 Long Orange. Suitable for stock or table use. Roots red-orange, tapered to a point. A good winter keeper. Oz., 17c; ¼ lb., 52c; ½ lb., 95c; 1 lb., \$1.75.

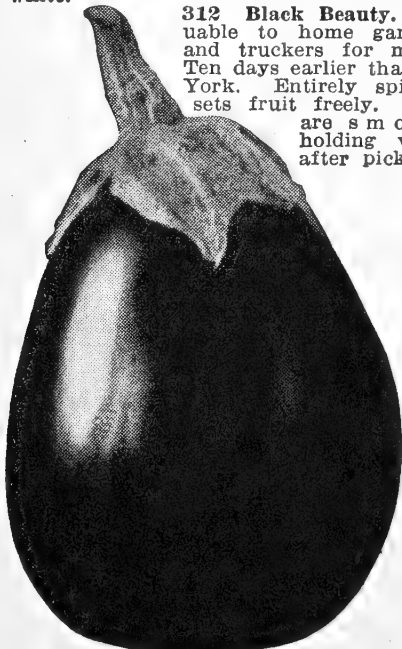

208 White Belgium. One of the best stock feeding carrots, 100 days. Oz., 17c; ¼ lb., 52c; ½ lb., 95c; 1 lb., \$1.75.

EGGPLANT

These two varieties postpaid: Pkt., 10c; ½ oz., 35c; oz., 60c; ¼ lb., \$1.75; ½ lb., \$3.25; 1 lb., \$6.00.

310 Improved New York Purple. Our strain of this leading market variety is unsurpassed. Skin glossy black purple, flesh white.

312 Black Beauty. Valuable to home gardeners and truckers for market. Ten days earlier than New York. Entirely spineless, sets fruit freely. Fruits are smooth, holding well after picking.

New York Purple

New Coreless Carrot
(Seed very scarce)

Try the new Coreless Carrot for finest quality. See Page 50 for other better vegetables.

BERRY'S GIANT WHITE POP CORN

The New Giant Pop Corn No. 305

Here is something new and different in pop corn. Everyone who likes pop corn should be sure to grow some of it. Great big creamy white grains that pop into immense, crispy, delicious, snowy white puffs. Kernels as big or bigger than the South American but white instead of yellow in color.

Now is the time to start. Sell what you don't need for popping to your neighbors for seed. Produces tremendous yields—grows from Minnesota to the Gulf and from the Rockies to the Atlantic. Grows up to 7 feet.

Be sure to get started this year and have something extra fine in the newest thing out. Pkt., 10c; ½ lb., 20c; 1 lb., 35c, postpaid.

CUCUMBER

Special Pickling Cucumber. Available in regular size packets only—15c each.

225 Berry's Champion Pickler. The best variety for home gardens. Excellent for slicing and pickling. Fruits dark green in color, uniform in size, straight and smooth. We recommend this variety very highly. Postpaid: Pkt., 15c; oz., 25c; ¼ lb., 75c; ½ lb., \$1.35; 1 lb., \$2.50.

226 National Pickling. The finest early pickling type slightly larger than Early Green Cluster. Uniformly smooth and cylindrical with well rounded ends. Flesh thick preventing splitting in the center and hollow sides in the pickles. Size 7x3 inches, 1¼ pounds. Postpaid: Pkt., 5c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.

228 Chicago Pickle. One of the most popular pickling varieties; also good for slicing. Mid-season. Fruits medium green, uniform in size. Postpaid: Pkt., 5c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.

229. Early Fortune. 60 days. An excellent home or market garden variety. Very prolific, uniform, and attractive. Fine slicing or dill pickles. Holds its firmness and dark green color for a long time. Pkt., 5c; oz., 21c; ¼ lb., 65c; ½ lb., \$1.15; 1 lb., \$2.20.

233 Boston Pickler. Very early and prolific; uniform size, slightly tapered, weigh about 1½ lbs. Dark green. Fine for table. Postpaid: Pkt., 5c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$2.00.

234 Improved White Spine. Vigorous and productive, fruit uniform, seven to nine inches long, very showy. Postpaid: Pkt., 5c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$2.00.

239 Straight 8. The highest award winner of the All-America trials in 1935. The best new cucumber. Fruits are of excellent quality, uniform size, dark green color. About 8 inches long, 2 inches wide. Vines vigorous and productive. Ideal for the home garden, local market, or shipping. Postpaid: Pkt., 5c; oz., 25c; ¼ lb., 75c; ½ lb., \$1.30; 1 lb., \$2.50.

236 Improved Long Green. Standard late variety. Splendid for slicing, excellent quality. Fruits dark green, weigh 3 to 3½ lbs., flesh white, firm and crisp. Postpaid: Pkt., 5c; oz., 25c; ¼ lb., 75c; ½ lb., \$1.30; 1 lb., \$2.50.

Berry's Pickling and Slicing Cucumber Collection

Here are the finest pickles you ever had. Assorted for size, also for season, being early, medium and late. Plant this collection of 3 best varieties.

Onion is an important vegetable to good health. One ounce will plant 100 feet of row the need of an average family. We suggest raising some onions from seed, plants and sets. Sets are best for early green onions, plants produce the later milder varieties.

YELLOW VARIETIES

431 Early Yellow Globe—95 days. Matures 2 to 3 weeks earlier than other yellow globe varieties. This is a fine globe shaped onion with a beautiful yellow skin and pleasingly flavored light cream flesh. An excellent keeper. **Postpaid: Pkt., 10c; $\frac{1}{2}$ oz., 35c; 1 oz., 60c; $\frac{1}{4}$ lb., \$1.00; $\frac{1}{2}$ lb., \$1.90; 1 lb., \$3.75.**

435 Yellow Globe Danvers—105 days. A splendid variety for home gardens and market. Nearly globe shaped with pure yellow skin, white flesh, and mild flavor. Very productive with fine keeping qualities. **Postpaid: Pkt., 10c; $\frac{1}{2}$ oz., 30c; 1 oz., 55c; $\frac{1}{4}$ lb., 95c; $\frac{1}{2}$ lb., \$1.85; 1 lb., \$3.65.**

436 Southport Yellow Globe—115 days. Usually grown for commercial purposes. A large, mild, white fleshed type with rich yellow color. An excellent keeping onion (pictured at bottom of page). **Postpaid: Pkt., 10c; $\frac{1}{2}$ oz., 30c; 1 oz., 55c; $\frac{1}{4}$ lb., 95c; $\frac{1}{2}$ lb., \$1.85; 1 lb., \$3.65.**

437 Brigham Yellow Globe—115 days. Also called Michigan Yellow Globe. This is a fine onion noted for its long keeping qualities. A very heavy dark yellow skin and pleasing flavor, with high yielding ability make this a fine main crop shipping and storing onion. **Postpaid: Pkt., 10c; $\frac{1}{2}$ oz., 30c; 1 oz., 55c; $\frac{1}{4}$ lb., 95c; $\frac{1}{2}$ lb., \$1.85; 1 lb., \$3.65.**

425 Yellow Sweet Spanish—110 days. The most popular onion grown. Golden yellow, extra large and mild, very pleasant flavored white flesh. An unusually heavy yielder. **Postpaid: Pkt., 10c; $\frac{1}{2}$ oz., 40c; 1 oz., 70c; $\frac{1}{4}$ lb., \$1.35; $\frac{1}{2}$ lb., \$2.65; 1 lb., \$5.25.**

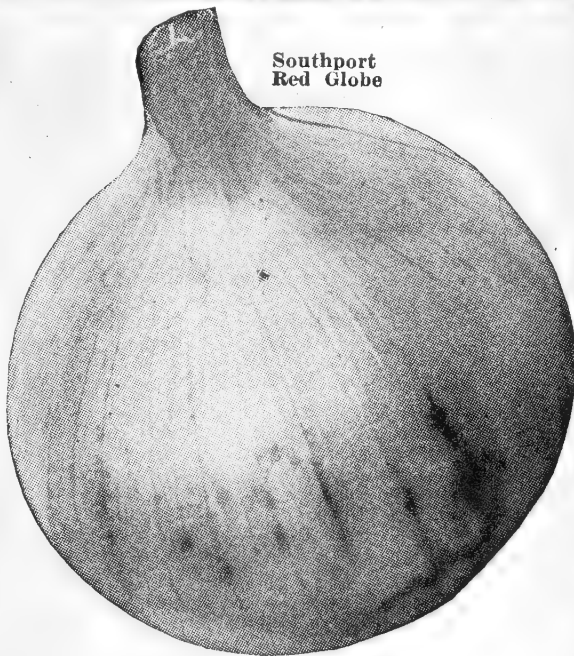

WHITE VARIETIES

434 White Sweet Spanish—110 days. The largest and mildest of all onions. Globe shaped, pure white flesh, very firm and mild. An unusual producer. **Prepaid: Pkt., 10c; $\frac{1}{2}$ oz., 40c; 1 oz., 70c; $\frac{1}{4}$ lb., \$1.35; $\frac{1}{2}$ lb., \$2.65; 1 lb., \$5.25.**

440 White Bermuda or Crystal Wax—93 days. Clear white, mild, delicate flavored large flat onion of superior quality. You can grow Bermudas from seed. **Prepaid: Pkt., 10c; $\frac{1}{2}$ oz., 20c; 1 oz., 30c; $\frac{1}{4}$ lb., \$1.10; $\frac{1}{2}$ lb., \$2.05; 1 lb., \$4.00.**

433 Southport White Globe—

Southport
Red Globe

110 days. A splendid commercial onion, attractive in color, size and shape. A smooth globe type, flesh mild, fine grained and tender. A very heavy producer. **Prepaid: Pkt., 10c; $\frac{1}{2}$ oz., 40c; 1 oz., 70c; $\frac{1}{4}$ lb., \$1.30; $\frac{1}{2}$ lb., \$2.50; 1 lb., \$4.90.**

441 White Portugal or Silverskin—100 days. The most widely used white onion. This all purpose variety can be used for sets, pickling, green bunching or storage. Bulbs are medium size, flat, clear white, hard, fine grained, and of pleasing flavor. At pickling stage bulbs are small, smooth and round. Raise your own this year. **Postpaid: Pkt., 10c; $\frac{1}{2}$ oz., 35c; 1 oz., 65c; $\frac{1}{4}$ lb., \$1.25; $\frac{1}{2}$ lb., \$2.40; 1 lb., \$4.75.**

RED VARIETIES

432 Southport Red Globe—110 days. The finest of the red onions. Good for sets or storage. Uniform in size, handsome perfect globe shaped. An excellent keeper. Skin glossy red, flesh white, fine grained and tender. **Postpaid: Pkt., 10c; $\frac{1}{2}$ oz., 35c; 1 oz., 60c; $\frac{1}{4}$ lb., \$1.15; $\frac{1}{2}$ lb., \$2.25; 1 lb., \$4.40.**

426 Red Weathersfield—100 days. Large flattened bulbs with purplish red skin, flesh white with pink tinge, very firm. One of the best keepers, an excellent commercial variety. **Postpaid: Pkt., 10c; $\frac{1}{2}$ oz., 35c; 1 oz., 65c; $\frac{1}{4}$ lb., \$1.20; $\frac{1}{2}$ lb., \$2.30; 1 lb., \$4.50.**

FINEST GROWN ONION SETS

Produce Larger Onions of Highest Quality

Our onion sets are small sets. This means they are produced under the most ideal conditions. Berry's sets are long keepers, uniform in size and of finest quality. We guarantee delivery of your set order free from sprouts.

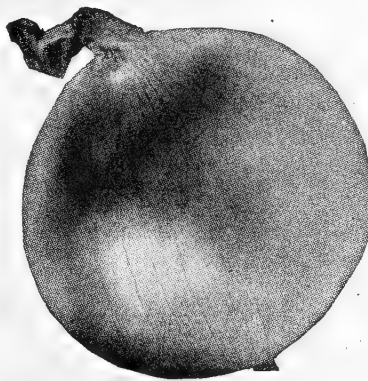

444 Yellow. **Postpaid: $\frac{1}{2}$ gal., 56c; 1 gal., \$1.10.**

Not Prepaid: $\frac{1}{2}$ bu., \$2.25; 1 bu., \$4.00.

Onion Sets will be available from Feb. 15th until supply is exhausted. We cannot ship onion sets after Apr. 15th.

GARLIC SETS

448 Garlic Sets. A bulbous root of the onion type, easily grown, used for flavoring. When leaves turn yellow, dig and dry in shade. **Postpaid: $\frac{1}{2}$ lb., 32c; 1 lb., 60c.**

Yellow Sweet Spanish

Southport Yellow Globe

MUSK MELONS

Musk melons are rich in vitamins—an excellent health food. They thrive under varied conditions and soils. Plant in hills six feet apart each way or in drills have six feet between rows and thin plants to 12 inches in the row. Plant thick and thin out after plants are up. The average family needs at least 1 ounce which will plant 100 hills or drill 200 feet of row.

SALMON FLESHED

402 Berry's Favorite. (Center Picture.) A large size melon with quality equal to any. Early, luscious flavored, finest eating qualities for the home garden. Size about 6¼ by 7¼ inches, weighs about 6¾ pounds. Prominent ribs, good netting. **Postpaid: Pkt., 15c; oz., 29c; ¼ lb., 85c; ½ lb., \$1.50; 1 lb., \$2.75.**

407 Benders Surprise—90 days. An extra large deliciously flavored melon weighing about 7 pounds. Skin hard and greenish yellow when ripe. Flesh is thick and bright salmon colored. The best of the big muskmelons. You'll really enjoy this one. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 50c; ½ lb., 95c; 1 lb., \$1.80.**

420 Hales Best #36—80 days. An outstanding shipping and market variety. Fruits 3 to 4 pounds. Very thick deep salmon colored flesh with a sweet aromatic flavor and fine texture. The most popular muskmelon grown. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 50c; ½ lb., 95c; 1 lb., \$1.80.**

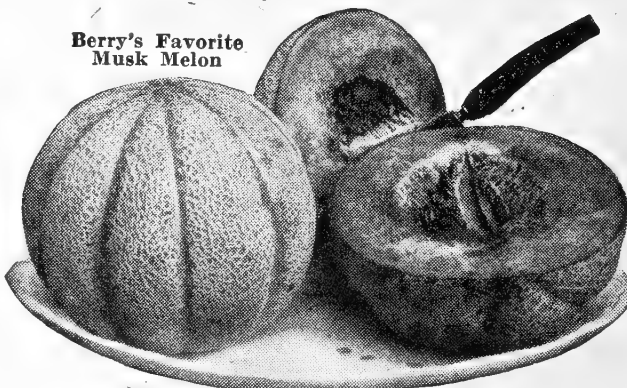

414 Imperial #45—Mildew Resistant—87 days. A Hales Best type with resistance to powdery mildew. A good keeper after ripening. A melon with unusual qualities. Thick, sweet, orange flesh. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 50c; ½ lb., 95c; 1 lb., \$1.80.**

411 Honey Rock—81 days. All American winner in 1933. Has been most popular for the home garden since. Very early, weighs about 4 lbs., flesh thick and very sweet. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 50c; ½ lb., 95c; 1 lb., \$1.80.**

413 Hoodoo (Hearts of Gold)—90 days. Fruits round, about 3 lbs. Very small seed cavity. Tender, juicy, sweet with delightful flavor. A superior home garden melon. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 50c; ½ lb., 95c; 1 lb., \$1.80.**

418 Osage or Miller's Cream—95 days. The finest flavored. "Queen" of salmon fleshed melons. Exceptionally thick, tender and sweet flesh. Oval shaped fruits about 5½ pounds. A superb home garden variety. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 50c; ½ lb., 95c; 1 lb., \$1.80.**

Berry's Favorite
Musk Melon

Order your insecticides with your seeds.

Osage

GREEN FLESHED

Muskmelon seed is short this year. This applies to other vine seed crops in Colorado. We believe you will find we have the year's biggest values on all garden seeds. We save you \$1.00 on the Farm Family Garden page 53, which is adapted for every American gardener.

417 Gold Lined Rocky Ford. In delicious flavor Gold Lined far excels the regular Rocky Ford. It is slightly longer and a few days later. Oval in shape, small seed cavity. Flesh thick and firm. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 50c; ½ lb., 95c; 1 lb., \$1.80.**

412 Extra Early Hackensack—80 days. A most popular variety for home use and truck gardening. Fruits large, globular, flattened. Flesh is thick, very sweet and spicy. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 50c; ½ lb., 95c; 1 lb., \$1.80.**

401 Select Rocky Ford—92 Days—(Pictured at left). Probably the most widely grown cantaloupe. Almost round. Green flesh of delicious flavor. Fruits weigh about 2½ pounds. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 50c; ½ lb., 95c; 1 lb., \$1.80.**

403 Honey Dew—112 days. Green fleshed fruits 7"x8"; skin smooth, hard, and creamy white, flesh very thick, sweet, juicy and distinctly flavored. A good keeper. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 50c; ½ lb., 95c; 1 lb., \$1.80.**

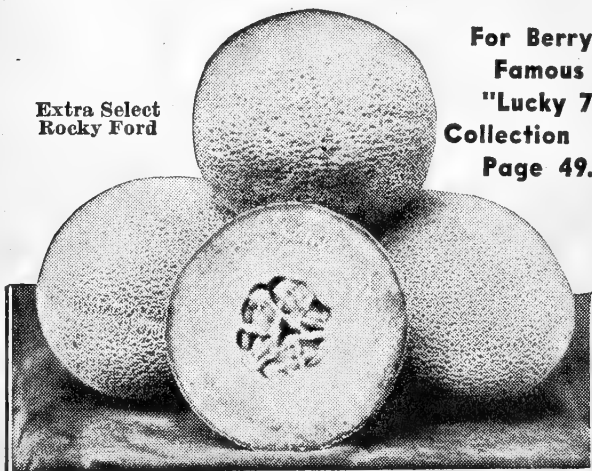

MUSTARD

712—Tendergreen or Spinach Mustard—50 days. A quick growing variety that does not go to seed as soon as other varieties. Resistant to heat and drought. Distinctive superior flavor. Rich in vitamins and iron. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 75c.**

713 Southern Giant Curled—65 days. The most popular and best known mustard for greens. Leaves long, wide, light green, heavily crumpled and curled at the edges. Best known in the South. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 75c.**

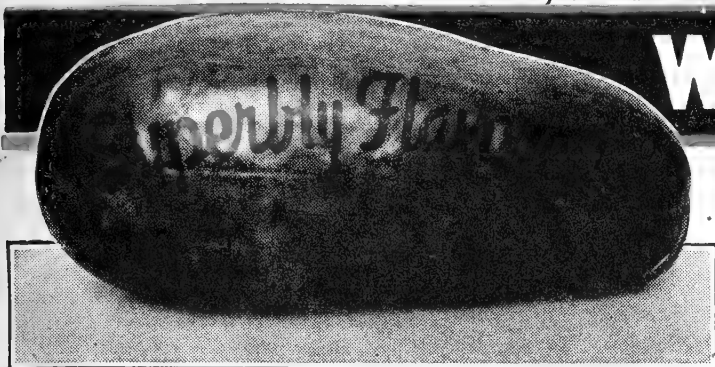

711 Florida Broad Leaf—55 days. A large upright plant with unusually large, thick, bright green, smooth leaves. A popular variety. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 75c.**

WATER MELONS

Berry's Improved Kleckley Sweet

Plant in hills about 8 feet apart each way. Don't disturb the vines after they start to run. Don't plant until ground is warm and cover only about 1 inch. Because of long growing season required in northern states plant only early varieties.

368 Berry's Improved Kleckley Sweet. Finest melon for home and market gardens. An improved type of the old popular strain; larger and wilt-resistant. Medium early, dark green skin, with bright red flesh very tender and melting. **Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

351 Berry's Mammoth Melting Sugar. Very early for such a large melon. Sweetest, most delicate flavor of any. (Pictured page 52.) **Postpaid: Pkt., 15c; oz., 20c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

370—Georgia Rattlesnake. A large long melon, striped light and dark green. Rind rather thick; flesh red, of good quality. Very prolific and drought resistant. **Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

Halbert's Honey

352—Halbert's Honey. One of the best for home and local markets; not a good shipper. Color dark green. Thin rind, rich red sugary flesh of fine texture. **Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

355 Hawkesbury—85 days. A wilt-resistant, long, light gray melon with very good shipping qualities. About 35 pounds. Black seed, dark pink, good quality flesh. **Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

360 Tom Watson. Very popular shipping melon of the long type. Early; keeps well. Flesh bright red, of excellent flavor. **Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

369 Golden Honey. Dark green, medium sized, long oval shape. Cream colored flesh which is very tender and delicious. **Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

353 Coles Early—75 days. A leading home garden variety for the North. Weight about 20 pounds. Red Flesh. Black Seeds. **Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

377 Stone Mountain. Light veined with dark green. Fruits round, weigh about 45 lbs. Flesh rich red of fine texture, tender, sweet, luscious. (See picture at right.) Wilt-resistant. **Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

Berry's "Sweet As Honey" Melons

Just enough seed in our best varieties to insure favorite melons over a longer season. Plant all at same time. 1 Pkt. Golden Honey, Dixie Queen and Berry's Mammoth Melting Sugar—regular price 25c.—No. 380—only 19c, postpaid.

374 Dixie Queen. A recent introduction of finest quality. Early, it attains an average size of 15x12½ inches, weight 32 pounds. Color light green striped with darker green. Flesh dark pink with very few seeds—white. Deliciously flavored. **Postpaid: Pkt., 5c; oz., 20c; ¼ lb., 55c; ½ lb., \$1.05; 1 lb., \$2.00.**

375 Mixed. Finest for the boy's melon patch. Old favorite varieties—something to please everybody. 25c for ¼ lb. will pay big returns. Will plant 120 hills of about 15 varieties. **Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

357 Harris Earliest. Extra early, ready to pick in about 80 days, melons weigh about 20 pounds. Very red, firm flesh, of most delicious flavor. Fruits round, dark green striped with light green. **Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

358 Sweetheart. Vines vigorous and productive. Fruits large, oval. Rind thin, flesh bright red, firm, sweet and tender. A very fine shipper. **Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

371 Winter Queen. A melon of finest quality that will keep until Christmas. Nearly round, pale yellow. Flesh is bright red and sweet as honey. **Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

376 Early Kansas Red Seeded. A remarkably early melon for its large size. Finest quality, flesh rich red of delightful flavor. **Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

354 Early Canada—75 days. A new Ice-box size 11x11 inches, 10 pounds. The finest quality in an early melon. Brown seeds, red flesh. Really an outstanding variety for home gardens and local markets. **Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

SAVORY GARDEN PEAS

EXTRA EARLY VARIETIES

454 Mardelah. Something different in an extra early Pea. Produces peas for the table or canning in 53 days. Exceptionally sweet and tender. Wilt resistant. **Postpaid: Pkt., 15c; ½ lb., 27c; 1 lb., 45c; 2 lbs., 80c.**

455 Alaska Wilt Resistant. Extra early. Smooth seeded pea, ready to use in 53 days. Ideal for first market and home garden use. An old reliable variety. **Postpaid: Pkt., 9c; ½ lb., 15c; 1 lb., 27c; 3 lbs., 70c.**

EARLY VARIETIES

463 Little Marvel—18 inch—63 days to picking. The home gardener's favorite in the Middle West. Excellent quality and high yielding ability. This pea produces when many varieties fail. **Postpaid: Pkt., 10c; ½ lb., 17c; 1 lb., 31c; 3 lbs., 80c.**

459 American Wonder—12 inch—63 days to picking. A good reliable early variety. A favorite of many home gardeners for years. A very heavy bearer. **Postpaid: Pkt., 10c; ½ lb., 18c; 1 lb., 32c; 3 lbs., 85c.**

457 Premium Gem—24 inch—66 days to picking. We think this is the best of the Gem Peas. Early, and with the fine sugar flavor usually found in later varieties. Reliable for the home garden. **Postpaid: Pkt., 10c; ½ lb., 18c; 1 lb., 32c; 3 lbs., 85c.**

460 Thomas Laxton—30 inch—61 days to picking. A very popular home garden variety in the East and South. Fine for canning or market garden. Large and sweet flavored, an exceptional yielder. **Postpaid: Pkt., 10c; ½ lb., 18c; 1 lb., 32c; 3 lbs., 85c.**

478 Laxton Progress—15 inch—64 days to picking. A standard early variety for market and home gardens. Large podded, large seeded. A good variety for freezing or home canning. **Postpaid: Pkt., 10c; ½ lb., 18c; 1 lb., 32c; 3 lbs., 85c.**

476 Dwarf Grey Sugar or Edible Pod. Grows 2 to 2½ feet tall—65 days. A sweet, tender, and delicious edible podded variety that is very productive and wilt resistant. Small, smooth, sweet flavored. **Postpaid: Pkt., 10c; ½ lb., 19c; 1 lb., 35c; 3 lbs., 90c.**

MID-SEASON VARIETIES

468 Everbearing—28 inch—75 days. A long bearing, large seeded variety for home and market gardens. Wilt resistant and hardy, with a superior flavor. A very popular mid-season variety. **Postpaid: Pkt., 10c; ½ lb., 18c; 1 lb., 32c; 3 lbs., 85c.**

465 Fillbasket or Potlatch—26 inch—80 days. An excellent variety for home and market garden. Unusually large seed, with delicious flavor. Very tender. **Postpaid: Pkt., 10c; ½ lb., 18c; 1 lb., 32c; 3 lbs., 85c.**

473 Stratagem—28 inch—79 days. A very productive, large podded, large seeded pea of excellent flavor. A home garden variety. **Postpaid: Pkt., 10c; ½ lb., 18c; 1 lb., 32c; 3 lbs., 85c.**

471 Tall Telephone or Alderman. A climbing or pole pea, grows to 5 foot. Ready for table use in 74 days. A handsome large podded variety. Excellent for home and market gardens. Wilt resistant. Pods contain 8 to 10 large peas of highest quality. The best tall pea. **Postpaid: Pkt., 10c; ½ lb., 19c; 1 lb., 35c; 3 lbs., 90c.**

474 White Eyed Marrowfat—5 foot—80 days. A leading variety for dry use. Very good for pea soup. Large, round, creamy white seed of delicious flavor. Wilt resistant and very productive. **Postpaid: ½ lb., 16c; 1 lb., 29c; 3 lbs., 75c.** Write for prices on larger quantities.

Pea Culture

Plant as early as anything in garden—light freezing does not hurt Peas. In the South plant two crops—early spring and fall; in the north make successive plantings about one week apart. Peas will grow on poorer soils than most crops. Smooth varieties are hardiest, wrinkled varieties of finest quality. Plant about 1 inch apart, 3 inches deep. 1 pound will drill 50 feet of row. You can double row peas about 8 inches apart spacing between double rows about 36 inches.

Berry's Best 4

An all season pea collection. Plant these 4 outstanding varieties on the same day and have a succession of peas for table and canning. They will mature in the order listed.

Little Marvel

New
Laxtonian
Pea

Uniculture inoculant will give your peas the boost that counts at picking time. Get increased yields by inoculating this year. A 10c packet will inoculate 10 pounds of seed.

LETTUCE CRISP, HEALTHFUL AND DELICIOUS ALL THE TIME

Lettuce Culture

Plant as soon as ground can be worked, light frosts do not harm this crop. Some gardeners have good success with lettuce seeded in the late fall just before the ground freezes. Sow seed sparingly, usually lettuce is seeded too heavy. In leaf varieties plants should be thinned to 4 or 5 inches. Heading varieties should be 1 foot apart. Rows should be 12 to 24 inches apart. This is a cool weather plant and will grow best in the early spring or fall. Start heading varieties in a coldframe or hotbed and set out as early as possible. A packet of seed will plant 50 feet or more.

LOOSE LEAF VARIETIES

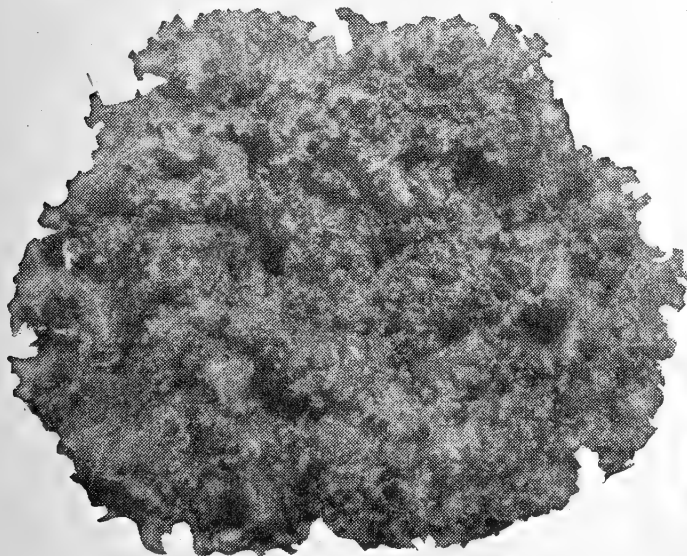

329 Early Prizehead or Brown Leaf—40 days. In our trials this variety has proved most satisfactory. As early as other leaf varieties. Prizehead remains crisp and tender longer than others. Plant at least one row and see the difference. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

326 Black Seeded Simpson—46 days. Most popular light green variety. Very good for forcing. A heavy producer of large curled leaves. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

327 Early Curled Simpson—45 days. A widely used home garden variety. Excellent flavored, curly, crisp, and tender leaves. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

330 Chicken Lettuce. A hardy tall growing, non-heading, dark green variety. Producing the largest amount of leaves of any lettuce. Ideal for poultry and rabbit feed. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

328 Grand Rapids—40 days. Excellent for greenhouse forcing and early planting outside. Superior quality with beautiful appearance. Light green heavily fringed leaves. (Picture below.) **Postpaid: Pkt., 5c; 1 oz., 20c; ¼ lb., 55c; ½ lb., \$1.05; 1 lb., \$2.00.**

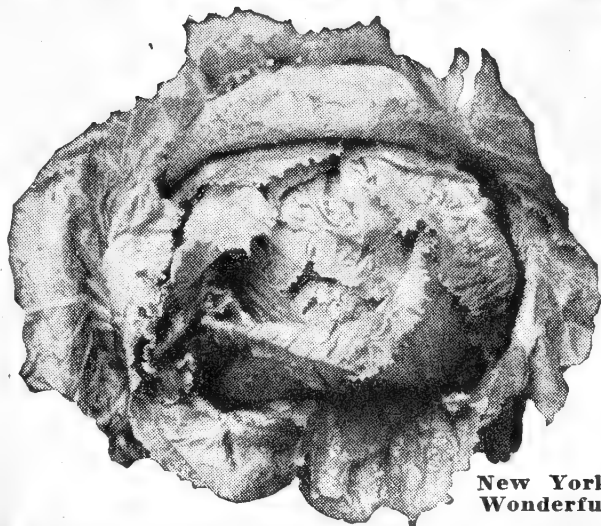

Grand Rapids Lettuce

ENDIVE

315 Green Curled Endive—96 days. A delicious variety with finely curled compact heart. Very desirable for salads. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

317 Broad Leaved Batavian or Full Heart—86 days. A medium large plant with a very compact, full heart. The leaves are broad and well blanched. Handsome in appearance, superbly flavored. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

New York Wonderful

HEADING VARIETIES

335 Berry's New Bountiful—76 days. Something different in a head lettuce. This special selection will head when other varieties fail. Has the ability to resist tipburn and make heads in summer weather. The best for the middle west. A real home garden variety. **Postpaid: Pkt., 15c; 1 oz., 33c; ¼ lb., 98c; ½ lb., \$1.75; 1 lb., \$3.25.**

332 Improved Hanson—80 days. An old favorite for home and market gardens. A sure heading, hardy type. Large, compact, tender, sweet heads. **Postpaid: Pkt., 5c; 1 oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.**

333 Big Bostan—75 days. A popular butter-head variety for forcing and outside culture. Will not stand hot weather. A medium sized, compact head with creamy yellow heart. Leaves smooth glossy tinged with reddish brown. **Postpaid: Pkt., 5c; 1 oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.**

336 Iceberg—84 days. A large late variety. Conical shaped heads—interior, white, sweet, and crisp. Outer leaves light green tinged with brown. A home garden variety. **Postpaid: Pkt., 5c; 1 oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.**

337 New York Wonderful #12—77 days. Earlier than regular New York, but with all the good qualities of the older type. The outstanding shipping variety. Best for market gardens. Large solid heads, crisp and of excellent quality and fine flavor.

(Pictured above.) **Postpaid: Pkt., 5c; 1 oz., 33c; ¼ lb., 92c; ½ lb., \$1.65; 1 lb., \$3.10.**

NEW "KALITE" BUG DUST

A Rotenone impregnated dust. Gives 4-way action. Kills chewing and sucking insects by contact, as a stomach poison, by leg paralysis and repels other insects that might attack plants.

The economical package illustrated above makes possible a very low price. Provides a convenient, clean and efficient insect control. Permits dusting tops and underside of leaves with an even film of dust. Leaves no poison residue. Contains one pound. Cost only 35c, postpaid.

LARGER YIELDS-BETTER QUALITY

Order Your insecticides with your seeds.

PUMPKIN

481 Mammoth Prize. The largest of all Pumpkins. Valuable for stock feeding, but is also fine for pies. Flesh is thick of a beautiful bright yellow, fine grained, solid and tender. **Postpaid: Pkt., 5c; 1 oz., 20c; ¼ lb., 55c; ½ lb., \$1.05; 1 lb., \$2.00.**

483 Sweet, or Sugar Pie. Standard variety for pies. Flesh thick, dry and sweet, orange-yellow, and of superior quality. Fruits weigh 6 to 8 lbs., keep well. Will make pies that will melt in your mouth. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

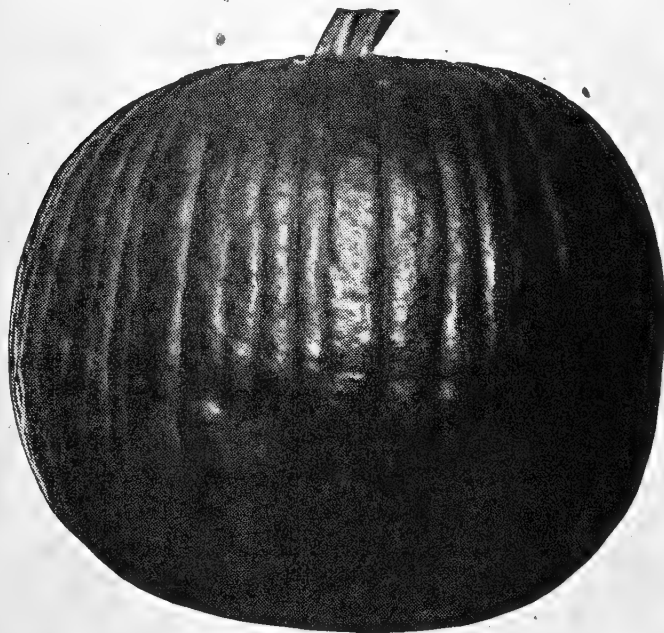

485 Kentucky Field. Used largely for canning. Grow large, flat, weigh 10 to 15 lbs. Flesh deep yellow, coarse, thick and nutritious, and of good flavor. Also used for stock feeding. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.**

486 Connecticut Field. (Picture below.) The standard cornfield pumpkin. Fruits grow large, weigh 15 to 25 lbs. Smooth, hard, orange-red skin; flesh orange-yellow, thick, coarse, and sweet. Fine for pies, canning, or feeding to stock. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 40c; ½ lb., 80c; 1 lb., \$1.50.**

484 Cushaw or Crookneck. Very popular variety. Very large, often 2 ft. long, crookneck shape. Creamy white shell; flesh yellow, solid, sweet. Excellent for pies; used also for stock feeding. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 40c; ½ lb., 80c; 1 lb., \$1.50.**

487 Green Striped Cushaw. Cream with dark green stripe. 16-20" long, weight 12-16 lbs. Yellow Flesh. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 40c; ½ lb., 80c; 1 lb., \$1.50.**

489 Mixed. A combination filling all practical purposes: for pies, local markets and stock feed. The boys will find just the right size for Hallowe'en too. **Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 40c; ½ lb., 80c; 1 lb., \$1.50.**

Connecticut Field Pumpkin

PEANUTS

Should be shelled before planting. Plant in rows 2½ to 3 ft. apart, 10 inches apart in the row. Cover one to two inches. A sandy soil is best.

621 New Mammoth Virginia. Of upright growth. Large pods and kernels. Always yield less imperfect pods than any other variety. Vines good for stock. **Postpaid prices: ¼ lb., 15c; ½ lb., 25c; 1 lb., 40c; 3 lbs., \$1.00.**

PEPPERS

516 King of the North. A sweet pepper like Ruby King but earlier. 65-70 days from time of setting out until fruit is ready to use. Plants 22-26" tall, erect, very heavy yielding, and hardy. **Postpaid: Pkt., 10c; ½ oz., 25c; 1 oz., 45c; ¼ lb., \$1.55; ½ lb., \$3.05; 1 lb., \$6.00.**

511 Large Bell or Bull Nose. Plants small, erect, prolific, early. Large fruits

bell shaped, deep green turning to scarlet, mild and sweet in flavor. **Postpaid: Pkt., 10c; ½ oz., 20c; 1 oz., 35c; ¼ lb., \$1.30; ½ lb., \$2.55; 1 lb., \$5.00.**

515 Ruby King. Excellent for home and market garden and shipping. Plants medium dwarf, erect, productive. Fruits dark green turning to ruby red. Flesh thick, mild and sweet. Used for mangoes. **Postpaid: Pkt., 10c; ½ oz., 25c; 1 oz., 40c; ¼ lb., \$1.45; ½ lb., \$2.80; 1 lb., \$5.00.**

518 California Wonder. One of the finest mild sweet flavored peppers, with thicker flesh than other varieties. Upright, prolific, vigorous grower. Very attractive, smooth, uniform and deep green. Excellent for shipping, home or market gardening. **Postpaid: Pkt., 10c; ½ oz., 25c; 1 oz., 45c; ¼ lb., \$1.55; ½ lb., \$3.05; 1 lb., \$6.00.**

509 Chinese Giant. 80 days. An extremely large, sweet pepper for home and market garden. Plants are short and stocky. Fruits are deep green changing to deep scarlet. **Postpaid: Pkt., 10c; ½ oz., 30c; 1 oz., 50c; ¼ lb., \$1.80; ½ lb., \$3.55; 1 lb., \$7.00.**

520 Sunnysbrook. 73 days. A home garden variety with unusual flavor. Fruits are tomato shaped, smooth, with thick mild flesh. Deep green turning to deep red. **Postpaid: Pkt., 10c; ½ oz., 25c; 1 oz., 40c; ¼ lb., \$1.45; ½ lb., \$2.80; 1 lb., \$5.50.**

514 Golden Queen. 78 days. A large yellow variety with sweet and mild flavor. Resembles Ruby King in size and shape. A deep green turning to attractive yellow. **Postpaid: Pkt., 10c; ½ oz., 30c; 1 oz., 50c; ¼ lb., \$1.80; ½ lb., \$3.55; 1 lb., \$7.00.**

517 Pimiento. A good canning variety. Fruits heart shaped and very smooth; color dark green changing to crimson. Flesh thick, sweet and mild. **Postpaid: Pkt., 10c; ½ oz., 20c; 1 oz., 35c; ¼ lb., \$1.30; ½ lb., \$2.55; 1 lb., \$5.00.**

521 Hungarian Yellow Wax. Peppers pungent and measuring 5 to 6 inches in length, rather slender but meaty, and tapering to a somewhat twisted point. They are waxy canary yellow in color, presenting a handsome appearance, and turn to a beautiful crimson at maturity. Very prolific and desirable. Also known as Bulgarian Yellow Wax. **Pkt., 10c; ½ oz., 25c; 1 oz., 45c; ¼ lb., \$1.65; ½ lb., \$3.25.**

512 Cayenne. A favorite hot variety used largely for canning, pickles, and drying. Plants large and productive. Fruits long, tapering; deep green changing to brilliant red. **Postpaid: Pkt., 10c; ½ oz., 20c; 1 oz., 35c; ¼ lb., \$1.30; ½ lb., \$2.55; 1 lb., \$5.00.**

519 Chili. Used for canning and drying. Fruits long and tapering, deep green changing to bright scarlet; extremely hot. **Postpaid: Pkt., 10c; ½ oz., 20c; 1 oz., 35c; ¼ lb., \$1.30; ½ lb., \$2.55; 1 lb., \$5.00.**

Ruby King Pepper

PARSNIPS

502 Improved Hollow Crown or Guernsey. 95 days. Roots long, white and smooth; hollow crowned. Tender and of excellent flavor. A good keeper. Grows 10 to 12 inch roots. Many gardeners prefer to leave parsnips in the ground over winter. Freezing is not harmful to this vegetable and improves the flavor. **Postpaid: Pkt., 10c; 1 oz., 15c; ¼ lb., 30c; ½ lb., 55c; 1 lb., \$1.00.**

Hollow Crown Parsnip

ALL TESTED AND GUARANTEED SEED

RADISHES

Radish can be planted several times at intervals in early spring and again in the fall. Plant several different varieties. One oz. seed to 100 feet of row. Plant $\frac{1}{2}$ inch deep, 1 inch apart in row.

527 BERRY'S BEAT-EM-ALL RADISH—21 Days. Consistently this variety has been the quickest producer in our trials. For those first crisp tender radishes plant a row of Beat-Em-All. An all red, round root with short tops. A home garden special. Postpaid: Pkt., 15c; 1 oz., 25c; $\frac{1}{4}$ lb., 45c; $\frac{1}{2}$ lb., 80c; 1 lb., \$1.50.

526 CRIMSON GIANT—28 Days. The largest early radish. Will still be crisp and tender after growing to a huge size. We have had radishes two inches in diameter that were still sweet and crisp. The best all season radish in our trials. Postpaid: Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., \$1.00.

525 SPARKLER OR SCARLET TURNIP WHITE TIP—26 Days. The best of the white tip radishes from our observation. This variety did exceptionally well in the trial garden in 1943. A very solid, tender, sweet, flavored radish second only to crimson giant in ability to withstand pithiness. A most attractive variety, the Scarlet Top contrasts with the white bottom producing a showy product. Very popular with market gardeners as well as home gardeners. Prepaid: Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., \$1.00.

528 EARLY SCARLET TURNIP—25 Days. An early maturing variety. Roots small, round, with red skin. Flesh very white, mild and crisp. Postpaid: Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., \$1.00.

538 IMPROVED SCARLET GLOBE—23 Days. Our seed is extra select. One of the best forcing varieties. Roots bright scarlet, globular, crisp, tender and of fine quality. Postpaid: Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., \$1.00.

533 FRENCH BREAK-FAST—25 Days. A popular variety for forcing or early outdoor planting. Gets hollow in warm weather. Medium sized, olive shaped. Scarlet with white tip. Postpaid: Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., \$1.00.

Icele Radish

lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., \$1.00.

541 ICICLE—27 Days. The most popular white radish. Grows long and slender, free from side roots. Flesh clear white, brittle, mild flavored. Postpaid: Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., \$1.00.

540 MIXED RADISHES. We offer a mixture of the best varieties of radishes. Postpaid: Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., \$1.00.

542 CHINA ROSE WINTER—52 Days. Bright rose-red in color, 4 to 6 inches long, two inches in diameter, cylindrical shape. Flesh white, crisp, and mild flavored. Postpaid: Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., \$1.00.

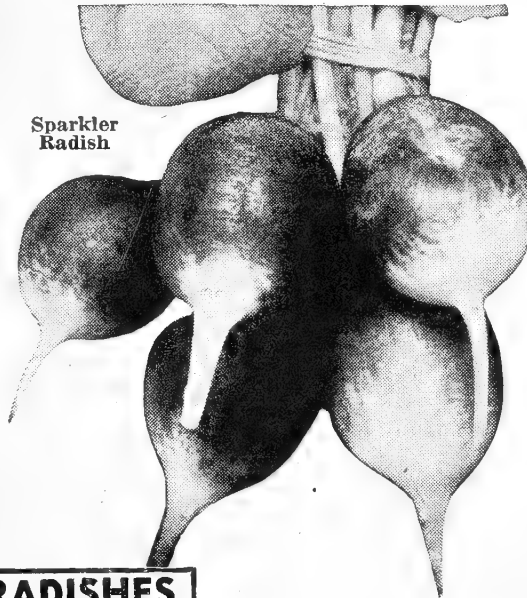

3 DELICIOUS SNAPPY RADISHES

The 3 best radishes for the home garden. Extra early, tender, snappy, delicious. Each one a superior variety. No. 539—25c Value at 19c, postpaid.

- 1 Pkt. Berry's Beat-em-all
- 1 Pkt. Crimson Giant
- 1 Pkt. White Icicle

Sparkler Radish

TURNIPS

1 oz. will plant 100 feet of row. Drill seed about 2 inches apart—cover very lightly.

601 PURPLE TOP STRAP LEAF—46 Days. An early, very productive variety. One of the most extensive grown kinds for home or market gardens. Postpaid: Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c.

607 PURPLE TOP WHITE GLOBE—57 Days. The most popular home and market garden variety. A good shipper. Very attractive appearance, fine in quality. Postpaid: Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c.

606 SEVEN TOP—45 Days. Grown for the tops which are excellent for greens and stock grazing. The roots are fibrous and of poor quality. May be left standing in the open ground during the winter, except in the extremely northern states. Extensively cultivated in the South. Postpaid: Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c.

604—SNOWBALL—75 Days. A late white variety grown largely in the South. Tops are large with cut leaves. Postpaid: Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c.

603 SHOGGIN—30 Days. The most popular foliage turnip. Grown for early greens and small roots. Tops 18 to 20 inches tall, erect, bright green, strap leaved. Roots round, white, tender and mild. The fastest grower of all. Postpaid: Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c.

609 COWHORN—70 Days. A stock feeding turnip. Roots 12 to 15 inches long, tapering. Flesh is sweet and tender. A good keeper. Postpaid: Pkt., 5c; 1 oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c.

612 RUTABAGA, AMERICAN PURPLE TOP—90 Days. A dependable variety for home or market garden. Roots are large, round, yellow with purple top; flesh is light yellow, firm, sweet and tender. Postpaid: Pkt., 10c; 1 oz., 15c; $\frac{1}{4}$ lb., 25c; $\frac{1}{2}$ lb., 40c; 1 lb., 75c.

HERBS

681 Anise. An annual grown for the seeds and leaves. Seeds used for flavoring cakes and cookies; leaves for garnishing. Pkt., 10c, postpaid.

682 Borage. An annual grown for its fuzzy leaves of cucumber flavor. A bee plant. Pkt., 10c, postpaid.

683 Caraway. A biennial grown for its seed. Used for spices and condiments. Pkt., 10c, postpaid.

685 Dill. An annual grown for seed and leaves which are used in pickles and for flavoring. Pkt., 5c; oz., 15c, postpaid.

686 Florence Fennel. Plant grows about 30 inches tall, with broad overlapping stalks similar to celery but forming

a flat-oval, bulb at the base of the stem. This bulb or "apple" is used as celery. It is sweet and anise flavored. Pkt., 10c, postpaid.

687 Sage. A perennial. Leaves are used for seasonings, medicines and soap perfumes. Pkt., 10c, postpaid.

688 Sweet Basil. An annual. Flower buds and leaves are used for seasoning. Pkt., 10c, postpaid.

693 Sweet Marjoram. An annual used in seasonings; yields a fragrant oil. Pkt., 10c, postpaid.

692 Summer Savory. An annual. Leaves are used in salads and dried for soups. Pkt., 10c, postpaid.

VEGETABLE FAVORITES OF THOUSANDS

WINTER SQUASH

Winter Squash, particularly yellow fleshed varieties, is an excellent source of Vitamin A. Squash is also easily kept in dry storage. A family should have 50 pounds a year. We recommend 1 oz. of Summer Squash and 2 oz. of winter varieties. Plant in hills summer types about 4 feet apart, winter about 8 feet apart.

The following five varieties of winter squash:

Pkt., 5c; oz., 20c; ¼ lb., 70c; ½ lb., \$1.20; 1 lb., \$2.00, postpaid.

552 GOLDEN HUBBARD—100 Days. Earlier than improved Hubbard. Fruits 8 to 10 pounds with a hard warty orange skin. Thick, yellow, fine grained, dry flesh; excellent quality for canning and freezing. A good keeper.

554 IMPROVED HUBBARD—105 Days. Standard winter variety for home and market gardens. The best shipper. Our strain is very early. Dark bronze-green, rind hard and tough, slightly warted. Fruits weigh about 12 pounds, flesh very thick; orange-yellow, fine grained, sweet and dry.

555 BLUE HUBBARD—110 Days. Like Improved Hubbard but the color is a clear blue grey. Flesh is bright yellow, thick, fine grained, very dry and sweet. Splendid for pies. A good keeper.

556 BUTTER CUP—100 Days. A new introduction just the right size for baking. Grows exceptionally well in the Great Plains region. Of excellent quality, flavor is similar to sweet potatoes. Flesh dry, deep rich orange, texture and keeping qualities the best.

557 TABLE QUEEN OR DES MOINES—58 Days. Individual size squash. Desirable for home or market garden; also a good shipper. Fruits acorn-shaped, smooth, thin shelled, dark green. Six inches long, 3 inches diameter. Flesh light yellow, with sweet flavor. Makes splendid pies, bakes well.

SUMMER SQUASH

These three varieties: Pkt., 5c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.

561 MAMMOTH WHITE BUSH SCALLOP—56 Days. A favorite with all our trade. An early maturing round flat squash, largest of the summer varieties. Fruit a clear white, and excellent for stewing.

553 GIANT GOLDEN STRAIGHT NECK—55 Days. A new variety selected from the crookneck. The straight neck permits easy packing and handling. Fruits 18 to 20 inches long, heavily warted, deep orange color. Thick and meaty flesh.

551—BLACK ZUCCHINI—60 Days. Fruits very nearly cylindrical, straight, smooth, dark green-black. Flesh greenish white at eating stage, very good flavor.

Vegetable Oyster
Salsify

MAMMOTH SUNFLOWER. Has a high feeding value and is easily grown. ¼ lb., 15c; ½ lb., 25c; 1 lb., 40c.

SALSIFY

571 Mammoth Sandwich Island. Vegetable Oyster. An improved variety with roots 6 to 8 inches long, thick, tapering, smooth. Decided oyster-like flavor. Fine for soups, etc.

Postpaid: Pkt., 10c; ½ oz., 20c; 1 oz., 35c; ¼ lb., \$1.30; ½ lb., \$2.55; 1 lb., \$4.50.

TOBACCO

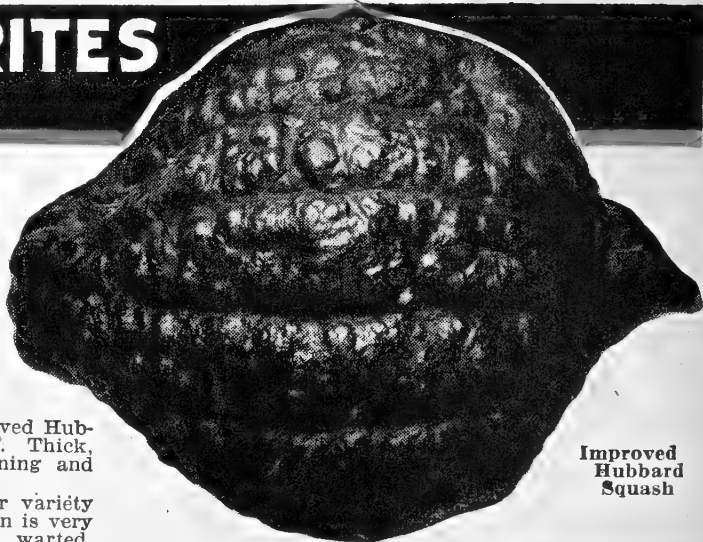

Postpaid price on each of the following four varieties: Pkt., 10c; oz., 40c; ¼ lb., \$1.25; 1 lb., \$4.00.

726 Connecticut Seed Leaf.

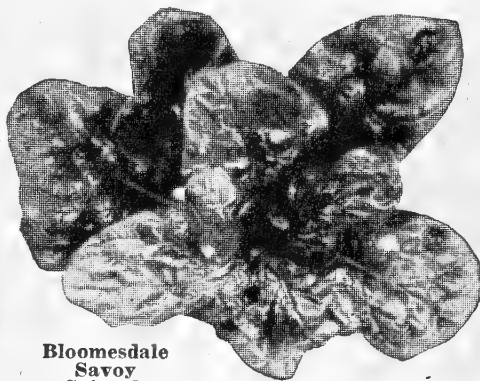

727 Havana. An early variety used largely for cigar wrappers on account of thinness, and fine quality.

728 White Burley. Very popular.

729 Judy's Pride. Broad attractive leaves. Easy to cure. Used for fillers and wrappers; smoking or chewing.

Improved
Hubbard
Squash

Bloomsdale
Savoy
Spinach

SPINACH

581 NEW ZEALAND. It thrives in hot, dry weather, and almost any soil. May be cut throughout the summer, but can not stand frost. Leaves small, broad and pointed, while plants are large and spreading. Postpaid: Pkt., 5c; 1 oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.

585 NOBLE GIANT. Easy to wash. Leaves medium thick, green, very large, broad and smooth, with slight crumpling. Very good quality. The best of the large smooth leaved type. A long standing variety. Postpaid: Pkt., 5c; 1 oz., 10c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c.

583. BLOOMSDALE SAVOY. An early variety. Popular for local and long distance markets, for canning, and home use. A long keeper after cutting. Leaves medium size, crumpled, glossy dark green. Postpaid: Pkt., 5c; 1 oz., 8c; ¼ lb., 18c; ½ lb., 30c; 1 lb., 50c.

582 LONG STANDING. A quick growing, long bearing variety for mid-summer use. Plants grow low and spreading, with pointed dark green leaves. Very crumpled. May be seeded in spring or fall. Postpaid: Pkt., 5c; 1 oz., 8c; ¼ lb., 18c; ½ lb., 30c; 1 lb., 50c.

MISCELLANEOUS

690 Kale, Dwarf Green Curled Scotch—55 Days. A member of the cabbage family, used for greens. Leaves large and crimped. Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 45c; ½ lb., 85c; 1 lb., \$1.60.

691 Kale, Tall Green Curled Scotch—60 Days. Similar to the dwarf variety but grows larger. Very tender after first frosts. Postpaid: Pkt., 5c; 1 oz., 15c; ¼ lb., 45c; ½ lb., 85c; 1 lb., \$1.60.

720 Okra, Long Green Podded—55 Days. Plants dwarf and very productive. Valuable for soups and stews. Postpaid: Pkt., 5c; 1 oz., 10c; ¼ lb., 25c; ½ lb., 45c; 1 lb., 85c.

721 Okra, White Velvet—60 Days. Early, prolific, with creamy white pods. Meaty, tender, smooth, very attractive. Postpaid: Pkt., 5c; 1 oz., 10c; ¼ lb., 25c; ½ lb., 45c; 1 lb., 85c.

706 Broccoli, Italian Green Sprouting—70 Days. Forms large head consisting of a cluster of small heads. Both heads and stems are cooked and served like cauliflower but is easier to raise and has more delicate flavor. Postpaid: Pkt., 10c; ½ oz., 20c; 1 oz., 30c; ¼ lb., 55c; ½ lb., \$1.05; 1 lb., \$2.00.

705 Collards, Georgia. A good substitute for cabbage which succeeds on poor soil, grown especially in the South. Can be boiled like cabbage or used as cole slaw. Postpaid: Pkt., 5c; 1 oz., 10c; ¼ lb., 18c; ½ lb., 30c; 1 lb., 50c.

695 Kohlrabi, White Vienna—62 Days. Dwarf variety. Excellent for home and market garden. Bulbs 2 to 3 inches in diameter, globular, flesh white and tender. Postpaid: Pkt., 5c; ½ oz., 20c; 1 oz., 35c; ¼ lb., \$1.10; ½ lb., \$2.05; 1 lb., \$4.00.

495 Parsley, Moss Curled—70 Days. A compact plant with dark green finely cut and curled leaves. Very desirable for garnishing and decorating. Prepaid: Pkt., 10c; 1 oz., 15c; ¼ lb., 35c; ½ lb., 55c; 1 lb., \$1.00.

496 Parsley, Hamburg Rooted—90 Days. Forms thick, fleshing, edible roots, 8 to 10 inches long, used for flavoring, like celery or celeriac. Prepaid: Pkt., 10c; 1 oz., 15c; ¼ lb., 35c; ½ lb., 55c; 1 lb., \$1.00.

BEAUTIFUL FLOWERS

Cost so Little and Mean so Much!

PLANTING BOOKLETS FREE

In the opposite column we describe some large cloth bound books which are of great value to gardeners. If you want very complete information that will help you make and save a lot of money order one or both of those books.

We do have some smaller booklets that contain a wealth of information which are given free with orders. One Free Vegetable Garden Booklet is described and offered on page 48 and is given upon request with an order for \$1.00 or more of vegetable seeds.

Another booklet, Garden Illustrated, is given upon request with an order of \$2.00 worth of Nursery and Flower seed.

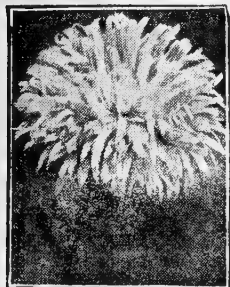

BERRY'S LARGE SIZE FLOWER PACKET MIXTURES

Finest Cut Flowers —Pkt. 10c **Berry's Wildflower Mixture—Pkt. 10c**

Contains all the popular varieties found in our catalog listing. A glorious variety of flowers for cutting. We suggest planting in rows so you can cultivate and keep flowers out close for more prolific blooming.

Native annuals that are hardy and will bloom over a long period. Fine for a group or corner planting where no formality is needed but a mass of bloom can be enjoyed all the time.

Other Special Flower Mixtures page 68. All flowers listed are marked Annual (A) or Perennial (P). Each price is for our large sized packet.

FOR BACKGROUND and TALL BORDERS

This group of plants has been selected for hardiness, and easy culture. Most of these varieties will do well on most soils, and under a wide range of climatic conditions.

1125 Balsam (Lady Slipper). (A.) A double flowered tall variety with large showy flowers in crimson, rose, scarlet, and white. Pkt., 10c.

1172 Caster Oil Beans Mixed. (A.) A beautiful ornamental foliage, each plant a perfect pyramid. Plant as a background, next to fences and also in chicken yards for shade for the chickens. Protect till large enough so chickens can not destroy. Pkt., 10c.

1188 Chinese Woolflower. (A.) Large globular woolly flower heads of bright red. Plants grow 2 to 3 feet; bloom continuously. Pkt., 10c.

1200 Cosmos Single Mixed. (A.) An extra early type in all shades of lavender, pink and red. Pkt., 10c.

1118 Cup and Saucer (Campanula). (P.) Grows about 2 ft. tall. Flowers bell-shaped. Pkt., 10c.

1178 Dusty Miller (Centuria). (P.) Silvery foliage plant used for background plantings. Pkt., 10c.

1240 Four O'Clock. (A.) This old-fashioned flower bears profusely flowers of white, yellow, crimson and pink. Use it for hedges, for foundation plantings, and large beds for public places. Pkt., 10c.

1265 Hollyhock, Berry's Prize. (P.) Single ruffled and double mixed. Easy to grow, looks well anywhere. Hollyhocks are most decorative and the great spikes of bloom are towers of beauty. Plants come up each year and should be in every flower garden. Pkt., 10c.

1120 Joseph's Coat (Amaranthus). (A.) Mottled leaves of red, yellow, and green. A beautiful foliage plant. Easy to grow. Pkt., 10c.

Single Early Cosmos

ROCK GARDENS BORDERS & EDGINGS

We have carefully selected a group of annuals and perennials best suited for planting rock-gardens, borders, and edgings. These plants range in height from 2 inches to one foot. These smaller plants take much less garden space than other varieties.

1514 Perennials for Rock Gardens. A mixture of low growing plants that will start early and bloom throughout the growing season. They grow from the old roots each spring, save replanting every year. Pkt., 15c.

1320 Annuals for Rock Gardens. A carefully prepared mixture of low growing, many colored, free flowering annuals which will supply color in your rock garden all summer. Pkt., 10c.

1110 Ageratum, Blue Bedding. (A.) Blooms profusely. Splendid for pot culture, rock gardens, and bedding. Pkt., 10c.

1112 Alyssum, Violet Queen. (A.) A beautiful shade of violet. Does not fade in hot weather. Pkt. 10c.

1115 Carpet of Snow (Alyssum). (A.) 2-3" high. A solid mass of white all summer. Pkt., 10c.

1282 Flax, Scarlet (Linum). (A.) Flowers brilliant red. Pkt., 10c.

1295 Marigold, Miniature Mixed. (A.) 9". A delightful mixture. Pkt., 10c.

1301 Nasturtium, Lilliput Mixed. (A.) 9" single mixed in a wide range of hybrid colors. Pkt. 10c.

1327 Pansy, Giant Mixed. (A.) Beautiful range of colors. Pkt., 15c.

1321 Petunia Mixed Varieties. Includes giant ruffled, all colors of large flowering and fringed petunias. Are easily grown and sure to bloom. They bloom abundantly even during the heat of mid summer. This should be a part of every flower garden. Pkt., 10c.

1316 Phlox (Drummondii) Mixed. (A.) 1 ft. Large early blooming. Will last until frost. Pkt., 10c.

1310 Portulaca (Moss Rose). (A.) Single. Dainty little flowers which thrive on poor soil, bloom even in hottest weather. Pkt., 10c.

1311 Portulaca (Moss Rose). (A.) Double. Grow like single, but have double flowers. Pkt., 15c.

1355 Sweet Peas, Cupid Mixed. (A.) A 6 in. rock garden sweet pea with a good range of color. Pkt., 10c.

1370 Sweet William, Single. (P.) Mixed. 1 ft. Excellent for borders. Pkt., 10c.

1380 Verbena, Mixed. (A.) 1 ft. Will thrive anywhere. Many glorious colors in our mixture. Pkt., 10c.

1383 Verbena, Trailing Sand Pink. (A.) Sweet scented at night. Pkt., 10c.

Annuals for Window or Porch Box

Large Mixed Packet— **15c**

A charming selection of quick growing annuals which will make a bright spot and interesting display. Includes both compact and trailing types with brilliant colors and long flowering season.

SEEDING SUGGESTION

Sowing fine flower seeds. One of our garden enthusiasts mixes her fine seeds such as petunia, poppy, etc., with ten times their bulk of dry sand and puts them into a salt shaker and sifts them over the beds or borders, firming them with a board. A very practical idea. Try it.

Bachelor's Button—Centaurea

VINES and CLIMBERS

1256 Ornamental Gourds Mixed. (A) mixture of many odd shapes and colors. The vines will grow on a fence or trellis. Postpaid: Pkt., 10c; oz., 15c.

1437—Beans, Scarlet Runner. (A.) Has brilliant sprays of scarlet blossoms. Grows 10 ft. high and is a quick grower. Makes an excellent covering for out-houses, sheds or old buildings that you wish to cover. Try some this year. Pkt., 10c; oz., 15c.

1415 Cardinal Climber. (A.) 25 ft. Attractive fern-like leaves. Cardinal-red flowers borne in clusters, from mid-summer to frost. Pkt., 10c.

1430 Cypress Vine. (A.) 10 ft. Star-shaped white and scarlet blossoms. Beautiful feathery foliage. Pkt., 10c.

1450 Moonflower. (A.) 20 ft. Popular climber and very vigorous grower. Large overlapped leaves. Blooms in evening. Pkt., 10c.

1458 Morning Glory Scarlet O'Hara. (A.) Red. As large and beautiful flowers as Heavenly Blue. Easy to grow. Pkt., 10c.

1457 Morning Glory Pearly Gates (A.) White. The newest of the grand early flowering varieties. Grows and blooms like Heavenly Blue and Scarlet O'Hara. A silver medal winner. Pkt., 10c.

1456 Morning Glory Heavenly Blue. (A.) Early blooming, vigorous. One of our most beautiful and popular flowers. Easy to grow. Exquisite blue color. Pkt., 10c.

1455 Morning Glory. Imperial Mixed. (A.) 20 ft. A rapid grower with many varicolored flowers. Early blooming. Pkt., 10c.

Morning Glories. Red, White and Blue. See Descriptions. Special offer, 1 packet each, 28c. Order now.

2 yr. Heavy—\$1.15 each; 3 for \$3.30 postpaid.

No. 5000—SOUTHPORT—Scarlet-Crimson. The buds are crimson, but the open flower is brilliant red, almost scarlet. A bed of Southport stands out like a fire.

No. 5031—AMI QUINARD—Dark Red. A new rich deep maroon. Very fragrant, vigorous, free blooming and disease resistant.

No. 5033—CALEDONIA—White. One of the finest white roses grown. The long snowy white buds are beautifully shaped and the blossoms possess a delicious fragrance.

No. 5041—THE DOCTOR—Pink. Beautiful, large, brilliant, satiny pink with gold base. Very fragrant.

No. 5042—McGREDY'S YELLOW. A sturdy vigorous rose with chrome yellow blooms of striking beauty.

VICTORY ROSE GARDENS

No. 5232—1 each of above. 5—2 yr. Medium size—5 for \$4.35, postpaid.

No. 5233—1 each of above. 5—2 yr. Heavy size—5 for \$5.15, postpaid.

ARCTIC ROSES

2 yr. Medium. Each, 95c; 3 for \$2.70
2 yr. Heavy. Each, \$1.15; 3 for 3.30

Extra Hardy. Very vigorous and dependable. These Hybrid perpetual Roses will produce many beautiful, fragrant blooms on large, sturdy bushes. These Arctic Roses thrive on severe climates.

No. 5052—MME. ALBERT BARBIER. Multi-colored large double flowers, salmon colored, tinted yellow.

No. 5054—BLACK PRINCE—Red. Hardy, vigorous growing rose with many large, very double, fragrant blooms of lovely ruby red.

EVERBLOOMING FLORIBUNDA ROSES

Grade A—85c Ea.; Grade AA—\$1.00 Ea.

Bush Roses. Grow 24 to 30 inches high. Bloom all summer until frost. One of the easiest to grow. Resist the hottest sun and are exceptionally winter hardy. Practically covered with beautiful large flower clusters from spring till frost.

No. 5047—ELSE POULSEN—An abundance of extra large semi-double Rose-pink blooms borne on large stems. Delicately fragrant. Long lasting when out.

No. 5048—POULSENS YELLOW—Dainty buds are carmine tinted. They burst into a brilliant mass of clear yellow. Beautiful in garden, for table decorations or corsages.

No. 5059—EUTIN—Large clusters of deep red double blooms. Vigorous grower. Strong and disease resistant.

BERRY'S FAVORITES

2 yr. Medium—
Each 85c; 3 for \$2.43

2 yr. Heavy—
Each \$1.00; 3 for \$2.88

Our choice of old favorites in each color range for rose lovers of America. You'll like them all and our special collections below save money.

No. 5005—TALISMAN—Multi-colored yellow and copper tinged red. Extremely fragrant.

No. 5008—EDITH PERKINS. Outstanding among newer roses. Long, pointed buds opening to large, extra double rich pink, suffused coppery bronze and gold. Extremely vigorous and disease resistant.

No. 5037—ETOILE DE HOLLANDE—Red. America's favorite garden rose! Large, bright rosy-red, free bloomer.

No. 5040—GOLDEN DAWN—A new yellow that is a sensation. Free bloomer. Large, fragrant, long lasting flowers.

No. 5051—FRAU K. DRUSCHKI—White. Hardy, blooms all summer. Very vigorous. Extra large, double snow-white bloom.

ROSE GARDENS AT LOWEST PRICES

5 Large size bushes @ \$4.50

Hardy CLIMBERS

2 yr. Medium—Each\$0.95
2 yr. Heavy—Each 1.10

Climbers may be planted on your porch, trellis or fence. They are hardy, long lived and will produce hundreds of beautiful flowers each year. Plant a variety of colors.

No. 5131—CL. AMERICAN BEAUTY—Rose-red. Large fragrant very hardy. Free bloomer. The individual blooms can not be distinguished from those of its hothouse namesake.

No. 5132—DR. VAN FLEET—Full double large flesh pink flowers. Buds tearose shape open into blooms very large for a climber. Profuse bloomer with bronze foliage.

No. 5133—GARDENIA—One of the better semi-double yellow climbers. Hardy and free blooming. One you can depend upon in every way.

No. 5134—PAUL'S SCARLET—Blazing red, double blossoms in masses. Vigorous, hardy, free blooming. No better climbing roses can be had at any price. Plant on Trellis, Arbor or along the fence.

Everblooming CLIMBERS

2 yr. Medium—Each\$0.95
2 yr. Heavy—Each 1.10

Imagine a Rose Arbor covered with colorful fragrant blooms all summer until frost. Dozens of fully double Tea Rose blooms for cut flowers. Do not grow as tall as hardy climbers, but bloom several weeks longer.

No. 5101—PINK RADIANCE—Rose Pink. Large beautiful flowers. Vigorous growing. Loaded with blooms all summer long.

No. 5102—ETOILE DE HOLLANDE—Vivid Red. Long pointed buds. Stems long and stiff and a delightful fragrance. A brilliant climbing tea rose that will make a real showing.

No. 5105—TALISMAN—Multicolored yellow and copper-tinged red. Buds are like greenhouse roses and stems so long. A fragrant beautiful climber. No rose garden is complete without this rose.

No. 5106—MRS. P. S. DUPONT—Lovely shades of golden yellow and rich orange. Vigorous, free bloomer.

GIANT ROSES

EXTRA HEAVY SIZE

Each, \$1.35; 3 for \$3.90, postpaid

No. 5060—H. GAEDE—Large beautiful blooms. Orange flushed with nasturtium-red.

No. 5061—GOLDEN RAPTURE—America's finest yellow blooms on strong stems. True rose fragrance.

No. 5066—PICTURE—A long well shaped bud of bright rose-pink. Heavy textured petals. A splendid flower for cutting.

No. 5067—McGREDY'S IVORY—White. The large beautifully formed buds are creamy white and open with a dainty flush of pink in the center of the flower, but this flush disappears leaving a long lasting white rose for cutting.

No. 5068—ROUGE MALLERIN—Glowing brilliant crimson scarlet in great profusion until frost. Delightful spicy fragrance. Longest keeping cut flower rose.

No. 5070—CRESCENDO—A new rose producing many extra large, deep red flowers. Blooms until frost. Very vigorous. We think this is the best of all Red Roses.

No. 5231—Garden of above 6 for \$7.25.

TALL HEDGES for Screens

Will Grow to
4 ft. or Higher
See Description

See Page 73 for Low Prices on Tree Seedlings for Windbreaks.

These taller, rapid growing varieties are best for screens to conceal undesirable buildings, alleys, unsightly situations next door, etc. Where room is available, they are excellent for mass plantings or as background for Shrub borders, etc.

No. 5508 HONEYSUCKLE—Bush. (12 to 15 ft.) One of the most attractive of the taller hedges. Perfectly hardy, vigorous grower—beautiful flowers followed by bright red berries. The ideal screen. Plant 2 to 3 ft. apart.

12 to 18 inch—10 for \$1.50; 25 for \$3.00; 100 for \$11.50.
18 to 24 inch—10 for \$2.20; 25 for \$4.50; 100 for \$16.00.

No. 5608 RUSSIAN MULBERRY. A very useful variety at unusually low cost. Quick growing and absolutely hardy. Useful for both hedge or screen as it can be kept pruned down to 4-5 ft. (when planted 15 to 18 inches apart), or allowed to grow to 12-16 ft. high (when planted 3-5 ft. apart).

18 to 24 inch—10 for 75c; 25 for \$1.40; 100 for \$4.50.

2 to 3 foot—10 for 90c; 25 for \$1.75; 100 for \$6.00.

No. 5512 CHINESE ELM. Another very useful, attractive yet inexpensive variety. When planted 15 to 18 inches apart, it makes a good tight hedge, kept pruned down to 6 to 8 ft. high. For effective screen, plant it 3 to 5 ft. apart and it will grow 15 to 18 ft. tall.

18 to 24 inch—10 for 60c; 25 for \$1.25; 100 for \$4.00.

2 to 3 foot—10 for 75c; 25 for \$1.50; 100 for \$5.00.

TRIMMED and NATURAL LOW HEDGES

IMPORTANT. Your Hedge will never be tight, close to the ground unless you prune it, severely immediately after planting. Always prune off at least 1/2 of the top branches. Smaller sizes should be left only about 4 to 6 inches taller than ground—larger sizes about 10 to 12 in.

No. 5506 PRIVET—AMOR RIVER NORTH. Most popular Hedge plant—Hardy Russian Privet. Dense, glossy green foliage on numerous upstanding branches. Can be kept pruned down to a thick Hedge only 2 feet high or will grow over 4 feet if not pruned.

12 to 18 inch—10 for \$1.50; 25 for \$3.00; 100 for \$11.50.
18 to 24 inch—10 for \$2.10; 25 for \$4.50; 100 for \$16.00.
2 to 3 foot—10 for \$3.00; 25 for \$6.75; 100 for \$25.00.

No. 5505 BARBERRY—Green. A very compact, dense growing, thorny, protective Hedge. Can be kept pruned to 2 feet or allowed to grow to 4 feet. In Fall, the leaves turn red and bright red berries appear.

9 to 12 inch—10 for \$1.10; 25 for \$2.25; 100 for \$8.00.

12 to 18 inch—10 for \$1.50; 25 for \$3.00; 100 for \$11.50.

No. 5502 BARBERRY—Red. Like green but with brilliant red foliage when planted in full sun.

12 to 15 inch—5 for \$1.40; 10 for \$2.50; 25 for \$5.75.
15 to 18 inch—5 for \$1.75; 10 for \$3.20; 25 for \$7.50.

No. 5511 SPIREA V.H.—BRIDAL WREATH. One of the most beautiful Hedges—in the Spring, its graceful arching branches are a mass of lovely white bloom. Very hardy—grows to 4 to 6 ft. high. Prune very severely when planted but, after the first year, prune out only the dead wood.

12 to 18 inch—10 for \$1.75; 25 for \$3.75; 100 for \$13.00.

18 to 24 inch—10 for \$2.30; 25 for \$5.00; 100 for \$18.00.

2 to 3 feet—10 for \$3.20; 25 for \$7.25; 100 for \$27.00.

No. 5507 CARAGANA. Best ornamental Hedge for severe northern climates. Strong, upright, growing thornless branches with dense foliage and yellow blossoms insure a beautiful hedge. Keep pruned from 3 to 6 feet or you may let it grow higher.

18 to 24 inch—10 for \$1.10; 25 for \$2.25; 100 for \$8.00.
2 to 3 feet—10 for \$1.50; 25 for \$3.00; 100 for \$11.50.

The above varieties listed under Tall Hedges are also ideally suited for windbreak plantings because of their quick growth. On page 73 we have them priced in larger quantities that will save you money. Plant these in combination though with slower growing Evergreen Seedlings which will make a more permanent windbreak for you. Get our Free Evergreen Circular for full details.

BERRY'S GUARANTEE SATISFACTION AT MONEY SAVING PREPAID PRICES

We have always guaranteed satisfactory quality. See page 75. This year we can assure you of more. Because we don't use expensive illustrative color pictures and free gifts you may not care about we can save you real money on the best quality nursery stock that can be grown.

In comparing our prices remember they are all prepaid. In ordering you can save then at least 20% over other nurseries who may have just as low a price but ship collect.

VINES

Strong 2 Yr. Plants for Rapid Vigorous Growth For Trellis, Arbors, Porches, etc.

These 6 varieties, 43c each; 3 for \$1.20, postpaid

No. 5538—BOSTON IVY. Best clinging vine for brick, stone, cement or stucco.

No. 5537—ORIENTAL BITTERSWEET. Better than the American because it produces many more lovely red berries for winter bouquets. A sex plant that requires cross-pollination—always plant from 4 to 6 nearby.

No. 5539—HONEYSUCKLE—Hall's. A very hardy, rapid growing vine covered with creamy white flowers in season. Fine for porch, arbor or fence. Best vine for ground cover in shady places, on steep banks or terraces.

No. 5531—CLEMATIS—Paniculata. The hardy, vigorous growing Clematis. Covered with fragrant flowers in late summer and fall.

No. 5542—WISTERIA—Purple. The most magnificent of all vines—lasting for generations and increasing in beauty each year. Long clusters of lilac flowers in summer. Requires some protection in severe climates.

No. 5541—TRUMPET VINE—The Old Favorite hardy Trumpet Vine. Vigorous growing, hardy vine is covered with larger trumpet shaped, scarlet flowers in summer.

Some Vines of Special Beauty

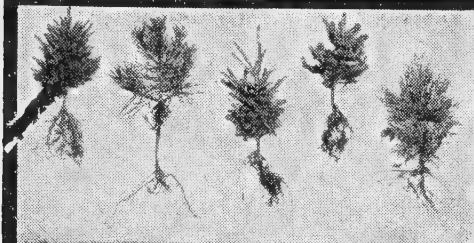

No. 5532—SILVER LACE VINE. The fastest growing, most beautiful hardy vine. Often grows 20 ft. per year. Glossy green foliage covered with snowy white flowers. Each, 65c; 3 for \$1.65.

No. 5526—CLEMATIS JACKMANI—Purple. A beautiful perennial vine with its mass of large, rich, purple bloom. Considered the most beautiful vine for trellis. Requires protection in severe climates. Each, 67c; 3 for \$1.89.

No. 5524—CLEMATIS—M. E. Andre. Lovely, Wine-red flowers completely cover the plant. One of the most beautiful of all the Clematis. Each, 67c; 3 for \$1.89.

No. 5525—HONEYSUCKLE—Gold Flame. New, everblooming Honeysuckle. Masses of deep scarlet trumpets lined with gold from early summer until frost. Attractive blue green foliage. Plants are vigorous, hardy and disease resistant. Each, 69c; 3 for \$1.95.

10 Lovely ORNAMENTAL EVERGREENS

Only
\$3.48
POSTPAID

2 Each of 5 Varieties Regular \$6.50 Value

An ideal ornamental evergreen group in a lawn or at house corners. The pines and Spruce are fine for windbreaks. With evergreens very scarce, many will ask \$6.00 for a similar offer. Less than 35c each for fine sturdy trees.

10 Trees Up to 1½ Feet Tall

These are fine heavy trees. The varieties as illustrated left to right are Black Hill Spruce, Mugho Pine, Colorado Blue Spruce, Douglas Fir and American Arbor Vitae. All are 1 to 1½ ft. tall except Colorado Blue which are 8 to 12 inches. This is a matchless value in fine evergreens. Supply limited. Please order early.

Hard Sugar MAPLE

The Nursery Bargain of the Year

These 12 to 18 inch trees are priced exceptionally low to get you started with one of the finest trees you can grow. Excellent for shade, timber, fuel and sugar. Very disease free. Will grow most anywhere. Gorgeous fall colors. Fine healthy trees.

10 for \$1.00 25 for \$2.25 50 for \$3.75
100 for \$7.00

While these trees are rather slow growing, the years go by pretty fast. You'll be surprised how quickly they make a nice showing. Plant waste spaces to sugar maples. Have an eye on the future. These trees last for years and make a living monument to our foresight. Extremely hardy. Adapted to a wide range of soil and climate. A tree of rare beauty. At this special very low introductory price you can get out a lot of them. Plant them in lawns, along streets and roads and turn waste places into future gold mines. All prices are prepaid.

SPECIAL EVERGREENS FOR HOME PLANTINGS

Large Evergreens for Windbreaks

This special offer of twice transplanted windbreak stock is our biggest value of the year. We make this offer only on Ponderosa Pine and Norway Spruce as these two Evergreens alone make a fine two row windbreak. These extra large trees that cost so little may be planted in their permanent location, the Ponderosa Pine should be your outside row and the trees 8-10 feet apart. On the inside the Norway Spruce may be planted 14-16 feet apart.

PONDEROSA PINE. A hardy tree. Will do well where many evergreens fail. Will grow on poor soil and under dry conditions. Sometimes grows to over 200 ft. tall.

NORWAY SPRUCE. A very hardy rapid grower, fine for windbreaks. This tree branches close to the ground and has a very dense deep green foliage. Grows 60 to 70 feet tall, and lives 50 to 60 years.

PREPAID PRICES

Norway Spruce— 10 50 100

4 of any one variety, 3.25

PFITZER JUNIPER. Exceptionally beautiful, graceful and hardy in shade or sun. Spreading branches 3 to 4 feet at maturity. 12 to 15 inch size.

SAVIN JUNIPER. Hardy everywhere. Beautiful trailing type, fine for foreground or foundation groups. 12 to 15 inch size.

IRISH JUNIPER. An old well-known variety with bright green foliage. Grows 7 to 8 feet tall. 18 to 24 inch size.

GLOBE ARBOR VITAE. Charming little globe for the foreground giving delightful contrast to spreading Juniper. 10 to 12 inch size.

PYRAMIDAL ARBOR VITAE. Formal compact pyramidal type. Perfect for entrance, foundation or garden plantings. Can be kept clipped back to any desired height. 18 to 24 inch size.

NORWAY SPRUCE. Fastest growing spruce. Tall compact ornamental pyramid, well branched to ground. 15 to 18 inch size.

AUSTRIAN PINE. A compact symmetrical sturdy tree, well branched. Long stiff dark green needles on broad branches. Fast growing—thrives anywhere. 15 to 18 inch size.

BLACK HILLS SPRUCE. Famed for its perfect symmetry. Extremely hardy. Great favorite for specimen planting on lawn. 15 to 18 inch size.

MUGHO PINE. Dwarf low growing pine used for doorway, foundation and cemetery plantings. Grows in a low compact bush. New growth looks like tiny candles at the end of each branch. An unusually hardy and attractive evergreen. 10 to 12 inch size.

- 1 Colo. Blue Spruce

No. 721—10 Trees \$1.50, Prepaid.

WINDBREAKS

at LOW COST

from SEEDLING TREES

A MONEY MAKING INVESTMENT

For just a few dollars you can now plant several hundred Evergreen and Forest Tree seedlings; to protect your home, farm buildings, and feed lots, from sweeping winds in winter and summer. Windbreaks from these seedlings will greatly increase crop production from the protection given, also production of your livestock. Nearly every farm has some waste land that will grow all the fence posts you need, all the wood you can burn, and at the same time, prevent soil erosion and provide shelters for grazing livestock. A fine investment needed on every farm at such low cost.

EVERGREEN SEEDLINGS

Evergreen seedlings should be planted in beds and cultivated like garden plants. Rows may be 18 to 24 inches apart with the Evergreens 10 to 15 inches apart in the row. Provide some shade for the first year. A covering of lath spaced about 1½ inches apart with slats running north and south is good. After about 2 years or when 18 to 24 inches high, transplant into permanent location. For further planting instructions and windbreak ideas ask for our Free Circular on Evergreens giving a full description of all varieties.

Berry's Evergreen seedlings are grown in northern Wisconsin. They are vigorous with a strong root system guaranteed to be hardy and adapted anywhere. We ship direct to you prepaid at proper planting time furnishing planting instructions and guaranteeing satisfaction.

Order now while we can still supply these better seedlings. 10 each Ponderosa Pine, Black Hills Spruce, Douglas Fir, American Arbor Vitae. No. 724—All 40—6/10" 3 yr. seedlings only \$2.00 postpaid.

100 Evergreen Seedlings—\$2.90 Postpaid

Our favorite collection containing two best Spruce and Pine varieties—an ideal combination for any windbreak. These smaller seedlings are easy to start—sure to grow—cost less than 2c each delivered to your door.

25 each; Black Hills Spruce, Am. Arbor Vitae, Colo. Blue Spruce, Ponderosa Pine.

No. 722—all 100—3/6"—only \$2.90 postpaid.

TREE SEEDLINGS

These are more rapid growing than Evergreens so should be used in combination with Evergreens as they are not nearly so permanent as Evergreens.

Our tree seedlings are well rooted, hardy and vigorous. They are easy to start, planting instructions being furnished. We ship prepaid at proper planting time early in the Spring and guarantee satisfaction.

We suggest planting all sizes of tree seedlings in rows where it is convenient to cultivate them often the first 2 or 3 years—rows about 36 inches apart with the seedlings 12 to 24 inches apart in the row—they grow more bushy when planted 24 inches apart. After 2 years, when the trees are well rooted and about 5 feet tall, transplant into permanent location.

SAVE 15% to 20%

We are fair to every customer regardless of the amount of order. 100% value in the best nursery stock America can grow. Accurate grades, true descriptions and a fair and square deal always is guaranteed you. Order with safety at Berry's. Prices are lowest and quality highest so don't delay—act now. Remember our Prepaid Prices save you 15-20% over other nurseries.

HIGHEST QUALITY—LOWEST PRICES

FINEST QUALITY

Our enviable reputation is built on high quality at low prices—superior values. We have developed the largest business of its kind in the country, on this sound policy.

These same high standards maintain in our nursery department. Each and every item is carefully tested before Berry's will put their name behind it. You can order our Nursery Stock with full confidence that it is accurately and honestly described, that the quality is of the highest and the prices, the lowest.

Berry's guaranteed nursery stock is grown by experts, wherever possible in northern sections for extra-hardiness. Transplanted, pruned and root pruned to insure sturdy, well rooted, well branched plants that will thrive anywhere. Do not be misled by claims of superior quality—we offer high quality at very low prices.

LIBERAL GUARANTEE

Berry's guarantee their nursery stock to be exactly as represented and to be delivered to you in good planting condition. If not, we will replace it free of charge but you must notify us within 10 days after you receive it.

If any nursery stock is proven not true to name, we will, upon proper proof, replace all such stock or refund the exact amount paid, but, in no case, shall we be liable for any sum greater than the amount originally received for said nursery stock.

If any Berry's nursery stock fails to grow with proper care, we will replace it at half price IF you notify us within 90 days after you receive it.

PLANT THIS YEAR

Get your fruit from the tree and the vine. With canned goods short, and fresh fruits scarce, due to transportation difficulties, now is the time to insure your share of good things to eat. Plant now, harvest next year.

WHEN WE SHIP

In the spring, we study the weather reports and ship at the proper planting time in your locality. Don't be alarmed if your shipment is not received on the first warm day, for you may be sure your order is having careful attention.

When Spring opens up all over the central states, we are not always able to ship as promptly as we would like because of the manpower problem. As your order will be shipped as soon as possible, it is not necessary to write us. You may be sure that even in the rush season, your order will be received in time for successful planting.

Strawberries, cannas, dahlias, Peonies, Gladiolus, and Perennials are shipped separately and not included in the same package with Fruits, Shrubs, etc.

In the fall, we can supply all Nursery stock except Strawberries, Cannas, Dahlia, and Gladiolus. Most kinds of Nursery stock can be very successfully planted in the Fall, even in severe climates.

Berry's send you complete instructions for planting your nursery stock. These are included in the package. Read them carefully and you will succeed.

RHUBARB

Nature's best Spring tonic! You can't beat Rhubarb for tasty, snappy sauce and pie. Good for canning, too!

No. 6861—GIANT VICTORIA. ½ inch whole roots. 5 for 50c; 10 for 80c; 25 for \$1.75, Prepaid.

No. 6862—McDONALD SEEDLESS. The best flavored Rhubarb you ever ate. The new Rhubarb that never goes to seed. Berry's send you strong divisions (part of a root with eyes) that quickly develop into big, strong hardy plants.

No. 6863—RUBY RED. One of the best of the newer Rhubarbs. The stalks are brilliant ruby-red. The sauce is also an attractive red, sweet, and of a more pleasing flavor. It is propagated from divisions—blossoms but does not produce fertile seeds.

PRICES FOR McDONALD AND RUBY RED

DIVISIONS—Each 70c; 5 @ \$3.25, Postpaid.

RHUBARB GARDEN

3—Victoria, 1—McDonald, 1—Ruby
6868—5 plants for \$1.45, Prepaid.

No. 6864—CANADA RED RHUBARB. Newest and best of all Rhubarb! Extra large, tall stalks of juicy, very sweet, red meat Rhubarb. Best for sauce, canning, or pies. Requires practically no sugar! Divisions—Each \$1.00; 5 for \$4.75, Prepaid.

BLACKBERRY

No. 6815—ALFRED. The largest, most hardy, best flavored of all Blackberries. Earlier than Eldorado. Highly recommended for home gardens.

Prepaid Prices 10 25 100
No. 1 R. C.\$1.25 \$2.75 \$9.95

No. 6816—ELDORADO. The best commercial variety and most desirable for home planting in many localities but not recommended in very severe climates. Fruit is extra large, firm, juicy and extra well flavored. Heavy, dependable bearer.

Prepaid Prices 10 25 100
No. 1 R. C.\$1.00 \$2.15 \$7.95

BERRY TREES of EXCEPTIONAL QUALITY

ALL NURSERY PRICES ARE PREPAID

Berry's give you 100% value and you're the judge. Every grade is described just as we guarantee you will find it. Honest descriptions — honest values. Remember this in comparing our quality with more colorful catalogs. The money we save you enables us to prepay our nursery stock shipments and save you up to 40%.

QUICK CROP. 5 to 7 ft. tall—1 1/2 to 1 inch diameter—extra heavily branched and well rooted. Plant this size for quicker crops—best results.

HOME ORCHARD SIZE. Strong 3/4 to 1 1/2 inch diameter—4 to 6 ft. tall. Very well branched and well rooted.

COMMERCIAL SIZE. Being lower priced, usually preferred for large Orchard planting. 3 to 5 ft. tall. 1/2 to 3/4 inch diameter. Extra value at Berry's low prices.

ECONOMY GRADE. In Peach Trees, we offer this smaller size—2 to 3 ft. tall, 3/8 inch caliper (diameter). lightly branched trees. Recommended for larger Orchards in warm climates.

PLUMS 2 YEARS \$1.37 EACH IN LOTS OF 3 to 5 Ft. POST PAID 12 OR MORE

EUROPEAN AND ASIATIC

These favorite varieties are not as hardy as American varieties so are especially suited for Central, Eastern and Southern states. They are exceptionally high in quality for eating or markets. Plant at least 2 of this group for proper cross-pollination.

Grades Same as Apple.

Prepaid Prices	1-3	4-7	8-11	12
Commercial $\frac{3}{4}$ ", $\frac{7}{16}$ "- $\frac{9}{16}$ "	\$.165	\$1.50	\$1.45	\$1.41
Quick Crop $\frac{3}{4}$ ", $\frac{11}{16}$ "	2.40	2.35	2.30	2.26

No. 6522—SANTA ROSA

A California type plum which thrives in Central States. Large purple fruit with juicy, full flavored red flesh. Tree is vigorous, good bearer, and quite hardy except in very severe climates.

No. 6506—ITALIAN BLUE PRUNE

The old favorite Italian dark blue Prune plum, for commercial or home orchards. Juicy and very well flavored. Excellent for eating fresh or canning, but not used for jelly.

No. 6508—STANLEY PRUNE

The most profitable Plum for commercial or Home Orchards. Earliest Prune, insuring top prices. Hardest European variety. Consistent bearer of large, blue, richly full flavored fruit. Freestone, subacid. Best for eating and canning.

HARDY AMERICAN PLUMS

Grades Same as Apple Page 80

No. 6500—SUPERIOR

All the qualities of the finest California Plums on an extra hardy tree that will quickly bear large crops in any climate. The huge dark red plums have juicy, full flavored, tender, yellow meat. The best of all Plums for eating fresh, for canning or for plum butter.

No. 6515—SAPA—POLLINATOR

Early, heavy bearer of rich purplish-black Plums of medium size. Extra hardy. Juicy. Good for jelly, preserves.

No. 6516—RED COAT

A great, new, red freestone plum. Large size, delightfully flavored, very vigorous grower, and hardy everywhere.

No. 6503—WANETA—POLLINATOR

The largest, most attractive and highest quality of the red Hardy American and Hybrid plums. Vigorous, extra hardy and big cropper. Mid-season.

No. 6517—EMBER

A new late Plum. Large yellow, juicy fruit with attractive red blush. Hangs on tree until ripe. Good keeper. Very desirable.

No. 6501—RED WING

An unusually large, dull red Plum developed in Minnesota. Flesh is rich yellow, firm, juicy and sweet. A fine home orchard variety for eating fresh or canning.

PLANT PLUMS THIS YEAR / PICK FRUIT NEXT YEAR

Hardy plums are one of the easiest fruits to grow. Big crops of luscious fruit to eat or can the second year after planting. Under our Nutrition Program it is recommended the average family have at least 25 quarts per year. They are fine for canning or plum butter.

Plums are very low in price in comparison with other fruit trees. Get your order in early though as stocks are limited and choose at least one good pollinator (marked P) in planting two or more varieties.

"BEST 10" Home Orchard

Selected by our customers and recommended by State Experiment Stations as being the 10 best varieties for the Home Orchard. Plenty of Apples, Cherries and Plums for eating, canning or jelly all season.
